ALEXANDER'S LOW BALL REASON FOR HIS GREATNESS, SAYS COBB

By GRANTLAND RICE

Ty Cobb Says-

The most effective pitching in the game is the kind that carries control of a low ball. A pitcher with only ordinary stuff who has low-ball control is almost sure to be effective. This is the chief feature of Alexander's success. He can put that fast one around the knees, over the inside or outside corner better than any man in the game, and with the stuff he has it is almost impossible to hit him safely. A spit-baller who can break his curve well below the waist is next to un-

Another East-West Debate

Western athletes are planning another strong defense against the Eastern in-vasion at the track and field champion-ship scheduled for the first week of Ausust. Heretofore the East has maindiversion, but the West is launching its suprems effort for the coming occasion—having mobilized the finest output of talent ever developed beyond the Allegheny Range.

Seven National League clubs are planning to protest to Governor Tener that they will henceforth consider the pitch-ing of Alexander against them a "de-liberately unfriendly act." The Governor will consider the charge some time after October.
