There is nothing that adds so much to the given, and forward us all items of public interest. It says:

There is nothing that adds so much to the value of a county paper as a liberal supply of boune news. Nothing is needed to accomplish this but for some person of ordinary intelligence in each neighborhood traveled for publication whatever events of local interest may transpire. Many events may happen of local interest that some persons think not of sufficient consequences to send for publication; but it is a pretty good rule to lay down that whatever excites may happen of local interest them to send for publication in the county paper. Bailroad Bonds. A. B. HATCH HARVEY FIEL. OFFICE OF

FISK & HATCH, BANKERS AND DEALERS IN

GOVERNMENT SECURITIES. Ko, 5 Nassau Street, New York,

November 8, 1869. To our Chateners and Oprespondents: The surprising development of our national resources and the rapidity with which the government is now enabled to reduce the naonal debt, by weekly purchases, render it apparent that the time is approaching when the Five-Twenty bonds may be funded at not over four or four and a haif per cent. interest.

Meanwhile their high price, as compared Meanwhile their inglights, with other classes of securities paying an equal rate of interest, is leading to general inquiry for more profitable forms of investment n which money may be safely invested,

During the warthe necessities and peril of the government, and the consequent cheapness of its securities, rendered them so attractive that, from this cause, combined with the tive that, from this cause, combined with the patriotic faith of the people in their safety, they absorbed almost the entire floating capi-tal of the country, and diverted attention from other classes of securities which had before been deemed sufficiently conservative and sound to meet the wants of the most cautious

The government is no longer a borrower. It no longer needs the country's capital, but de-sires gratefully and honorably to repay it. The rapid accumulation of capital for invest-ment, and the reduction of the national debt rendering it certain that hereafter but a com parativly low rate of interest can be derived ployed in business may wisely flow. The effetyripse of Peace, no less needful to their time and place, for the common wolfare, than were the waste and cost of War, now call for the capital which the government no longe needs, and offer for its use a remuneration which the government need no longer pay, and in some cases, a scentity as stable and endur-ing as the faith of the nation itself.

The desire to capitalize the premium which

may now be realized upon Five-Twenty bonds and which a material decline in Gold toward par, and the ability of the Government to fund them at a lower rate of interest, may at any time extinguish, is felt by many holders who desire some satisfactory assurance as to which of the many lower-priced securities in the mar an exchange.

The applications for information and advice which are addressed to us daily, show how un-iversal is the desire for this assurance, as to what forms of investment more profitable than

Government securities at present market rates. are entitled to the confidence of investors.

The ressure of this want has led us to feel the importance of directing our own attention as bankers, our large experience, and our familities for obtaining reliable information-t the work of supplying it in some measure, and to offer the results of our inquiries to those who may be disposed to confide in our good faith and judgment.
We are unwilling to offer to our friends and hithorto princically identified ourselves.
