Local Intelligence.

AN EXTENSIVE BUSINESS,-Some idea of the large business done by the firm of Dr. S. B. Hartman & Co., of this city, the manufacturers of the celebrated Mishler's Herb Bitters, may be obtained from the ent of the amount of adver one by them during the year 1868: The number of newspapers in which their advertisements have appeared during the year is 1,049; number of newspapers in which their advertisements are now, appearing 907; total cost of advertising during the year, \$27,127.01. These figures not only Indicate the great popularity of Mishfer's Bitters, but also show that in order to bring any useful and valuable article into public notice extensive advertising is necessary.

NEW PATENTS.-Francis P. Hart, as signer to self and Dr. Samuel Keneagy, of Strasburg, has obtained letters patent for an improvement in breaking the surge on harness or vehicles. This is a highly de sirable invention, and one that cann to be appreciated and approved by all who

Henry McCullough, of Marietta, has also received letters patent for an improved collar for pipes in hot blast furnaces. This invention will save hundreds of dollars in Both patents bear date Dec. 29th, 1868

and were obtained by Jacob Stauffer, of this

KEEPING POTATOES, --- It is, perhaps peedless for us to caution our reader against leaving their potatoes exposed to the light either out doors for in the cellar They will, if so exposed, soon turn green, become soggy, and almost unfit for use cool place, away from all danger of frost in winter. We think potatoes used to keep better in times gone by in the old dark cellars, than now, in the modern cellars, with their numerous windows. Some are in the habit of keeping their potatoes in pits in the ground, dug deep enough to be sate from the frosts. This may keep them well, but it is a troublesome plan. We have known them to be kept in the very best condition in barrels, and covered

INCORRECT,-We notice in one of the New 'the tightness in the money market in Lancaster, Pa., may be seen from the fact that one of its chartered banks was recently so heavily pressed that the officers of the institution were under the necessity of posi tively refusing to allow a note of \$600, drawn by one of the most substantial business firms of the city, to lay over for a single day, though it was offered to be guarranteed by a wealthy citizen, who had indorsed the note, and who is a large stockholder in the Upon inquiry we are informed that this statement is incorrect and that no refusal

as above stated could have occurred for the

ecretary, John Thomson District Deputy Grand Master for the counties of Lancaster and York; John Greig, of Chester, D. D. G. M. for Chester and Delarisburg, D. D. G. M. for Dauphin, Lebanon oseph L. Stichter, of Reading, D. D. G. M. for Berks county.

A DANGEROUS COUNTERFEIT,-It is reported that a most dangerous counterfeit \$5 treasury note is in virculation. It is said that the easiest who of detection is by the green ornam stal engraving lengthwise, which in the counterfeit is of a paler than the dark green of the original. Seen under the microscope, the engraving of the counterfeit is coarser than the original, and there are some misplacements or omis-

there are some misplacements or omissions, but to the naked eye it presents a genuine appearance.

PARTRIDGES.—The Harrisburg papers state that an association of gentlemen in t at city have sent an agent to Fort Wuyne, Ind., to purchase 2000 partridges to stock Dauphin county. The first installment will number 500. They are to be kept until spring then turned loose. This is a commendable enterprise, and deserving of imtation in other sections.

Oursides of these ento need their bags, but pick up boues, pieces of glass, old iron, boots, stoces, scraps of leather—all are equally valuable. After the rag-picker has filled his bag or basket, and often his hat and pockets, he goes home and assorts his wares, and then sometimes makes another round. The labors being usually at three or four o'clock in the morning. Some make their rounds in the middle of the initial problems of leather—all are equally valuable. After the rag-picker has filled his bag or basket, and often his hat and pockets, he goes home and assorts his wares, and then sometimes makes another round. The labors being usually at three or four o'clock in the morning. Some make their rounds in the middle of the initial problems, and often his hat and pockets, he goes home and assorts his wares, and then sometimes makes another round. the horse and carriage being found standing in Jerremiab Here's fame, near Graeft's landing on Christmas.

Laror Hog.—Mr. Henry Brown, of Manheim two, yesterday, killed a hog 14 months old which weighed when dressed 464 pounds; this denotes a gain of over one pound per day in weight. This is hard to beat.

the opening argument of the District Attorney.

The first witness called was Thomas Broadhead, brother of the deceased, who was with Theodore at the time of the murded was listened to with attention by the crowd in the court room. A larceay had been perpetrated; at Thomas Broadhead's house on the morning of the 25th of Sep. Mr. Thomas Broadhead, bit his bother, was in pursuit of the perpetrators, and they

beat.

Intercourse Items.—Our correspondent at Intercourse, this county, sends us the following items for publication:

The old established Hotel in Intercourse known as the "Cross Keys" has recently been sold by the proprietor to Mr. Jonathan Weaver, who will take possession next April: Mr. Weaver will be glad to have his friends give him a call, and is determined to do away with the too common custom of retailing rain water colored with bitters.

The celebrated Johnstown running mare will be raffled for, New Year's Day, at the Public House of Johnstown running mare will use rafled for, New Year's bay, at the Public House of John Hess; she cost \$450—and is consulered very fast. Her owner is there will also be a fox bunt after the raffled for the principle sport in this neighborhood. On Christmas Day there was a great rush for seats, and they can be consuled the chase of the new pistols and stord down the order who had just come up, following with other shots in quick succession at Thomas who fortunately escaped with his life.

At the opening of the 2st for Sept. Archive fine was a great rush for seats, and they can be consulted to the public road. Thomas ame that they should return with im. Brooks esemed "Inclined to comply, but orne refused. Broadhead stepped between them, took hold of Orme and told him le must go back. Brooke then stepped back a few steps towards the house and then rallying—they both drew pistols and son down Theodore who had just come up, following with other shots in quick succession at Thomas who fortunately escaped with his life.

At the opening of the afternoon session was nexetting fox chase at Mt. Vernon; during the chase the horse of Mr. H. B. Skites unfortunately fell throwing Mr. S.

The Texas Cattle Plague.

The commissioners appointed by the Governor of Ohio to investigate the causes, &c., of the cattle plague in Texas, have made their report; from which we take the following points of interest:

Concerning the essential nature of the disease it may be stated that the blood seems always to be prominently involved, Microscopic investigations have revealed the presence (in the blood) of a minute fungus, or, more properly, the spores of such plants. The spores have also been found in the blood (to a less extent) of healthy Texas cattle; but they have not been found in blood of our native cattle. Whether the spores are the cause or the result of the disease, or are merely a concomitant, remains to be demonstrated. Numerous diseases of the human system were formerly accounted for on the spore theory; for example, various forms of fevers, cholera, measles, &c., were supposed to be produced by the presence in the blood of certain fungus spores. The potato rot, too, was at one time supposed to be used to be produced by the prosence in the blood of certain fungus spores. The potato rot, too, was at one time supposed to be due to the same cause. But this theory has now been discarded by physicians and scientific men generally.

The period of the incubation of the disease, or the first appearance of its earliest symptoms, varies from fifteen to thirty, or even forty days, dating from the time the native cattle have been first put upon the grounds or yards previously occupied by Southern cattle.

Of native cattle, milch cows are the most susceptible to the disease; steers and oxed are somewhat less so, and calves still less. Horse, mules, and also deer, have died of symptoms of the Texas cattle disease in symptoms of the Texas cattle disease in the policy of the husband, not to the wife. In case of separation, he is ontitled to the oustody.

Southern cattle, milch cows are the most susceptible to the disease; steers and oxen are somewhat less so, and calves still less. Horses, mules, and also deer, have died of symptoms of the Texas cattle disease in Arkansas, Missouri, and also in Illinois. Though the disease under consideration is everywhere believed to orignate from Texas cattle, yet no one seemed to know positive ly whether the disease does reality exist among Texas cattle while they are allowed to remain undisturbed upon their native pasture; nor is anything definitely known as to its causes, or the circumstances under which it has its origin and development.

No remedy for this disease, upon which reliance can be placed, has yet been found. Very nearly all the cases which have occurred among native cattle have proved fatal in a few days. Texas and Cherokee cattle are more likely to recover. A small number of sick animals recover in Ohio under the use of calomel, given internally in sixty-grain doses, twice daily, until free purgation was produced. Quinine, with diluted sulphuric acid and water, were given in Illinois with success in a few cases. The internal use of carbolic acid has been confide ally recommended, the recommendation being based upon the theory that the diseased condition of the blood is caused by the fungous plants or spores above referred to. Proper care during transportation

the fungous plants or spores above referred to. Proper care during transportation would prevent the spread of the disease, and render it less dangerous, and more amenable to treatment.

Burning Gas Under a Fall Theatre-An Exciting Situation and Hazardous Experiment.

At 6 P. M. Saturday, the gas escaping from a break in the Manhattan Gas Company's main pipe on Broadway, New York, forced its way into the vauits under the sidewalk in front of the Olympic Theatre and the adjoining store at No. 622 Broadway. An employee of the theatre was directed to find where the gas came from that had airendy manifested its presence in the ticket office and lobby. As the workman, with a torch, entered the vault a slight explosion occurred, and the man was slightly burned. Several employees of the theatre, also engaged by the gas company, went into the vaults and lighted the gas that came in jets through the masonry of the wall.

A number of the fire department and one from the insurance patrol remained to guard against the further spread of the flames, and, as the time for opening the doors of the theatre for the evening performance had arrived, tickets were sold at the box.

AN ENIOMA.—A gentleman from the country handed us yesterday the following onigma; we publish it but defer giving the answer at present in order that our youthful readers may have an opportunity of studying it out for themselves:

"A traveler on the way with a large package on his back was met by a man who inquired of him what he was conveying in that bundle. The traveler answered as follows, "A cross and a circle complete; a line where two semi circles meet; a triangle standing erect on two feet; two semi-circles and a circle complete."

Query—What were the contents of the package?

MASONIC.—On Monday, the 28th inst., the officers of the Grand Lodge of Masons of Pennsylvania were installed into their respective positions at the Hall in Philadelphia. The following are the Hall in Philadelphia. The following are the Grand Ollicers.

R. W. G. Master, Richard Vaux; R. W. Dept. G. Master, R. R. Lamberton; R. W. S. G. Warden, Samuel C. Perkins; R. W. J. G. Warden, Alfred R. Potter; R. W. G. Secretary, John Thomson.

In the Olympic vault the fire was burn Secretary, John Thomson.

The Right Worshipful Grand Master has the lower corner and about six feet in length, running up toward the roof. District Deputy Grand Master for the countries of the room, separated from the other basement by a thin board partition, and crowled with old canvas "properties," beebives by a thin board partition, and crowded with old canvas "properties," bechives, swans, donkeys, &c. The engineer of the gas works was sent for, and with a gang of men built a large fire on the street to get the frost from the pavement and uncover the main. The vault lights on the street were opened to ventilate the vaults, and after the theatre closed the gas in the main was turned off. The gas burning during the entire performance in the theatre.

The Chiffoulers—A Strange Trade. The Chiffoulers—A Strange Trade.
At a meeting of the Working Women's
Association of New York, on Monday evening last, Mrs. Norton, chairman of a Committee of Investigation in the condition,
habits, labor and barnings of the rag pickers
of the interpoplis, presented quite an interresting report. She said that the mere
collection of rags forms but a part of the
business of these chiffoniers. They not
only pass these into their bags, but pick
up bon's, pieces of glass, old from, boots

ceptacles and left there to accumilate until thation in other sections.

FATAL ACCIDENT.—John Crouse, a farmer, aged about 48 years, residing near Rising Sun, Md., fell off a load of cornfoder, the 23 inst, and was almost instantly killed. He was riding upon the load as it was being driven into the barn, when he came in contact with the top of the doorway and was knocked off the load. He alighted upon his head and shoulders, and survived the accurate of the load. He alighted upon his head and shoulders, and survived the accurate of the load.
