THE LANCASTER WEEKLY INTELLIGENCER, WEDNESDAY, APRIL 5, 1871.

The Farm.

TO COBRESPONDENTS.

TO CORRESPONDENTS. Communications upon subjects of interest to the farmer, the gardener, the fruit-grower mand stock-breeder are solicited for this departs to the harmer, the gardener, the fruit-grower ment of the paper. All such communications should be addressed to ULRICH STIRUCARS Agricultural Editor, Conestoga, Lancaster Planting Fruit-Trees. BY THE EDITOR. Farmers and owners of small tracts of land have, of late, awakened to the im-portance of planting more fruit-trees, as may be seen by the large numbers of all kinds planted yearly. But many have not yet become impressed with the im-portance of doing the work well. They seem to think that the less labor done to them and the less care taken of them, the better the trees will succeed. They forget that " what is worth doing at all is worth doing well," and that fruit-trees are not planted to last only a year, but many years, and some-as the apple-far a man's life-time. The not have your trees of irresponsible

to them and the less care taken of them, the better the trees will succeed. They forget that " what is worth doing at all forget that " what is worth doing at all is worth doing well," and that fruit-trees are not planted to last only a year, but many years, and some—as the apple —far a man's life-time. —far a man's life-time. —There is, very wisely, a sort of law of traveling agents, for nurseries at a dis-traveling agents that furnish good trees, there are others that do not, as many in this and other sections have discovered to their sorrow. But, no matter how wend trees may be, they are never im-to the resurce sont of the sorrens for the sorrens for the disintegration of resks, the time or the disintegration of rocks, the time fruitfulness would be far distant in the fruitfulness would be far distant in the traveling agents, for nurseries at a dis-traveling agents that furnish good trees, there are others that do not, as many in this and other sections have discovered to their sorrow. But, no matter how mend the sorrow. But, no matter how there are others stand to not, as many in this and other sections have discover this and other sections have discover to their sorrow. But, no matter how good trees may be, they are never in proved by transportation and exposure but frequently almost ruined there which is containing the borrowed to some reliable nursery in yourown neighborhood and select good, such as the proper time returns to carth, thus repaying the borrowed or which all of the matter extracted to some reliable nursery in yourown neighborhood and select good, such as the sole, thus repaying the borrowed plant. When standing too crose in the sole, by the growth of the plant is returned to it; to this is also added such; they never give as good satisfac-tion as those not standing so close in the sole of the grant is returned to it; to this is also added such; they never give as good satisfac-tree; it will add you to set them in the proper position in plante, there is disposed of very much of the sole. The reason that rene is the sole, specially when windy, or clear and cold, but *her three* and not set of there are any, and the sole, solid the add before beginning to the holes should all be dog before beginning to the holes, until it be filled to such an surface solid be according to the sur-row fue trees hous diagn the throwing the hole, until it be filled to such as surface solid be according to be solar and sole, if there are any, and surface solid be according to be solar and sole, if there are any, and the holes, until it be filled to such as surface solid be according to be solid. The side of any the form the solid and the latter of the solid and are further of the solid. There fore should all be dighted to such any surface solid be assist in the fattening of which as a direct of all soper-teres is should again be throwing the hole, until it be filled to such as planted, will be just as decord, as the solut and the protoes of mal specific the solid. There is an accoundiation, instead of the holes, such sing the throwing planted, wil

extent that the noise, as dorp, as they planted, will be *just as dorp*, as they grew in the nursery; guard against planting deeper, as it is against nature. Before planting, cut off all superfluors branches and twigs, leaving three or four main branches to form a head. If the tree has fine roots, will a few main ones as braces, the top will require little or no cutting back. The top must be in proportion to the amount of roots. As the larger roots of the trees are gen-erally cut off roughly by the spade in digging, their ends should be trimmed off smoothly in a sloping manner on off smoothly in a animus, or the product of the trees are gen-transportion to the amount of roots. As the larger roots of the trees are gen-dinging, their ends should be trimmed off smoothly in a sloping manner on the *andt* exist, a mass of small fibrous roots will then spring from the end off each. The holes being now ready for each. The holes being now ready for roots is spring from the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the tree of the trees and the trees is the trees is the trees is the trees and the trees is the tree of the trees is the tree is the trees is the tree is the tree is the trees is the tree is the tree

Travellers are always liable to sudden at-tacks of Dysentery and Cholera Morbus, and these occurring when absent from home, are very unpleasant. The PAIN KILLER may al-ways be relied upon in such cases. As soon as you feel the symptoms, take one teaspoonful in a gill of new milk and molasses and a gill of hot water. suit well together and drink hot.-

In a gill of new milk and molasses and a gill of hot water, aits well together and drink bot.— Repeat the dose every hour until releved. If the pains be avere, buthe the bowels and back with the medicine cleat. In cases of Asthma and Pithisic, take a tea-spoofful in a gill of hot water sweetened well with molasses; also bathe the throat and stomach faithfully with the medicine, clear. Dr. Sweet says it takes out the soreness in cases of bonesetting faster than anything he are applied.

This will save many young trees that would otherwise die from the disclosed of drouth. In starting a young apple-orchard, sheet a medium soil, that is, one that is neither so dry and sandy, as to be purched up in the Summer dromths, nor is weil and potatoes are as good, and carrots, parsnips, mangel wurzel or tur-nips, will do, but it may be necessary to boll them and mix them with other food. If you have no roots of any kind, you must resort to sulphur, and give a large table-poonful twice or three times a week for several weeks before littering. Give and more than that is unnecessary.— The common way is to set them in the trees apart, less than that is too close other. By this plan fully one-seventh more trees chan best upon an acre than the trees that be distance between the trees being the same. To lay out an orchard on the Quincunx '' system, but which the trees four best upon an acre than more trees chan best upon an acre than they will be better for being short. After this her nest must not be short form the centre one, and from each other. By this plan fully one-seventh more trees chan be stup an acre than the trees being the same. To lay out an orchard on the Quincunx y system, the first tances of rows are required. The first tances of rows are required. The first tances of rows are required. The first then 30 multipling the first by 1.732, gives 31,000 multiplying the first by 1.732, gives 31,000 multiplying the first by 1.732. For ex-supple, if the trees are to be 30 feet apart, then 30 multiplied by 1.732, gives 31,000 multiplying the first by 1.732. For ex-supple, if the trees are to be 30 feet apart, then 30 multiplied by 1.732, gives 31,000 more by diving her from the nest she of the rows the other way. Now lay off rows across the field one way 30 feet, the to other way 52 feet; the trees are to bar her other way 52 feet; the trees are BY GETTING UP CLUBS.
