#### Conditions So Much Better That Six Weeks Hence May See General Resumption of Active Trading.

With the passing of another week there has come a brightening in the financial skies which forecasts resumption of normal conditions earlier than has been generally looked for. The most important step in this direction, and one which has had a material effect in strengthening the situation everywhere, was the decision of the New York Stock Exchange Committee to permit trading in unlisted securities at moderate concessions from the closing prices as of July 30, the last day on which the ex-changes of the country were open. The original restriction about not per-The original restriction about not permitting sales under those prices was made so as to prevent, as far as possible, the liquidation which, it was generally believed, was to be expected because of the war situation abroad. This rule continued in force for more than six weeks. In the meantime, there has come a satisfactory clearing of the foreign debt situation and danger of legislation, while it is still apparent, is liquidation, while it is still apparent, is not so pronounced as it was when the order to close the exchanges was given. A wave of optimism said to be develop-ing throughout the United States gave today to the impression that the is being cleared for the reopening of the New York Stock Exchange, the Consolidated Stock Exchange and also the Cotton Exchange. It may be possible to reopen them, especially the first named institution, by November 1, provided the Federal Reserve Bank is working by

Officials of the exchange are feeling out

the financial sentiment of the country. They are also sounding the loan situa-tion and testing the investment demand. It is said the financial machine is be ginning to move, and that the situation is being developed under careful treat-

#### RELIEF BEING GIVEN.

Bankers here today expressed the opinion that the steps taken by committees here and in New York that have been formed to supervise the trading situa-tion would do much to afford relief to financial conditions generally. The fact that trading may now be done in stocks and bonds not listed on the exchange at prices a few points below the July closing, when approved by the committees, makes it possible for issues to seek the new level bases that must be exected when full resumption of trading

No one denies the possibility of a heavy offering of European securities as soon as the necessary mediums are made available for their disposal. Each day that the exchanges are closed, however, lessens the amount of foreign selling that may

The present war crisis is teaching Americans the advantages attached to a central bank in a country's financial sys-tem. The efficiency and resources dis-played by the Bank of England, in handling the situation in Great Britain, com-mands admiration everywhere.

In lieu of such an institution we have

developed a spirit of co-operation among the national banks which has helped materially in meeting the emergency While the Federal Reserve system is not yet in operation it is hoped to have it fully working by the middle of October. The Federal Reserve Board has been fully organized and its advice and in-fluence have helped much in solving the Under the new system we shall have 12 banks of concentrated power. This should permit greater unity of action than heretofore.

RESPOND TO LOAN CALL.
The banks and trust companies of New York city responded loyally to the call for a syndicate to handle the new municipal toan of \$100,000,000 provided to take care of the city's maturing loans abroad. Public offering of the loan has been a decided success, although the details of oversubscription have not become available to outsiders. A very large subscription tion response came from small investors to whom the 6 per cent, interest and the absolute security of the loan proved at-Institutions and investors in the interior have taken large amounts, and to this extent the New York banks will be relieved of a drain on their gold reserves which it is desirable to build up as fast as possible. But, at any rate, English and other foreign holders of the city's maturing obligations, who have not chosen to extend their old loans into the one, two and three-year maturities newly provided, are sure of payment in gold. A further guarantee of the payment of all our debts abroad in gold is fur-tished by the banking pool which has been organized to provide \$100,000,000 in gold in case settlement, in whole or in part, cannot be effected in bills of ex-The result of the two operations is to provide a gold fund of \$150,-0.6,000 with which to settle our accumulated adverse balance of trade. This should certainly reassure foreign creditors and help in ameliorating the foreign position. We are already finding some of the most conservative London banks. banks willing to renew American maturities of banking concerns, and the co-operative action of our financial in-stitutions in establishing the \$150,000,000 gold credit referred to ought to increase this disposition of London to make or renew loans on this side.

Almost all roads in the South report more or less contraction, one notable exception being the Chesapeake and Ohio, on which there is still a substantial increase. In the West and Southwest there is, however, some evidence of improve ment, although most of the leading systems continue to make smaller returns than in 1912. The losses in many in stances, bewever, are much smaller than a short time ago, and in several instances moderate gains are reported.

## BANKERS PROTEST SECRETARY M'ADOO'S CHARGES OF 'USUARY

Criticise as Unfair His "Blacklist" Enumerating Banks Charged With Hoarding of Currency Re-

Protests from bankers against being held up before the country as "usurers" and as being guilty of wilfully creating financial stringency by alleged hoarding of currency reserves began to reach the Treasury Department today. Some of the listed stocks at moderate concessions is letters used vigorous terms in criticising Secretary McAdoo's campaign against hearding and his publication of so-called "blacklists" enumerating banks having a surplus of legal reserves.

That they would be subject to severe criticism had they failed to maintain ample reserves under present conditions was the tenor of the bankers' protests. For protection of themselves and their depositors, the protesting bankers contend, it is only prudent to maintain more than the minimum legal reserves during the

Despite the bankers' protests, Secretary McAdoo today evidenced strong inten-tions of continuing his campaign against money hoarding. Occasional additions to his "blacklist" are planned. He is re-ceiving many letters commending him for "showing up" the banks guilty of hoarding and demanding excessive in-terest. Some of the letters cite instances of alleged extortion and refusal of credit State banking commissioners of many States are also promising co-operation. The list given out by Secretary McAdoo enumerated some of the national banks in each State of the Union which are carrying reserves largely in excess of the legal requirements, as shown by their reports to the Comptroller of the

Currency as of September 12. "Each one of the banks in this list is required by law to carry a reserve of only 15 per cent. The reserves they are holding range from 25 per cent. to 74 per cent. If the large amount of loanable funds that is kept from active employment, as indicated by these figures, was invested in commercial or agricultural paper, or loaned on proper security, the present situation would be greatly im-proved," said Mr. McAdoo. Some of the national banks in this city were included in the initial list.

## FINANCIAL BRIEFS

Philadelphia's share of \$8,000,000 to the \$100,000,000 gold pool to relieve the foreign exchange situation has been oversubscribed. This statement was made today by Levi L. Rue, chairman of the Clearing House Committee. Mr. Rue said that replies were still coming in from institutions to which the letter of the Clearing House had been sent asking subscriptions and that more replies were expected, as in some cases the directors of the institutions had not yet met to act on the matter.

C. A. Higbee, secretary of the Tonopah Mining Company of Nevada, today sent a letter to stockholders explaining the com-pany's interest in the Panama Mining Company. The letter says that the Tonopah Mining Company has an option on the property of the latter company, which is located in Nicaragua and has until next February to decide whether it will take the property. In case the option is exercised a new company, to be controlled by the Tonopah Mining Company of Nevada, will be formed to take title to the property and operate it.
