OLD-FASHIONED SCENES FROM THE MAPLE SYRUP BELT IN VERMONT WHERE A LATE WINTER DELAYED THE CROP. The Green Mountain State's gathering of her toothsome syrup product was more than two weeks late this year on account of harsh weather. These pictures have just come from a famous grove in the northern part of the State where snow clings to the ground till spring is far advanced. The first picture, on the left, shows some New England youngsters testing the sap, a proceeding which many old New Englanders will remember with relish. The recent photograph shows the tapping of trees and the third the drawing of a tap.
