the fact that, in accordance with the pro-visions of the fourteenth amendment to the constitution, some important changes would take place in the representation of a number of the Nortnern States, especially if the fifteenth amendment should fail of ratification prior to the taking of the census. DODD'S NERVINE AND INVIGURATOR is a TONIC and GENTLE STIMULANT which is NOT attended by REACTION. What it gains for you it maintains. When it refreshes body or mind, it refreshes with natural strength that comes to stay. We are not recommending teototalism in the interest of any faction; but long and extended observation teaches us that he who resorts to the bottle for the rest or recuperation, will find, as he keeps at it, that he is kindling a fre in his bones which will consume like the flam-s of perdition. Remedy for the Peach Worm.

There is a handy means for the de-struction of this heretofore fatal enemy to the peach tree, which is practical here -which has proved certain, beyond peradventure. It is simple, of easy ap-plication, and expeditions. It consists of the use of *boiling water* applied to the collar of the tree, in quantities varying according to the age of the tree—in small treas are one just trees, say one inch in diameter, half pint is sufficient, and a pint is enough for larger ones. Remove the earth from around the tree a few inches in depth. and just pour the water boiling hot on the exposed roots, and it will kill every egg as well as worm, with positive cer tainty. It has been tried here time and

tanky. It has been tried here time and again, upon trees that have been more than half killed, and a perfect restora-tion has been the result in every case. No danger need be apprehended from the effects of the hot water upon the trees, unless a large quantity is applied to a very small tree. When a large number of trees have to be oriented number of trees have to be operated upon, a fire should be made in the or-chard for heating the water, so that it can be applied builting hot. Considering the importance of this remedy to peach growers who may not have heard of it, I deem, it but common justice to give it circulation through the columns of your per. Its certainty as a remedy may implicitly relied upon.—Country

Duties of Farmers. Farming is not only a profession, but of all professions it embraces the widest range of scientific propositions and prac-tical facts, and affords the widest field for the exercise of the philosophic and analytic mind. Instead of the brightest boys being sent to a medical college for a field worthy of their talents, they should be educated in the science, and instructed practically in the duties of

This will at once strip farming of almos every disagreeable feature, and clothe it vith attractions possessed by no other

As at present conducted there is As at present conducted there is a large amount of very disagreeable labor required to be performed in farming, and it is mainly to this fact that we ow the desertion of that business for other by country boys.
