Otherwise there was little worthy of discussion during the greater part of the session. Business was on a very much restricted scale. Even United States Steel was stagmant, only 10 shares changing hands in the first hour, while neither Reading nor Lehigh Valley appeared on the tape during that time. There was a drop of a point in Baliwin Locomotive preferred on the sale of 50 shares. In bonds there was just a little doing, as in stocks, but the under-little doing, as in stocks, but the under-tone was firm. Comment among dealers was generally optimistic, however, sentiment baying been helped by the suc-cess of the New York State bond sale. The earnings of the United Gas Im-provement Company for 194 proved to be about as expected. While the troubles in Kansas cut into profits, sales of securities in more than made up for this loss and the showing as a whole in such a period of depression may be regarded as distinctly favorable. The stock was not much affected, however, and ruled irregular.
