

ELECTRIC VEHICLE MEN TO DEVELOP THEIR INDUSTRY

Discuss Plans for Future at Closing Session of Annual Convention—Please d With Mayor's Suggestion.

The development of the electric motor and its future possibilities was the principal topic of discussion at the closing session of the fifth annual convention of the Electric Vehicle Association of America in the Bellevue-Stratford today.

Mr. Baldwin said that Philadelphia may well be considered the cradle of the electric vehicle in modern form. Morris and Salome, of this city, built a storage battery automobile in 1891, and won the gold medal in the Times-Herald automobile race in Chicago in 1895 for the best showing made for safety, ease of control, absence of noise, vibration, heat or odor, cleanliness and general excellence of design and workmanship.

DU PONT PLANT BUSY IN MANUFACTURE OF SMOKELESS POWDER

Men Working Day and Night and, Despite Denial of Owners, Rumor Hints of Possible Shipments to Europe.

PENNSBORO, N. J., Oct. 21.—Things are booming down at Carney Point. Powder makers who have not been particularly busy lately are busy now. Powder of the smokeless variety is being made in immense quantities; sometimes the men work at night. The plant at Carney Point is the biggest in the world. It is a part of the big Du Pont concern.

It has only been recently that this plant has been so busy. Why it is so busy now no one will say. Workmen are just as mum about such things as are the men in charge. They know that it is a lay force and a night force at times; but that is all they do know and all they care to know.

Rumor has it that the other smokeless powder plants of the company are equally busy. Perhaps so as to be well prepared in case it should get into a war with some other nation, but there is a vague suspicion that this powder may find its way into some foreign gun. Just how is another question. The Du Pont Company will not ship powder to a foreign nation at war, for powder is contraband and to ship it would be ill-considered. Rumors that the Du Ponts were preparing for big orders were denied by the firm some time ago. Since then it was declared when the foreign shipments were mentioned that it would be impossible to furnish smokeless powder even if a way was found, for it took six months to manufacture smokeless powder and have it in condition for use.

STRIPES OF HONOR RIPPED OFF JACKET OF ACCUSED SAILOR

Charge of Robbery Ends Years of Distinguished Service for Member of the Missouri's Crew.

A former sailor in the United States navy, once lauded by his superiors and admired and respected by his fellows, but now bowed with disgrace and stripped of his honors, stood in the prisoner's dock in Central Station today, accused of assault and battery and robbery of a citizen.

He is Joseph Barsotti, 198 Writcheswood avenue, Chicago, late of the battleship Missouri, now lying at anchor at the Philadelphia Navy Yard. The victim of Barsotti's alleged assault, D. Lynn Magruder, was seriously ill at his home in Bryn Mawr. He was represented in court today by a brother and an attorney.
