Another flue to the Fate of Sir John Franklin. Another flue to the mystery enveloping the fate of Sir John Franklin and his fel-low voyngers and the ice-bound regions of the Arctio zone, seems to have been dis covered. By the recent arrival from the polar regions of Dr. Goold, of Dublto, late and interesting intelligence is afforded re-specting the search now prosecuted by Gaptain Hall for traces or romains of the Erebus and Terror and their crows. In August, 1807, Capital Hall was at Repulse Bay, propuring an expedition to King Wil-Erebus and Terror and their crows. In August, 1807, Captain Hall was at Repulse Bay, preparing an expedition to King Wil-liam's Land, where, from information ob-taned from the Esquimaux, it seems be-yond doubt that important records and some relies of the Franklin expedition are still preserved. The point to be reached was four hundred and fifty miles north of Repulse Bay, and in a coun-try the inhabitants of which were known to be hostile to Europeans and Es-quimaux living at Repulse Bay. It was the opinion of the latter, who are known as King Albert's followers, that Franklin's men had been killed by King William's men. According to native information, the last six survivors of the party built a cavern or rude vault of stones, and deposi-ted in is ame documents and such articles as they had no use for, or would be angle-cumbrance to them in their journey soill-ward. It is Dr. Hall's object to reach this depository, and from his well-known repu-tation for intrepidity, energy, and endur-ance, it may be presumed that no dangers or hardships will deter him from his pur-pose. Cereals and root crops need generous food to insure their healthy development. When supplied with the proper nutriment they will floar-ish vigorously, and reward the farmer with large roturns. Most of our thrifly farmers are convinced of the truth of this assertion, and hence they are largely using Whann's Raw Bone's Super-Phosphate, by which they not only restore to the soil all that the plants have assimilated, but infuse into it greater fertility than ever.
