Y. in his opinion, was to turn under clover  $\mathbf{Z}$  FINE PIECE GOODS.  $\mathbf{Z}$ quieted. It will then take that But see that the start is a good one; ground kept mellow, and work defill up to the corn. This keeping a *fresh* sur-face for the air to actupon—this is what is wanted, and there are so many im-plements to do this the man is inexcus-able who neglects it. We must *help* our corn along, and, as we have said, every neglect will be beyond remedy. bo not say the hot weather will bring it up. It will bring it up to a certain extent, but not toa full crop. Who ever heard of a pr mium crop being raised by early neglect? At best there is but a air crop; never the large yields we rend of the benefit. Push the early part of the season, and when the heats of sum mer arrive they will find large corn to be readilypushed on to the highestpoint. What will prevent a large yield in such case? A constant use of the implements is sure to ald largely, while without it is sure to ald largely. While withou FLOOR OIL-CLOTHS. In his opinion, was to tirr under cover, peas or buck wheat. It was objected that buckwheat contributed but lit-tle to the restoration of exhausted land, while clover and peas are well adapted for this purpose— the former article especially. A. M Cortis contended that manufer was SPRING STYLES NOW READY.
