WHO WORRIES

Grievance-Useless Worrying Over Past Mistakes Unprofitable.

The average girl is much too inclined to worry. It is all so futile and useless, too, once the deed is done, and done irrevocably. Why worry over past mistaitou?

The past is so dreadfully apt to hamper one's future. This is a great mistake. Wherever possible a mistake should be rectified and every atonemout made, but

beyond that it is foolish to worry. One sees on every hand girls worrying over soilt milk that can never be gath-

over split milk that can never be goth-ered up scaln. They are only wasting their time and energy that could be bet-ter employed in other ways. No human being is perfect, and we are sil prone to error. There is a certain type of girl who must always have some-thing to worry over, or else she is downright miserable. She is very far from right miserable. She is very far from being a pleasant companion. No one seeks her society, and yet, like the poor, she is always with us. She literally finds her happiness in being unhappy. This may sound rather "Irish." yet it

The girl who is ambitious and strong-The girl who is ambitious and strong-minded will spend just the right propor-tion of her time in remedying past mis-takes, and then will turn to a fresh day, determined to make the best of it and to start all over again. It is a sure sign of weakness of character to dwell unduly and unprofitably more to dwell unduly unprofitably upon past errors of judgment.

Figures showing that three-fourths of the children between 14 and 16 years of age applying for working certificates in July and August of this year were physi-cally unfit for the occupation at which they planned to seek employment were submitted today to the Board of Educa-tion in pamphlet form by the Pennsyl-

vania Child Labor Association. Accompanying the pamphlet is a strong plea that the Board of Education continue the work of examining the children at a atimated cost of \$1100 a year. The ex-August were paid by the Child Labor As

ociation. Examinations of all children between the ages named were made by Dr. W. H. Blakeske, medical inspector of the divi-sion of hystene, of the Child Labor Association, and six physicians from the division of medical inspection of public schools, of the Burcau of Health, detailed ov Dr. Walter S. Cornell. The work was lone at the Bureau of Compulsory Education, 1522 Cherry street. But one-fourth of the 3954 children ex-

amined were found to be physically able to work. Eye strain and bad teeth were most numerous reasons for refusal of certificates. When these defects we remedied the certificates were granted.

There is a great preference shown to-day for the new fabrics that really have a warm look when the top coat is in The new wool velours, for instance, has many points of recommendation. It is warm and not over heavy and it lends itself to the new shades very much after the delightful fashion of velvet.

A coat cut on the lines of the one pictured today would be a sensible ac-quisition as a motoring coat or for travel by land or sea. The top coat is practically a neces-sity and not simply for motoring and sports. In this climate a heavy coat suit is undesirable, yet the sudden drops in the temperature make an additional coat travel by land or sea.

THE TREATMENT

OF DAMP HANDS First impressions are most important. In the welcoming of the stranger within our doors it is a dreadful thing to greet him with a cold and clammy hand. Such a greeting has a damping air about it. Yet the possession of such a hand is only too common.

The hand is full of tiny nerves and muscles, which respond to the call of any nervous excitement. The latter gives rise to a damp and profuse perspiration in the hand. Another cause of the clammy hand is imperfect circulation, and to remedy this plenty of exercise in the open alr should be taken. The value of massage cannot be over-

But when it came to Evelyn Neshit Thaw, they all knew all about her. I think this shows where and how American girlhood at present gleans her ideals."

"The only remedy for this state of af-fairs," continued she, "Is to be found in the creation of a new public sentiment. Law may be evaded, but nothing can withstand the force of public sentiment. I want the rich girl to help the poor girl, and the factory owner to care for the welfare of his employes, and the people of America to rouse themselves to the assistance and help of these young girls, remembering that they are the mothers of the future generation.
