### MILLINERS AND MODISTES DISPLAY NEW STYLES AT FLOWER MARKET IN SQUARE

Models employed by Philadelphia modistes and milliners decked themselves in spring finery of the latest fashion today and strolled to Rittenhouse Square to lend a touch of one of the picturesque features of Longchamps and Auteuil to the Flower Market.

The pride of the designers of this city was considerably hurt by a recent report that Washington, D. C., was about to become the fashion centre of America, and decided to put forward the claims of this city by displaying today some striking hats and gowns.

The models were told to promenade leisurely about the walks of the Square, mingling with the visitors, sit at the tea tables and be as much in evidence as possible without crudely demonstrating the nature of their mission. They were to seek to lend an artistic flavor to the ocasion as regards attire.

This was the first time that models have appeared at the Flower Market.
