Pavlowa and her partner, Ivan Clustine (mattre de ballet of the Imperial Opera Houses in St. Petersburg and Moscow, and at the Paris Grand Opera), regarded as Europe's foremost masculine

chasse. Rightly employed, it should come immediately after the polka-variation, which, in its turn, follows the forward and back plain steps and the side-glide. At the conclusion of the polka-variation figure the dancers are in a "semi-poss", resulting the dancers are in a "semi-poss", resulting the dancers are in a "semi-poss", resulting the dancers are in a "semi-poss". tion figure the dancers are in a "semi-open" position, the davalier having his right arm partially about his lady's waist, her left arm resting right fore-arm. The cavalier's left hand holds his lady's right, the arms being held before them a triffe below shoulder-height. With the lady standing on her left foot, her right being lifted several inches above the floor in front of her, and the cavaller

the floor in front of her, and the cavaller maintaining his poise on his right foot, the left being lifted after the manner of the lady's right, the dancers now prepare

for a cross-over.

In this figure the cavaller must pass behind his lady, from her left to her right, and after executing a chasse step on three counts, he must return again to her left side ready to continue the dance with another figure.

another figure.

The lady, who remains in front of her partner, moves only a few inches as the cavalier changes his position. She must first step a trifle away from him toward her right, then again toward her left, and, thirdly, toward her left. During this maneuver she must release her cavalier's right arm with her left, and be able skilfelly to extend it to him over her here. fully to extend it to him over her head to her right at the proper moment. Beginning the explanation of this cross-

raised left hand.

The illustration herewith reproduced, for which I and my partner posed, shows the correct attitude of the dancers in the cross-over chasse at the completion of the fourth count, and during moments of the four succeeding counts. Polsed on their left legs, the dancers first raise. By ANNA PAVLOWA

ARTICLE IV.

The fourth division in my standardization of the One-Step is the cross-over large. Pichtly employed it should come where Pichtly employed it should come.

Rightly employed it should come.

On the fourth count the cavaller pre-pares to recross behind his lady to the position he occupied at the start. Eight counts have been now consumed, four for changing and four for the chasse itself. The first count again recurring the cavaller takes a short step to his left to go behind his lady on his left foot. Count "two" calls for another very short step on the right foot, and counts "three" and "four" equally short steps to the left on the left and right feet.

to the left on the left and right feet.

The lady's part of this evolution calls for her (at the beginning of the first cross-over change) to turn slightly to her right and take the tiniest possible step with the right foot on count "one." She at the same time releases her own and her partner's left hand and right arm, and on count "two" takes another little step (it need not be over two inches) with the left foot. With count "three" the lady points the toe of her right slipper, and on count "four" extends her right arm to her partner's, just at his waistline, and raises her left over her head: over her head:

Counts "five," "six," "seven" and 'eight' are for raising and lowering of the knee, as has been explained. The next four musical counts are for the as-suming of an "open" position, with a dis-tance of 12 inches between the dancers, the cavalier on his lady's left, holding her left hand. The lady takes on count "one" a very short step with the right over chasse, let me first start with the cavalier. From the attitude already explained he removes his hand from its place at his lady's waist line, drops her right hand with his left and, turning to his right on his right foot, takes a step of about six inches with the left foot, all these movements being practically
