of his venture was not equal to his expec-tations. He has at times evinced great de-pression of spirits. He would occa-lonally sit, at his place of business as if in deep thought, with his char resting upon the palms of his hands, and sometimes took the very picture of despair. Then he was dis-satisfied with the house he occupied. "Is that a place," he would say, "for a man to occupy, who has owned and worked a hand-some farm? He had reference to the small-ness of the dwelling and the want of accom-modations. What his conduct was at home is not known, but it is helleved to have been recently strange and dimatural. A lady

recently strange and unnatural. A lady friend of Mrs. Blackstone visited her the other day, and as she was leaving, Mrs. B other day, and as she was leaving, Mrs. B. asked her in a very carnest tone to come soon again, leaving on her mind the impression that she had something to communicate, but the visitor neglected to call.

The father of James L. Blackstone is a wealthy farmer residing in Branford, Connecticut, over 70 years of ago. He has exhibited peculiar traits which have led some of his neighbors to believe him at least ecof his neighbors to believe him at least ec-centric; and his peculiarity is that, not-withstanding his wealth, placing him be-yond the almost possible reach of want, he fears he shall become an inmate of the poor house. The tather of Mrs. Blackstone is quite feoble from age, and is not engaged in any humbers.

Becapture of one of the Brodhead Mur-derers. Easton, Pa., April 5.—Brooks and Orme, EASTON, Pa., April 5.—Brooks and Orme, the Brodhead murderers, made their escape on the night of April 2. One of them feigned sickness, and, calling in the keeper, took his keys and threatened his life if he refused. Orme was captured yesterday, four miles from Strondeburg, in a hay mow. They had stolen horsesund left them on the road, having lost their way. Brooks is still at large. Parties are in pursuit and great excitement exists.

Silly Stories From the South to the South of the South of the South of Horse Identification (her providence (R. I.) Journal to deny a silly story that she had been polsoned in Florida. She speaks severely of the sensation writers who send on such tales of malicious temper and violence on the part of the residents of the South, and says: "Throughout the met only kindness and courtesy from all classes, and by some I believe my visits are gladly welcomed."

MASHINGTON, April 6.
In the Senate, yesterday, Mr. Chandler called up the bill to authorize the New York, New Poundland and London Telegraph Company to land its submarine cable on the shores of the United States. The pending amendment was that offered by Mr. Stockton, authorizing any company chartered by any State to land its cable subject to regulation by Congress. Mr. Stockton made a long argument in support of his amendment. The expiration of the morning hour brought up the joint resolution to protect the interest of the United States in the Union Pacific Railroad, The question was on the amendment authorizquestion was on the amendment authoriz-ing the President to fix the point of junction of the Union Pacific and Central Pacific withstanding his wealth, piacing him beyond the almost possible reach of want, he fears he shall become an innust of the ponthouse. The father of Mrs. Blackstone is quite feoble from age, and is not engaged in any business.

There is no doubt that the murder was committee of the Union Pacific and Central Pacific expedient, a committee of eminent citizons (expedient, a committee of eminent citizons (expedient, a committee of eminent citizons of the resolution. Without action on it the work on Sunday, and wore heard talking early on Sunday, and wore heard talking early on the following day. Mr. Funsion, the partner, states it as his belief, that Blackstone intended to murder him, as for some time past he has followed him to the work room, taking care to close the door behind him, then seat himself near to him and pick up a heavy chisel, and sometime a pammer, and handle it in a peculiar manner, eyeing him with a strange wild look, but at the same time using the most affectionate language.

The report current on Tuesday, that one of the probable causes of Mr. Blackstone's disturbed state of mind stross from some derangement in the accounts of his firm by the inaccuracy of a book keeper, had no foundation. The facts are that the former book-keeper had simply overdrawn his account by a few dollars. There was nothing whatever wrong with his books, and those of the present book-keeper are not in question at all.

algorior, passed. The House resolution was a day for the adjournment of Congress was taken up and amended by striking out the 6th of April and inserting the eith; as thus amended the resolution was adopted. Mr. Sprague made a personal explanation, denying that his recent speech was made under the influence of wine, whiskey or any other stimulant. The House was made under the influence of wine, whiskey or any other stimulant. The House was made under the influence of wine, whiskey or any other stimulant. The House was made under the influence of wine, whiskey or any other stimulant. The House into Executive session, and some time after adjourned.

Without action on the resolution the Senare went into Executive session, and some time after adjourned. Some an exported the United States was adopted. The House then went into Committee of the Whole on the miscellaneous deficiency bill and amendments to the House. The several amendments to the House. The several amendments to the House. The several amendments were agreed to, and including the concurrent resolution for a final adjourned.

WASHINGTON, April 6.

In the Senate, yesterday, Mr. Chandler called up the bill to authorize the New York, New Foundland and London Telegraph Company to landits submarrine cable on the shores of the United States was that offered by Mr. Stockhon, authorizing any company chartered by any State to land its cable work and general superstructure. The numerous wornout and broken down locomotives are the best proof of the rulnous condition of the track. All these things tell us of the necessity of rebuilding the road before it can carry freight to advantage. The money required to put the road in order will not permit the payment of the interest on the first mortgage bonds for some years. The holders may, in consequence, foreclose the mortgage and cause the government interest, of sixteen, thirty-two and forty-eight thousand dollars per mile, to disappear. The holders of the greater part of these first mortgage bonds are the Union Credit Pacific Mobilier Company, Congressmen, President and Directors, Stockholders and Contractors. Unless the government looks to the interests of the people of the United States in our great Pacific Railroad we may expect to see it pass, as a

Railroad we may expect to see it pass, as a clear profit, into the hands of those by whom, under the guise of law, it has bey no cleverly manipulated.—N. Y. Herald.

May coupons on the Government bonds, due the 1st proxime, will be paid on presentation at the United States Sub-Treasury in the Custom-house of Philadelphin. This anticipation of the interest is authorized by an act of 1864. Some weeks ago a horse and buggy were stolen from L, Putnam, of Troy, Bradford county, and on Friday last the thiof, named John Seely alias Ferguson, was lodged in jail at Towanda, having been arrested at Cortland, New York. Three valuable horses, belonging to different owners, were stolen last Tuesday night in the vicinity of McCounellsburg. Two of them were afterwards turned loose, and recovered, but the thief made his escape with the third one. The bodies of seven dead infants were re-

cently found on an open lot in Philadelphia, How they came there, or where they came from could not be ascertained, and before the Coroner arrived the residents of the neighborhood burled them. A meeting was held at Mercersburg, Franklin county, on Saturday last, for the purpose of taking some action in regard to building a railroad from Mercersburg to Marion, six miles south of Chambersburg. Seventy-five thousand dollars were subscribed for that purpose. Official Report of General Custer's Late

of the United States in our great Pacific Railroad we may expect to see it pass, as a clear profit, into the hands of those by whom, under the guise of law, it has been so cleverly manipulated.—N. Y. Herald.

The culture of Trees.

The recent report of the U.S. Agricultural Department contains a valuable essay, contributed by J. M. Edmunds, late Commissioner of the Land Office. Great evils will result to the country, it is predicted, unless the axe of the woodman is restrained. It is asserted that, except in the mountain regions, nearly the entire surface from the Atlantic to the Mississippl has been despoiled of its primeval forest growth, and that nowhere have ital snable and that nowhere have ital snable sispip and the Pacific amounts to fourteen hundred thousand square miles, and it is asserted that, by a little artificial effort, forests may be gradually extended over this large area. Experiments thus far made have proved successful. Trees to the number of millions have been produced from the seed of almost every forest species by the unided efforts of a single association in Nebraska.
