U. S. COTTON PLANTERS DO NOT FAVOR POOL

Unofficial Plan Suggested in England Liable to Hurt Prices.

WASHINGTON, July 23 .- Informal pro-

posals that British interests form a gi-gantic cotton "pool" to buy America's cotton supply are not altogether satisfactory to American cotton growers, it was learned today. Southern Senators and Representatives declared the price and not the purchaser

is the vital point. Fears were expressed that an English pool would not pay enough, even if it bought the bulk of the American product. State Department officials said such an arrangement would have to be directly

between the private interests involved. The Department was willing, however, to assist in any negotiations. The British proposal is that the Government set aside \$175,000,000 to buy Amer-can cotton which, in peace times would ordinarily have gone to England's enemies and neutrals, after which the Brit-ish would put cotton on her contraband list. It was not official, however.
