WASHINGTON, Nov. 2 - According to the statistics of the Bureau of Foreign and Domestic Commerce the value of foodstuffs sold abroad in September was \$70,457,589, nearly double that of September a year ago, when the total was \$33,786,240.

It is of the greatest importance that legislators recognize this and let us have legislation that will help instead of hindering busi-ness." The war demand for wheat brought exports for the three months ending with September to the highest point ever reached in any corresponding period. Total exports, including flour in terms of wheat, in the three months aggregated \$9,250,000 hushels, compared with 53,000,000

bushels in that period a year ago. For September exports of flour were about normal, but the wheat sold abroad cear ago, an average increase of over 515 was more than twice that exported during the month. The wheat total was 55,000,000 bushels. BOY SCOUT ARMY

ROUSES PATRIOTISM

OF YOUNG HEARTS

What an army of little experts the Boy couts are, anyway! If you saw them out at the Ball Park Saturday afternoon, ou won't think of asking "Why?" Like industrious little brown-clad ants, 550 of liem, perfectly disciplined, perfectly trained, dotted the field here, there and

verywhere performing their various "stunts," and the hearts of 2500 mothers thrilled with pride as they did it. Here is one uniform that any boy may don without causing his mother's heart to twinge with grief.

And among the thousands of schoolboys the assembled in the gallaries to watch the field-day exercises was there a single one who did not envy the scouts on the field and who did not make the secret resolution that not another year should phase before he, too, should be stalking around with military tread, an army slouch hat fixed rakishly on one ear, his manly form encased in a snug-fitting backle area chakl suit?

"Hey, mister," said one little chap, wite ould not have been more than 6 1 how nuch does it cost for a fellow to join the And the "mister" so addressed, who was

one other than an orderly intent on the islness of the day, halted in his tracks answer the question

"Well, sonny," he said, "the dues aren't uch. Any boy could make those, about or 50 cents a year, I should say, It's ne uniform that costs the most, \$4 and ething is the price."

The little fellow sat down, and, chin in and, constituted a ways and means com-litice all by himself, and pondered just ow he was going to get that \$4 and nysterious something which it is neces-ary to have in order to belong to the grand and glorious order of Boy Scouts. Meanwhile the events of the day were izes, all the way from the little tacker knee high to a grasshopper, who wielded the baton, up to the man-sized scout who carried the drum, arruck up the "Star-Spangled Banner," while a battalion of scouts over at a far end of the field slowly hauled Old Glory into the autumn HKY

It was what the noveltists call a big moment. The most cynical, the most patriotic, even the most rheumatic on-looker, got to his feet. There was no cesisting the magnet of the Stars and tripes being raised by Boy Scout hands the tune of Boy Scout music.

WHAT THE BOYS CAN DO.

But raising the flag and playing the hand are but two of the many things in the long category of a Boy Scout's accomplishments. In fact, after a few hours spent at the fourth annual field day exercises, one is apt to wonder if there is anything really useful that they cannot do. They can chop a log of yellow pine in as clean as a whistle in less time than it takes to say Jack Robinson: they can build a signal tower high into the air in the twinkling of an eye, and without so much as uttering or an eye, and without so much as uttering a word they can communicate the most complicated messages by the mere waving of a few days, which constitutes what the initiated call the semaphore code.

They can move a whole camp, pitched touts and all, across streams and over the campaign against the candidate, which he has refused to deny: That a \$1,000,000 "slush fund" has been much vauited efficiency to shame. Bright Outlook in West

Henry T. Scott, who was president of the Union Iron Works of San Francisco when that concern built the Olympia and the Oregon, and who is a director of the Panama-Pacific Exposition, sees a great deal of hopefulness in the business outlook generally.

Notwithstanding big failures on the Pacific Coast before the war, involving many millions of dollars, and the fact that the English are not buying California apples as usual, Mr. Scott says the situation is very good out there, and he asserts that when the Panama-Pacific Exposition opens on February 20 it will not owe a dollar. He looks for a big s'tendance from all over the United States, arguing that thousands of persons who might have gone to Europe will make the transcontinental trip instead.

"All our crops on the coast-wheat, bar-ley, fruits, and, I may add, salmon, for ion is a regular 'crop' with us, are have been excellent," said Mr. Scott at the Ritz-Carlton yesterday. ine in which we have been hit is the crop was good-magnificent, in

That. act. But you see, our apple crop has practically all been going to England that may atrike you as old, but it is a fact that of the apples grown in the Monte district, which I think must amount to something in the neighborhood of 2000 carloads, all have been taken by England in the past and if you went down there and tried to buy a box, it would have been impossible. How far the regular shipments have been going off I don't know.

Fine Prospects for Panama Fair

YELT, "Out our way we had had very had onditions before the war came on. There was the 'Borax' Smith failure, and then there was the Oakland Railway business, which had to go into the hands of a committee. The Northern Electric Railroad, the line from Sacramento to Marysville, got into trouble, and the Natoma concern, a gold-dredging and land-recla mation project. In all, the losses probably totaled some \$40,000,000.

However, the crops have been so good that the country itself is in good con-dition, and the fair is going to open unhar the heat of sumplices. It would not avraptise me if the attendance would be blagger than it would have been but for the war, and I cannot see anything than a great success for the undertaking.
