The Income Tax. The Senate has rescinded its action relative to the income tax; after abolishing it entirely by a large majority in a full Senate, advantage was taken the absence of a number of Senators, to restore the tax, diminishing the rate to two and a half per cent. This result was largely brought about by the influence of the great railroad corporations of the where else use their great power advance their own selfish aims at the expense of all the other interests in the country. Senator Sherman, the stated in the Senate, when the reconsideration of the income tax was brought about, that if it was abolished entirely, it would be necessary to restore the tax on the gross receipts of corporations-which likewise been stricken out by the Senate-inasmuch as one or the other of these taxes was necessary to ensure the raising of the required amount of Abbott. Anthony revenue. Senators and Wilson, under this representation changed their previous votes; and this sufficed to decide, so many Senators being absent, that the tax should b taken off the railroads and laid upon the people. The New York Tribun aptly says of this result of railroad influence: "So the railroads are carry ing their tyranny into every household, nd propose now to burden us in time of peace and prosperity with an exaction which, like the draft and the legal-ten-

der act, could only be justified by the extraordinary necessities of war." It reads somewhat oddly though to see the Tribune and other Republican papers objecting to the income tax on account of its unconstitutionality. It is doubtless unconstitutional, being in conflict with the provision that all direct taxes shall be apportioned among the several states according to their respective numbers; but then who would suspect that a Republican would object to it on that ground. After defending warmly all the unconstitutional acts of the government, for the last eight or nine years and denouncing as traitors and rebels every one who in the mildest manner suggested this little flaw in them, it is somewhat startling to find what a sudfor the great charter of our liberties. Their defence of the violations of the Constitution during the war on the ground that they were rendered recessary by the "necessities of war" is transparently unsound to the comnonest understanding, as every one knows that the very object of a written principles and rules of conduct for the government created, which cannot be fied in the instrument. But we are glad to welcome back our erring Republican brothren in their return to a proper respect for the law and the Constitution and trust that now that they have returned to the straight and narrow path. they will never again desert it.

The investigation which has taken lace into the circumstances under which the scheme for the annexation of San Domingo to the United States was initiated, has developed the fact that an extraordinary interest has been manifested by President Grant in the success country, which in Congress and every- of the project, and facts have been tes tified to, which create a suspicion in the public mind that this interest has not been solely occasioned by the President's belief that the annexation would chairman of the Finance Committee, be for the best interest of the United States. We trust that this suspicion i not well founded, for it would be a sac thing for our country, if it should be proven, that its Chief Executive Officer has used the immense power of his po-sition with the deliberate purpose of thereby enriching himself or his friends. The investigation has gone so far as to raise a suspicion as to the President's motives, in endorsing this annexation cheme; if that suspicion is unjust, the nquiry should be still farther prosecued, so as to fully demonstrate the President's innocence, and to relieve the ountry from the sad reproach which will cling to it for all time should his guilt be proven.

We know that Grant is ignorant, in dolent and avaricious; but we would fain believe that he was not pecuniarly lishonest. In this San Domingo matter he may have been the dupe of d signing men, or he may have been their ecomplice; it is certainly difficult to selieve that he was neither the one nor the other. The whole testimony goes to show that the parties who instituted the movement, did so with the view of making money out of it; and it also shows that Grant aided them with all his influence although it does not clear ly prove that he was animated by their

Grant took the first step in the basi ness in July last, when he sent General Babcock an officer of the army who describes himself as Grant's Aid-de-Camp to San Domingo with a letter to President Baez, in which he says to him: "Deeming it desirable to satisfy my cur den regard they have come to entertain by obtaining information through a source upon which I rely, have for this purpose upon which I rely, there is a purpose that the purpose the regard they have for the purpose the results of the relation of the purpose the results of the results of the relation of appointed Brevet Brigadier-Goneral Orville E. The object was to give expression to the sentiments of the workingmen of Now York on the great question of Chinese Labor vs. American Labor. There were threestands, one expressly for the Germans. At the principal stand Nelson W. Young presided, who spoke of the vast importance of the meeting to every man in the country, and to the workingmen, and said that if this element is new introduced it will have a tendency to disarrange all the relations of domestic life. Heretofore the workingmen of this country have had obstacles to contend with, but now they are called The Anti-Chinese Labor Meeting. Democratic Nominations in Philadel-phia.
