Rain Causes Postponement of Point Breeze Event.

Clarence Carman and George Wiley did not antertain the fans in a fo-mile motor-passed match race at the Point Bresse motordrome last night. Hain again forced a postponement, but the race will be held tordight, weather permitting. The regular Thursday night program will be run off builth.

A large crowd was in attendance when the management decided that the course was too silpnery and was forced to call off the races. Carman is the present classopist and Wiley the ex-champion, and as Wiley lowered the world's mark for to miles last week, a sensational race is expected when they clash tonisht.

The Amateur Athletic Union has made an effort to defray the expenses of the best athletes. By holding sectional tryouts the A. A. U. has brought the cream of Yankes talent together. Eastern trials were held at the Harvard stadium, Cambridge, Mass., June 25, while the mid-Western meet was run on Stagg Field, Chicago, July 17. The far-Western athletes had their opportunity July 31 at the Panama-Pacific stadium. Panama-Pacific stadium.

Students of the game are somewhat at sea when a selection of the most probable sectional winner is concerned. By a comparison of the records made at the three tryouts it is found the East has the best chance to win this greatest of American einderpath classics. The Eastern athletes on form appear to have seven first places clinched. The Middle Western members have five probable championship winners, while the coast flyers also have five. Nineteen championship events are on the program. Two might be declared draws. Those calculations are likely to be shot to pieces, as conditions on the coast may be far different from all that has been anticipated.

hop, step and jump, 55-pound weight and hammer throw.

In the quarter-mile run it is believed "Ted" Meredith, of the Meadowbrook Club, of Philadelphia, will be the winner, netwithstanding the remarkable performance of Frank Stoman, of San Francisco, who with a heavy wind at his back broke the world's record for the 446 when he was timed in Saturday's tryouts in 473, it is argued if Sioman can do 473, Meredith, under the same conditions, would trot to the wire in 45 seconds. No attempt to belittle Sioman's ability is to be inferred. A gale of wind will make any athlete run in record time.

Norman Taber in his present form is the bear of the mile runners. If he starts he should beat Abel Kiviat and Jole Ray without great difficulty. Taber's mark is 118-8, Kiviat's 115 and Ray's 118-21.

Taber has his heart set to beat Ted Meredith's world's record of Links for the 500-yard run, and if he starts he will find company to carry him along at a 1:53 pace, maybe better. "All this comes under the head of a change. It sure is all of that. And the victim gets home all puffy with fat, minus all his money, and chewed to pieces by the mosquitoes and other wild bugs. He's got his vacation—what's he going to do with it?

"Now, my idea of a swell vacation is to stay right at home and play golf, morning, noon and night. I say it from the heart, my idea of entering the gates of Eutopia is to ent, drink, talk, play and dream golf every minute. What more does a fellow want? All the elements are on hand—the sun, the wind, water and all the bracing air he can handle. Every course has its woods, its sand, its hills, its stretches of country, its sunsets and all that stuff. ## SHOVEL-NOSED SHARK FURNISH GREAT SPORT FOR FISHERMEN

By DR. S. H. LIPSCHUTZ

Now that the channel bass have about eft the Jersey coast, surfmen have turned their attention to fishing for the arse shovel-nosed shark. Anyone propleft the Jersey coast, surfmen have turned their attention to fishing for the large shovel-nosed shark. Anyone properly outfitted can now enjoy a sport that far outshines the swift channel bass.

When a shark is hooked that will runover 30 pounds there is nothing that will stop its tremendous rushes, and where he is played from the surf there is hardly any tackle made that will stand its brute atrength. Where shark are played from a small boat the angler has more chance, as it is possible to take up anchor and permit the shark to tow the boat. This is not fiction, but actual fact, as this performance has been repeated several times this summer.

Surf fishing for these monsters furnishes the most exhibitating of sensations, and they can be found at the points of the various resorts, especially where the ocean and the bays meet—i. e., the inlets. They are found in great abundance at Avalon, Townsend's Inlet, where many large ones were caught last week, some more than 50 pounds, Ocean City and farther north along the Jersey coast.
