When Director Porter first advertised in December, 1914, for bids for the erec-tion of this station in the 38th Ward, Mr. Bottom's firm was the lowest bidder, of-fering to do the work for \$127,000. Soon after the bids were announced, a sales-man for an out-of-town marble and stone firm called upon Mr. Bottoms and inti-mated that for the sum of \$3000 he could arrange matters so there would be no hitch in the appropriations for the work. The expenditure for the erection of the building was not to exceed \$120,000, while an additional appropriation of \$30,000 was to be made by Councils for the installaof lighting, heating and plumbing fixtures.

Mr. Bottoms refused to pay the money asked for. After all the bids were in, Councils refused to appropriate the additional \$30,000. The contract could not be awarded and Director Porter was required to ask for new bids. This time mr. Bottoma' firm was underbid and the contract will be awarded today to an-

There was a stormy meeting of the Philadelphia Jitney Association today, culminating in the ejection of two of the members. The question considered was a motion to indorse the feature in the pending Jitney ordinance providing for a \$2500 bond and \$50 registration fee for operating a litney.

When Richard Costello, president of the association, called for year and nays, the members seemed divided, and a standing vote was called for. Charles Heilig, 2922 North 13th street, called on members to remain seated, thus opposing the indorsement of the bond and fee

Academy, who was recommended for dismissal by the academy authorities for using improper means in preparing for examinations, again was the target before the Court of Inquiry today. Midshipmen Moore, Sobel, Kincaid, Denny and Williams, on the stand, told of an unofficial class Neison conducted in his room the night before the examination in modern languages. Their stories varied little. They said they had been told Neison would help them and that about 15 were coached by the midshipman.

It is the theory of the Government that Neison, after knowing that the papers Moss received were the official examinations in modern languages, used them in coaching the under classmen. Nelson declares he knew they had been changed and regarded the papers just as models. The real interest centered about the additional testimony which Midshipman C. M. Reagel, the youth who wandered around the department buildings and offices with a burglar equipment, may give. He disappeared yesterday afternoon so far as other midshipmen and the public know. It is understood he is being quizzed rigorously and may go on the stand to add greatly to what he already has told.

# For Every Foot—From the Cradle to Sweet Sixteen

T HE first 16 years of your child's life represents the period that requires most care in the selection of shoes that are correct in principle and accurate in fit, since the growing foot is certain to be shaped by the shoes worn dur-

ing that time. It is, therefore, most important that your child's feet be given special attention by expert fitters of children's feet, on each occasion when buying shoes. You can be sure of this attention at the Big Shoe Store.

In our Children's Department, the largest in the city, we have an unequaled assortment of all styles, sizes and widths of shoes for every age and foot. Expert salespeople who have made a study of children's feet and their requirements will gladly advise you.

Our charge customers will note that purchases made during the last ten days of current month are entered on bills presented August 1st. If you are not a charge customer -we will be pleased to have you call at our Dept. of Accounts, Second Ploor.
