

CROSS CONTINENT AFTER FOR TWO DAYS OF CYCLING

"Bob" Lawson and "Chris" Hansen, of New York, Complete Ride From Coney Island to San Francisco.

NEW YORK, Oct. 5.—After a total of 45 actual riding days, the bicycle team of "Bob" Lawson and "Chris" Hansen, members of the Century Road Club Association, have reached San Francisco, Cal., for which point they left Coney Island on the afternoon of July 25. Lawson and Hansen applied their division last week on their arrival at the Golden Gate on September 23, having covered a distance of 4,000 miles, over all kinds of roads and in all kinds of weather. The partners were held up by rain and accidents for several days. The trip to the Coast was merely for pleasure, but on their return journey the New York riders will attempt to break the transcontinental bicycle record of 37 days, which was established in 1896.

Clarence Carman, the Jamaica whirlwind, proved his superiority over "Bobby" Walcott as a motor-paced rider in the 40-mile match race at the Brighton Beach Motorcade yesterday. The long race was run in three heats, two of 15 and one of 10 miles. Carman won the two 15-mile heats and lost the second heat of 10 miles. In the last and deciding heat he won easily from the Georgian rider with two laps to spare.

Carman's victory in the match race was not as unexpected by those who have not seen the two riders throughout the season. The Long Islander has been improving all the while, and seems not to have reached the top of his form.

Oscar Egg, the Swiss long-distance racing cyclist, found more than his match in Reggie McNamara, of Australia, in a 15-mile tandem race at the Brighton Beach Motorcade yesterday. The Australian, who returned to the track for the first time since breaking his collarbone, won the match race in 2:08.25, recently, won a new world's mark for the distance paced in that style.

Francis L. Kramer, the American champion, lost his heat of 10 miles in a match race at one mile with Alfred Goulet, the Australian, made the foreigner appear out of his class by winning the match in the other two heats.

James Papas, champion cyclist of the New England Wheelmen's Club, improved his chances of annexing the title of "King of the Road" in the Metropolitan district, when, over the Boulevard at Grant City, Staten Island, yesterday, he captured the first two of a series of three races for the individual championship of the Interclub Amateur Cycle Road Race League.

OMAHA, Neb., Oct. 5.—John A. McNamara, of Minneapolis, lowered the five-mile motorcycle record Saturday to 25.25 seconds. The previous record was 26 seconds flat, made by Leo Stettin of St. Paul.

OKLAHOMA CITY, Okla., Oct. 5.—Two new automobile half-mile dirt track records were made at the Oklahoma City track yesterday. Eddie Herne lowered Bob Burman's record of 5:55.15 for five miles, going the distance in 5:47, and John Raimy lowered Burman's record for three miles from 3:25.25 to 3:23.25.

LYNCH LIKELY TO MAKE UP LOSS OF MITCHELL

Northeast Boy Shows Some Clever Running in Winning Two-mile Cross Country Race in 10 Minutes 30 Seconds.

appears as though Northeast High developed another Tommy Entwistle the person of Lynch, who won the mile cross-country championship of the state at the Hale & Kilburn meet Saturday in the smashing good time of 9 minutes and 30 seconds. The local boy had races as seldom won in his time as this. He should go a long way toward making up the loss of Mitchell, last season's interscholastic cross-country king, who entered Pennsylvania this fall.

The Chestnut Hill Academy football team did all that was expected of it in defeating Frankford High, 13 to 0, on Saturday. Coaches Stocking and Dickson, with few exceptions, a green squad of candidates to work with, and its development at this time will be necessary.

The University did well to hold the expected Atlantic City High boys to such a low score on Saturday. The squad has only been able to practice two or three days each week because of classes, and Coach Hager found much interest in improving his knowledge to the team in such a short time.

Edward Geiger, Temple's quarterback, was so badly injured that he was forced to remain in the hospital. He returned to his home here last night.

"Dave" Kerr, last year's basketball captain and star of the football team at Central High, will move to the University of Maryland, where he will play in any branch of sport this year.

Billiard Wizards Coming The opening games of the newly formed Interclub Billiard League, of which the country's best known players are members, will take place here Monday and Tuesday, October 12 and 13. George Sutton and Jake Schaefer, Jr., will oppose each other in this first match. The Philadelphia franchise is owned by Sol Allinger. The new 14 game has been adopted by the league, which includes among other wizards, Morringstar, Yamada, Demarest, Cutler, Cline and Cochran.

Horsemens for New Orleans NEW ORLEANS, Oct. 5.—That Joseph A. Murphy, now officiating at the race meeting at Bowie, Md., will aid in bringing many of the horsemen there to the New Orleans meeting, starting January 1, and that Kentucky horse breeders have already made known their intention of participating, was announced today by B. Renshaw, president of the Louisiana Horse Racing Association.

NEW JERSEY BANKERS WANT TRANSFER TO N. Y. DISTRICT

Object to Being Placed Under Supervision of Phila. Reserve Bank.

National banks in Northern New Jersey have petitioned the Federal Reserve Board, through the Banking and Currency Committee of the New Jersey Bankers Association, to transfer the banks of that section to the Federal Reserve District of New York. It is not likely that such action will be taken by the Federal Reserve Board, however, in view of the latter's selection of New Jersey as a banking commissioner as a clerk and director of the local reserve bank.

The arguments presented to the Federal Board of New Jersey bankers embody these features: A volume of checks drawn on any particular city is received on deposit by a bank, which shows the amount of business which is done by the community in which the checks are drawn. The commercial banks of northern New Jersey, especially those located in the large cities of Hudson, Passaic, Essex, and Middlesex counties, as a very much greater volume of business than the banks of Philadelphia, and throughout that section of the State, are almost entirely without the benefit of the Federal Reserve Bank.

The industrial enterprises of northern New Jersey, especially those located in the large cities of Hudson, Passaic, Essex, and Middlesex counties, as a very much greater volume of business than the banks of Philadelphia, and throughout that section of the State, are almost entirely without the benefit of the Federal Reserve Bank.

A considerable number of the banks in northern New Jersey at certain times in the year purchase commercial paper. This is all purchased through New York brokers, and is paid for by New York banks before being purchased.

PUBLIC UTILITIES

Valuation of public utilities will be part of the new night graduate courses at the University of Delaware. Professor Morris Knowles, director of the department of sanitary engineering, and G. W. Case, both of the faculty of the University of Delaware, will give the instruction in "Valuation." The faculty also includes Paul M. Lincoln, consulting engineer of the Westinghouse Electric and Manufacturing Company; D. S. Crawford, general superintendent of motive power of the Pennsylvania Railroad lines west of Pittsburgh; Professors L. E. Endeley, R. T. Stewart, J. Hammond Smith and others.

Between now and the first of the year the Ephraim and Lebanon Traction Company will be operating approximately \$150,000 in electrifying its railway. The overhead system will be used, two new power houses built, the line improved and new equipment purchased.

The Public Service Railway in Camden has asked for a franchise on White Horse pier, linking the Haddon Heights line with the Haddon Township line. The plan is to shorten the route of the line to Camden, and thus cut the running time between Camden and all places on the route to Camden.

The Boston Consolidated Gas Company has petitioned the Massachusetts Gas Commission for authority to issue \$1,024,300 additional stock for the purpose of purchasing the franchises and property of the East Boston Gas Company.

EASTERN COLLEGE SQUADS FAVORING OPEN-STYLE GAME

Football Coaches Are Testing the Plan of Using Forward Passes From Mass and Wide Formations.

That the Eastern college and university football teams are testing the so-called open games with its many variations was shown in numerous games on Saturday. Forward passing from both ends and deep formations were almost as common as line plunges and end runs. The teams of both the large and small institutions used the play repeatedly, the success or failure of the play being marked by the method of deploying the offense.

The upset which marked the play among the major eleven cannot, however, be charged to this style of play, which Eastern coaches have heretofore been loath to adopt except as a secondary form of attack. The defeat of Pennsylvania by Franklin and Marshall came as the result of the powerful offense and defense, coupled with ability to follow the ball and to profit by the Quakers' errors. Colgate's triumph over Cornell was due to much the same condition, although the winning score was made on a short forward pass following a return run of a kick-off. Fumbling by Cornell at critical stages nullified many yards gained by the Ithaca team in straight play.

Strength and weakness developed in unexpected quarters. Princeton found Bucknell harder to defeat than a week ago. Virginia Tech Yale a surprising tussle, the Southerners showing an all-around knowledge of the game that caused the Elis uneasiness until the final whistle. Harvard, on the other hand, outplayed the Springfield Y. M. C. A. College, one of the first of the Eastern institutions to develop the open game, using the tactics that have made the "Teachers" formidable for several seasons. Captain Brickley kicked his first field goal of the season and scored two touchdowns. The Crimson play, both offensively and defensively, was shown so early in the season in several years.

With one or two exceptions, the development of the Eastern Eleven was demonstrated to be ahead of last year at this time, and large scores were frequent. Harvard, Dartmouth, Syracuse, Brown, Pittsburgh and the Army all rolled up totals that range from 30 to 50 points. Eastern point honors went to the Washington and Jefferson team, which crossed the century score mark against Dickinson, indicating that the 1914 eleven has the same power and dash that so distinguished the team last year.

LATONIA'S BIG MEET LATONIA, Ky., Oct. 5.—Applications for stable room to Manager John Hachmeyer, the last few days indicate there will be a record-breaking number of horses at the Kentucky County Course this autumn. The meeting at Latonia closes the racing season of 1914, with 13 days of racing beginning on Monday, October 12, and ending on Saturday, November 1.

Visible Grain Supply NE WYOMING, Oct. 5.—The visible supply of grain today was 1,000,000 bushels, 2,136,000 bushels; increase, 2,000,000 bushels. Corn, 6,000,000 bushels; increase, 200,000 bushels. Oats, 2,300,000 bushels; increase, 2,000 bushels.

FINANCIAL SITUATION HOME AND ABROAD AS NEW WEEK OPENS

Situation Generally In Better Shape and Recent Developments Point to Early General Resumption.

With the beginning of each week there come signs of improvement in the financial situation generally, and more optimistic talk of an early readjustment which shall permit of a reopening of the country's stock exchange. The export situation is in unusually good shape, with the volume of shipments from this country breaking records in many instances. This naturally reflects a better condition among the industries. Textile mills are being put back to a normal basis, because of the increasing demands for finished products from foreign countries that heretofore dealt entirely with Germany, and increased inquiries for iron and steel products have led to a belief that this industry is on the verge of an important revival.

Our foreign credit position remained as it should; there has come a loosening in the money market which forecasts a decline in rates; the deficits in reserve in the National banks, particularly in New York, are creating curbing of the money market, and some of the large banks are preparing to retire quantities of clearinghouse certificates.

Again, there is every confidence that the application for a 5 per cent. freight rate increase by the Eastern railroads will be granted by the Interstate Commerce Commission following the rehearing on October 15. Should the increase be allowed, there would be less fear of heavy foreign selling of American securities, and the reopening of the money market, since there would thus be imparted to the rail issues a greater stability that would induce foreign holders to retain such investments. The reopening question will undoubtedly be settled in London. There will probably be no move made by the New York Exchange until after it has been told of the British position. A London cable announced today that the middle of November is being talked of there as the probable date of an official resumption of trading.

The new Federal banking system is expected to begin operation October 15. Secretary of the Treasury McAdoo announced today. It will be started in the three Federal reserve districts of New York, Chicago and St. Louis, and will be put into operation in the other nine districts.

Secretary McAdoo expressed the belief that the complete list of Class C directors will be announced before the end of this week. It will not be necessary for the directors to obtain permanent headquarters at once. They can perfect their organizations and begin operations in temporary buildings, making definite arrangements after the installation of the new system.

Under the Federal reserve act the system can be put into effect at the discretion of the Secretary of the Treasury.

FINANCIAL BRIEFS

The manner in which the State of Tennessee floated a loan of \$1,000,000 in New York has become known. Secretary McAdoo, it is understood, deposited \$1,000,000 of the Federal Government's gold coin with the National Park Bank of New York, and the bank, as soon as the money was received, made the loan. Bankers say that the action of the Secretary of the Treasury was without parallel, and that it virtually amounts to an indirect loan to Tennessee by the Government.

John H. Mason, vice president of the Commercial Trust Company, as chairman of the Executive Committee of the American Bankers Association, will make a report of the work of the committee for the year on the first day of the convention of the association in Richmond, Va., which begins October 13 and continues until the 16th.

Levi L. Rue, president of the Philadelphia National Bank, is spending a few days' vacation out of town.

The average ratio of reserve of State banks and trust companies of Maryland and Pennsylvania was 10.73 per cent., according to a summary issued by Bank Commissioner Downs.

The Republic Iron and Steel Company has been ordered to stop work on the Youngstown plant for repairs. The company will spend about \$10,000 on improvements.

NEW YORK BUTTER AND EGGS NEW YORK, Oct. 5.—Butter firm, receipts, 100,000 lbs. Market steady. Creamery, 100,000 lbs. Market steady. Eggs, 100,000 lbs. Market steady.

BANK CLEARINGS Bank clearings today compared with corresponding day last year as follows: 1914. 1913. New York \$294,520,544 \$244,437,554 \$235,300,000 Boston 17,158,201 18,622,500 18,112,113 Baltimore 6,151,617 6,215,705 6,158,018

THE MONEY MARKET Call. Time. Philadelphia 6 98 6 98 Boston 6 98 6 98 Chicago 6 98 6 98

DIVIDENDS DECLARED Associated Gas and Electric, regular quarterly dividend of 12 cents on preferred stock, payable October 15. P. A. Pure Realty Company, special dividend of 15 cents on preferred stock, payable October 15.

WAYS TO STERILIZE WATER Niagara Falls First City to Try Ultra-Violet Process. Niagara Falls will have the first municipal ultra-violet-ray sterilization plant in this country. Contract negotiations were consummated recently for a \$-lamp installation. Mercury vapor lamps, protruding into channels through which water will flow, are to be used. The ultra-violet rays from these lamps have the power to kill the bacteria in the water. There will be seven lamps in each of five concrete canals, although it is estimated that 25 lamps will be required to handle the capacity of the plant, 15,000,000 gallons daily.

Enormous Grain Crop in France PARIS, Oct. 5.—France's grain crop this year has exceeded all expectations, according to an announcement by the Agricultural Department. It is estimated from 6,000,000 to 7,000,000 quintals (2,000,000 to 2,500,000 tons).

SUGAR PRICES CUT NEW YORK, Oct. 5.—The Federal Sugar Refining Company has cut its refined sugar prices 10 cents, from 10.00 to 9.90 cents per pound.

WHEAT AT CHICAGO OPENS STRONGER AT AN ADVANCE

Fair Accumulation of Buying Orders Influenced by Strength Abroad.

CHICAGO, Oct. 5.—Wheat was stronger this morning, starting at an advance of 1/16c a bushel. There was a fair accumulation of buying orders, influenced by strength abroad and expectations of a further export demand. An official announcement by Russia said that country would permit exports to the Allies and also would permit shipments to neutral countries for home consumption.

Corn was strong at an advance of 1/4 to 1/2 cent a bushel on unsettled weather in the West. The buying was scattered. Oats were firm at an advance of 1/16c a bushel. The demand was good.
