The Hope for Self-Government in Europe When the war between France and Prussia began King William solemnly declared that his quarrel was with Na poleon, and not with the French people. By that declaration he drew to nimself and his cause the sympathy of the world. When Napoleon surrender ed an almost universal expectation prevailed that the terrible sacrifice of lif would cease and peace be speedily restored. The new-born French Republic has shown a disposition to make peace on terms that must be regarded as honorable to Prussia and sufficiently humiliating to so proud people as those of The proposition tendered by M. Thiers in his interview with Earl Granville embraced compensation for the expenses entailed upon Prussia and am ple guarantees for the future. England refused to interfere as a mediator be

cause her rulers are not willing to recognize the French Republic, and King William declines to treat with the only government which has an existence in France. His armies are now before the gates of Paris, summoning the city to France stands alone, in this terrible

crisis of her history without receiving any sympathy from the monarchical governments of Europe. Every one of the stronger powers is hostile to the new Republic, and there is not a King among them who would not gladly see this last out. We can not wonder that it is so. A Republic successfully established in Ermee would be a constant menace to every monarch in Europe, not through armies, but through the grander march of ideas. In the fearful struggle now before the French people they must re ceive the full and generous sympathy of every friend of republican institutions, no matter what may be his nationality Every German who has imbibed the true spirit of American liberty must hesitate now before wishing that King William may succeed in crushing out the sacred principle of self-government which is embodied in the French Republic. France stands to-day as the representation of republicanism in Europe, and upon her fate depends the life of liberal ideas. Should the Republic which has been established be beaten down by the cannon balls of King William, all hope that the people of any State in Europe will be allowed to choo their own rulers will be crushed out. and for many years to come kingly power will be too firmly rooted to be verthrown.

To his dismay her strange conduct continued to grow more alarming hourly. On reaching Chicago, he stopped over one day, hoping that a change might take place. But his hopes were fruitless, and at the ladvice of a physician he gave up the journey, and turned back to Weston. While they were waiting for the departure of the Datton train
