Essay--"Mental Delusion"--Emilie Hambleton, Russellville, Pa. This young we man commenced by stating that many individuals were the victims of mental delusions; they thought that they viewed events in their proper light, when at the same time they were deplerably mistaken. The people cried out against the inventor of the steam-engine, the telegraph and against hosts of other public benefactors as being insane, while it was the people, not they who were the victims of mental delusions. This Republic has grown and flourished, but its end is not yet. Slavery has failen, but equal rights must prevuil. Fred. Douglass, possessing real blood and brain, cannot vote, while this privilege is allowed to base white men. A mun in Tennessee possessing a mind, (which some thought as great as that of the lamented Lincoln), when he reached the Presidential chair, threw off the mask and the people beheld a traitor. But we will not give our readers a further abstract of what this young woman read. It was a repetition of the usual foolish utra furnish the material, on all occasions, for the essays of certain young women of an uncertain age. The great workers in the cause of humanity, the individuals most worthy of imitation in the mind of the essayist, were Fred. Douglass, Thad. Stevens and Anna Dickinson.

"Mossys. Clolworthy & Co., of Baltimore, Md., have discovered a preparation which is a sure cure for almost all diseases to which flowls, both young and old, are subject. The season for gapes is close at hand, and every poultry breeder who desires to have success with his young flocks, ought to produce one or two packages of the "Poultarers' Friend" immediately. A preparation of this kind has been needed long since, for more chicks die annually than are raised. In other yeas, tand to many young brocks, may be exterminated or prevented, it is believed, by the use of this panaces." — York Pennsulcandau.

By using Tomlinson & Co.'s (Lincoin Engiand) Cichrated Butter Powder, By the use of this inexpensive Powder, charning for hours is reduced to minutes, and is applicable to the making of Butter at all seasons of the year. A small quantity added to the milk or cream at the time of churning will produce Butter in much less time, in larger quantity, and of a superior quality, flavor and consistency: It removes the unpleasant flavor caused by the cows feeding on turnips, garlic, weeds, &o; and prevents all rancidity peculiar to butter; also makes it firmer and sweeter even in the hottest weather.

This Powder, now being introduced into this country, has long been in use throughout Europe and the Canadas, and Butter made with it has invariably taken the prize at all AgriculturalEshows, whenever exhibite made with the proposition of the proposition of the prize of the proposition of the prize of the proposition of the prize o WALL PAPERS, WALL PAPERS.
