MEXICO

Mexican life continues to be highly seasoned, not only with the spice of variety, but with chile con carne, tabasco, dynamite and all the other red hot condiments.

The complications which threatened to involve us have gradually been adjusted, and, helped out by the pressure of other war news, Mexico has dropped out of the magazines for several months. Since the beginning of the year, however, there has been a revival of magazine comment on Mexico, occasioned in part by the final withdrawal of our troops from Vera Cruz and by the President's references to Mexico in his recent Indianapolis speech

Of 10 current magazine articles commenting on Mexican affairs, none is particularly optimistic, nor do they give unqualified indorsement to the situation. Three are mainly neutral in tone, four strongly oppose the Administration policy in Mexico and three indorse it, though asking questions which they leave unanswered as to where we are coming out.

Summing up events of the last month in Mexico, an editorial article in the Review of Reviews says (1):

Mexico, an editorial article in the Review of Reviews says (1): The President's sympathles are for the great mass of plain people in Mexico who, through revolutionary struggle, may come into a heritage that has hitherto been denied to them. There is much to be said for this polley. On the other hand, it is hand to follow the confused and chaotic movement of military factions in Mexico and discover anything that looks much like a war for hu-man progress and welfare. Yet out of it all one must believe that there will come land reform, better institutions for justice, mod-ern kinds of taxation, general education and national government resting upon broader and deeper foundations. One thing is quite certain, and that is that no important factor or ele-ment in Mexico has desired our interference, and that with our present army we could not have gone into Mexico to restore order and reconstruct the country. We should have been obliged to create a harge volunteer army and would in all like-lihood have embarked upon a war of fright-ful bloodshed and viciasitudes. General Eulallo Guiterrez, who had been appointed Provisional President on November 2 by the convention of the Constitutionalist leaders, was deposed by that same conven-tion on January 17 at the instance of General Koque Gonzales Garza, who had formerly been secretary to President Madero. Nobody sup-poses that he will hold the place for more than a few days or weeks. It was reported that the followers of Villa were preparing to abandon the city of Mexico, and that the Carranza faction would perhaps be allowed to regain possession of the capital. Villa was said to be planning for a northern Republic, which would include the States lying along the American border. It does not seem likely that peace and prosperity for Mexico are to come by the process of partititioning the country, though even that is a nonshibu each. that peace and prosperity for Mexico are to come by the process of partititioning the country, though even that is a possible solu-tion. Villa's choice for the civil headship is General Felipe Angeles, whose relative fitnes seems to be acknowledged.

What Is Watchful Waiting?

In "Our Duty in Mexico" (2), the Independent reaffirms its indorsement of the President's policy, but admits that it is puzzled: Ident's policy, but admits that it is puzzled: From the beginning of his Administration we have supported the President's Mexican policy. We have done so because we be-lieved it to be founded on a perfectly sound basis. We believe with the President that every people has the right to determine its own form of government. We sympathize with the aspirations of the Mexicans to rule themselves. We hope that they will ulti-mately achieve political liberty. We would not have the United States interfere with their endeavors to work out their own poavors to w

ing port of Vera Crus, we deliberately drova Huerta out of Mexico and with equal deliber-ation brought in Carransa and Villa in the expectation that they would compose the troubles of unfortunate Mexico."

On "Shooting Things Up"

Although dealing with the broader topic of militarism, Walter Lippmann, in "A Cure for Militariam" (5), reminds his readers of an explanation of the entire Vers Crus incident which removes responsibility from the President's shoulders. On a Maine walking trip last summer, Mr. Lippmann found an old German sergeant in charge of an isolated fort:

I wondered what the man thought he was doing, whom his gun was almed at, and how he regarded the civilization he was trying to defend. It seemed that Bryan occupied him more than anything else, and what he de-scribed as the blithering nonsense of the A. B. C. mediation with the good chance missed of "cleaning up Mexico." And then he taiked of women and drink with what seemed more of anticipation than realization. I think of him when people talk of mill-

of anticipation than realization. I think of him when people talk of mili-tariam in the United States. If you add to the humble men like him a mass of officers who spend so much of their energy over war games, you do undoubtedly creats in the country a highly organized vested interest which would press and press upon the gov-ernment, and in time of crisis might give just the fillip needed to precipitate war. There is fairly good reason for supposing that the action at Vera Cruz last spring was forced upon the President by a naval officer at Tam-pico, who made demands upon Huerts and committed the Government in such a way that Wilson could not refuse to support the demand without demoralizing the discipline of the navy. of the navy. Apologists for the army need not be sur-

Apologists for the army need not be sur-prised at our civilian fears, so long as they talk of a people like the Mexicans as one officer did to the Academy of Political Sci-ence: "They seem to have only two emotions above those necessary for racial preservation —fear and the joy of destroying. Where the occasion would seem to call for anger, joy, resentment, playfulness or hate, the average mean smashes windows, preferably those of peon smashes windows, preferably those of plate glass." The insufferable stupidity of a remark like that, and the whole outlook upon life which it betrays, is a very good justifica-tion for our desire as democrats to keep the military man thoroughly subordinated.

The Widow in Town Topics is always violently anti-Administration, and characteristically so on the Mexican situation (6):

tically so on the Mexican situation (6): If we want to establish an end to the long-drawn fracas that sends neutral bullets on deadly missions across to our side, why not deputize our cavairy to go over and scatter these outlaws? To scatter outlaws is not an international problem, and such scattering would be an object lesson. The situation would be humiliating if Europe should pause between battles and demand that the United States protect foreigners in Mexico.

their endeavors to work out their own po-litical destiny in their own way. Mr. Wilson has set up watchful waiting as the keynote of his Mexican policy. But he has repeatedly, though spasmodically, acted in quite another way. As one result of his actions, as distinguished from his beliefs, 17 American fightling men died and more than 100 Mexicans have been killed by American arms. As another, the American navy has captured a Mexican city and the American army has ruled that city for months. As another, three great South American powers have intervened to save us from war with a Mexican Administration. Is all this watch-ful waiting? An article on "Mexico and Human Liberty" leaves with the reader several unanswered

leaves with the reader several unanswered

leaves with the reader several unanswered questions (3): At Indianapolis the President indicated broadly but clearly his attitude toward Mex-ico—one of complete and scrupulous absten-tion. The President is assuredly right in giving to the Mexicans the utmost practic-able opportunity of recovering their self-possession and of establishing some kind of political order. He is right in sympathizing with their devotion to national independence. Armed intervention by this country in Mex-ico would bring with it consequences, hur-dens and risks which might be more costly to the American than to the Mexican people. But is the President wise in serving notice on the Mexican generals that no matter how such as the President wise in serving holde on the Mexican generals that no matter how wantonly they fight among themselves, their fighting is consecrated in the name of human liberty and is safe from outside interference? Are the Mexicans not much more likely to

Are the Mexicans not much more likely to compose their differences in case they are asked to recognize the existence of an ulti-mate international police power and of its possible application to their dissensions? And is the President wise in believing that the European nations and the American peo-ple will continue to share his attitude of en-tire responsibility for an indefinitely perpetu-ated condition of anarchy in Mexico? There is much to be said for "watchful waiting" as a tentative Mexican policy, but not even the most reckless passion for the word liberty can justify its transformation into an immaculate and absolute dogma.

What the Ex-Presidents Think

It is not to be expected that our two ex-Presidents, Mr. Taft and Mr. Roosevelt, should take a sympathetic view of anything President Wilson does. They differ too funda. mentally, in temperament as well as politics. They have not, however, hesitated to express their opinions, and they are quoted in an article.
