# INVADERS BEATEN BACK RUSSIANS IN CARPATHIANS **ON CARPATHIAN CRESTS** EAST OF USZOK PASS

Violent Assaults on Heights Dominating Hungarian Terrain Halted by Furious Counter Attacks.

Russian pressure in the Carpathians, east of Uszok Pass, has been broken Austrian counter-assaults, the Vienna War Office announces. Admission is made that the foe has heavily reinforced his infantry in the Opor Valley, south of Tuchoika.

The recently launched German drive into the North Poland government of Kovno has been checked at the Dubissa River. Petrograd announces that the forces rushed to the defense of Kovno city and province have taken the offensive and that a violent battle has opened in the angle formed by the Niemen and Dubissa Rivers.

In the Ypres region, the British maintain that they still hold the positions retaken by them. Paris reports that the French captured two lines of German trenches north of Ypres and advanced their lines nearly a mile.

Heavy Artillery and Infantry Attacks Repulsed, Vienna Says.

VIENNA. May 1. Efforts of the Russians to capture the creats east of Uszok Pass, in the Car-

pathian Mountains, have resulted in com-plete failure, the Austrian War Office anounced today. In the Oper Valley, south of Tuchelka

the Russians brought up reinforcements of heavy artillery to support their in-fantry. After shelling the Austrian positions the Russians launched a number of attacks against the Austro-Ger-man forces, but all were repulsed.

## RUSSIANS TAKE OFFENSIVE AGAINST KOVNO INVADERS

Furious Battle Opens on New Niemen Front.

PETROGRAD, May L

Russian troops sent to repel the German invasion of the Government of Kovno have checked the German attacks along the Dubissa River and have taken the offensive, the War Office announced today. A battle north of the Niemen River began yesterday in the angle formed by the Niemen and Dubissa and s proceeding with great violence.

The German forces, commanded by Princes Joachim and General Eichorn, have tried in vain for five weeks to cut through the Russian lines here to strike Kovno, but all attacks have been repulsed.

Invaders reported near the Courland border are characterized at the Russian War Office as raiding parties. Cavalry has been sent to drive them back to East Prussia Several villages have been fired by the

German raiders, the War Office stated today, and hundreds made homeless.

This explains the flerce action which has been going on around Koziuvka for several days, and also the repeated attacks on the Russian positions on the secondary heights south of the Beskid ridge in the neighborhood of the village

f Oroshpatak. For the Austrians it is most important to keep the Russians from the Uszok Pass railway, which runs down into Hungary. This not only is the chief line of communication for the Austrians en-deavoring to hold the pass, but it also serves to transport troops to any point where they may be wanted in a hurry.

A German aeroplane was seen hovering over the town at a height of more than a mile, directing the fire of the German guns. The aircraft was driven off. Four hours later there occurred six new ex-plosions, coming at intervals of ten minutes. One shell fell in the outskirts, the others striking the main section of the city. These shells completely razed several houses, killing 19 persons and wound-ing many others. At noon, four more shells were fired, wounding more civil-

## BRITISH LOCATE GREAT GUNS WHICH BOMBARDED DUNKIRK

German Position Shelled by Allied Fleet and Aviators.

LONDON, May 1. The Admiralty announces that the position of the German guns which have been bombarding Dunkirk has been verified by aircraft reconnaissance.

They were attacked last evening, 12 small and two large bombs being dropped. The position of the German guns was not announced, but it is believed they are located on the Belgian coast south of Westende.

A report from Furnes yesterday after-noon stated that the warships of the al-lied fleets were flercely bombarding Westende, which adjoins Lombaertzyde. The fact that the firing ceased at 3 o'clock seems to bear out the suggestion that the Allies' naval guns found the aggressor, and a number of rounds from the sea succeeded in silencing the fire. It is believed that the bombarding Ger-man guns were some of a new type of long-range artillery which were mounted on concrete platforms 17 miles or more from Dunkick from Dunkirk.

British Armies Begin Quadruple Converging Movement Upon Gallipoli Peninsula - Turks Menaced in Rear.

**OF THE DARDANELLES** 

In the face of furious Turkish attacks directed by German officers, four British armies upon the peninsula of Gallipoli have begun a converging movement against the Turkish forts defending the narrows of the Dardanelles and are pressing sturdily forward.

With the gigantic British superdreadnought Queen Elizabeth taking the lead, ships of the Anglo-French fleet have been bombarding not only the Turkish forts but the positions of the Turks on both the European and Asiatic sides of the Dardenelles. The big Krupps of the Turks have done some damage to the ships, but this was slight, according to dispatches from Vice Admiral de Robeck,

Turkish neroplanes have attacked the British position at Sara-Bara and longrange guns in the Turkish forts have been swung inland and are throwing shells against the redoubts built at night by the British and Australian troops. The foregoing information was contained in dispatches received today from Athens, Salonika and Tenados. But the official and unofficial announcements received from the transmission points on the edge of the Dardanelles' sphere of operations indicated that, while suffering severe losses, the British and French forces are making painful progress on both sides of the Dardanelles while the fleet keeps up

FACT is a real state of things. FALLACY is an apparently genuine but really illogical statement or argument.

ONE OF the greatest FALLACIES exploited by the prohibitionists is that the temperate use of alcoholic beverages impairs a man's efficiency.

YET THE FACTS prove the precise opposite. A page of this paper, set in small type, would not be sufficient to contain all the names of the men who have used liquor temperately, and who have written their names large in the history of the world. The list is formidable-inspiring! Take a few names at random. St. Paul, Pope Leo XIII, Napoleon, Grant, Raphael, Goethe used alcoholic stimulants temperately. So did Washington, Shakespeare, Bismarck, Lincoln, Gladstone, William Penn-and Penn, by the way, established the first brewery in Pennsylvania!

PAINTERS, Statesmen, preachers, soldiers, writerspresidents of this country, and moving factors in the history of Europe-alike have proven, by their life works, that liquor, used temperately, does not impair a man's ability.

THE WORLD workers of the past, no less than those who loom large today, have proven that the moderate use of alcoholic beverages has not interfered either with their mentality or their efficiency.

THE BIG, worth-while things are done by the big, worth-while men-and men of this caliber, drinking temperately, have given to the world the best in thought and deed, and have made the world better for their lives.

IS IT not a FALLACY to say that liquor destroys a man's efficiency, when History, through the men who helped make History, proves the FACT that the master minds of the world have used alcoholic stimulants in moderation!
