Hov. John A. Watson,
Harrier, didings
Harrier, didings
Roy. Edward C. Iddings
The undersigned Auditor appointed to distribute the fund arising from the sale of Defendants real estate on above execution, and paid late Court, hereby gives notice that he will sit for that purpose on Tuesday, May 30th A. D. 1971, at 20 clock P. M. in the Library room of the Court House in the City of Lancaster, Pa, where all persons interested may attend. first importance is absolute regularity in everything. It has been said that the appetite of a cow or a sheep is a perfect chronometer. They know when feeding time comes, and become uneasy if the feeding does not proceed as usual. This restlessness is unfavorable to thrift. This restlessness is uniavorable to thrift. Absolute quiet and contentment are essential to the most rapid growth.

When the feeding time comes, the regular rations should be given without delay, and with as little noise and commotion as may be. may3-4tw18 regular rations should be given without delay, and with as little noise and commotion as may be.

It is not only necessary to observe regularity, but the routine itself should be such as notto interfere with the quifet of the stook. In the management of our own herd of dairy cows, we practice for a time feeding roots at night after milk-ting. The cows were fed at 8.0-clock, and after eating two hours were milked, and the turnips were cut in the barm where the stable is situated, and fed to the minust at pight. It was found that we have the stable is situated, and fed to the minust at pight. It was found that as the time for turnips approached, the cows were all on tip-toe of expectation, watching every movement, and exhibit.

April 14, 1871.

Auditor.

Co-PARTERERIT MOTION

The co-partnership heretofore existing between Jacobs Landis, Frank F. Landis, under the firm name of Landis of the stook of the firm of the firm of the partnership with decorate the firm of the partnership with the settled by Landis, Frick & Co. at the office of the Keystone Steam Engles and Machine Works, on East James street, Lancaster, with are requested to call as soon as convenient as the time for turnips approached, the convenient of the co

With movable combands.

There are different ways practised of making artificial swarms, but we will give only the one. After

artificial swarms, but we will give only one, as we pursue only the one. After smoking the bees, to quiet them, we carefully lift out a frame, and closely examine the comb whether the queen is on, if not we put it aside, and take out the next in the same manner, so on until we discover the queen when we transfer the frame with the queen and the bees on the comb to the new hive. If, however, the comb on which we find the queen should contain the only sealed queen-cells, we would take another frame and comb, and transfer it to the newhive, and

want the nearest mature young queens to remain in the old hive. We then

put an empty frame in the place of the

one removed, and return the others, being careful to get each in its former

young bees remaining, but a hive full of combs filled with honey and brood,

and a number of lumnature queens. The first will rapidly fill its hive with combs, and the other with bees as the brood hatches.

Begularity in Feeding Stock.

The number of good feeders of stock among farmers is comparatively small. "By the term good feeders," we mean

those who by a judicious economy and

care in management, secure the greatest benefit to their stock from a liberal use

of the forage and other farm products fed to stock, rather than those who feed

fed to stock, rather than those who leed extravagantly high. The feeding of the latter is often attended with waste. To

Intter is often attended with waste. To illustrate this point, we may mention the case of a neighbor of our own, a successful farmer sixty years old, who stallfed a yoke of oxen for market last winter. After oating 1000 pounds of cornmeal, and all the good hay they wanted, they weighed exactly 20 pounds more than when the feeding began.

It is noticed that the stock of some farmers is always in flue condition.—

The noticed that the stock of some farmers is always in fine condition.—
They nover feed high. Very little meal or grain is used, and nothing is wasted about their barns; while the stock of their neighbors who have abundance of

equally good hay and usually as much meal, will be lean and hide-bound, and

in low condition every way. The greater success of one is due entirely to his skill in the care of stock and the uniform care and attention it receives.

Among the many essentials of successful management of stock, of the

The new one we fill with empty

J. B. BUTTERWORTH, PROPRIETOR.

We would respectfully call the attention of all farmers who need a complete combined harvester, to examine into the merits of our Lanacatter county built reaper and mover, THE VALLEY CHIEF. ITHE VALLEY CHIEF.

It is a simple two-wheeled machine, having side delivery, which throws the grain entirely out of the way of the team for the next round. It has a rear cut, a floating finger bar; the guards or fingers are made of the best wrought iron-faced with steel. The height of the cut can be altered with ease while in motion, thus enabling one to pass obstructions or cut long or short stubble; and the whole machine is built with an eye to convenience, simplicity and durability.

where, where the stall times Hickory Lumber, for Wanted at all times Hickory Lumber, for which the highest cash price will be paid.

THE ADVANCE!

or short stubble; and the whole machine is built with an eye to convenience, simplicity and durability.

We are now building the VALLEY CHIEF of two stress. We have, at great expense and attention, enlarged our patterns so as to build a machine loo pounds heavier than our last year's machine; having higher driving wheels had suggested.

He higher-wheeled machine or machines made exactly like those of last, year, with which our Laneaster county customers are so well pleased.

If you want a light, two-horse machine, the VALLEY CHIEF is the machine to buy.

If you want a mentine that is able to pick up very badly lodged grain with ease and certainty, and rake it off, get the VALLEY CHIEF—It will do it. The Mersh, self-rake, in this particular, has no superior.

If you wish to get the machine that you can be a superior of the country of t MARSH, GRIER & CO., my3-9tw18 Mount Joy, Lancaster Co., Pa PROVISIONS, FISH, &C. DAVID CARSON. DEALER IN
