# Statement Made That Matter Will be Considered at Regular Meeting on Tues-

The most important announcement since the close of the New York Stock Exchange on July 30 was made at the Stock Exchange today in the statement that the beginning of bond trading at minimum prices will be considered by the Governing Committee at the regular meeting on Tuesday, and that an early date will then be fixed for the resumption of this busi-

Stock Exchange authorities said that this means difficulties which existed and which prevented the carrying out of ar-Fangements to begin bond trading today have been removed, and that there is now no obstacle to the resumption of bond 4rading under restrictions made by the suvernors.

governors.

This news had a marked effect on sentiment throughout the street, as it was taken as evidence that fears of important obstacles to progress toward a complete reopening of the exchange are groundless. The next step to be taken must be in allowing restricted trading in stocks.

There was little change in conditions in There was little change in conditions in the various open trading groups in the half day with which the week ended.

The attendance at the Yale-Harvard football game made the absentees from the street so large in number that business was quieter than at any preceding time during the week. Demand sterling was quoted 4.88 and

### BANK CLEARINGS SMALLER

Total This Week Fell Off 15.9 Per Cent From Last Year.

Payments through the banks of the country as reflected in the bank clearings continue to make a decidedly unfavorable comparison with those of a year ago, although at some points there are indications of improvement. The total this week in the leading cities of the United States, according to Dun's Review, amounted to \$2,443,353,227, a decrease of 15.8 per cent, as compared with \$2,298,781,142 of the same week last year and of 25 per cent. as compared with the corresponding week in 1912, when \$3,259,091,435 was reported. New York city continues to show the most pronounced contraction, the losses at that centre being 28 and 32.5 per cent. at that centre being 20 and 32.5 per cent, respectively, in the comparison with the two immediately preceding years. The aggregate of all cities outside New York is 9.2 per cent. less than in 1913, and 10.8 per cent. smaller than in 1912, with the majority of all centres included in the statement contributing more or less

to the falling off.

The activity in the grain and flour markets and generally prosperous condi-tions in the grain raising regions of the West are reflected in some gain at Kansas City and Minneapolis, while a ten-dency toward improvement is also in-dicated by slightly more favorable re-turns than for recent weeks by San
