Believes Telegraph and Telephone Utilities Property Belong to Postal' Service, and Declares Time Is Not Far Away When They Will.

For the first time since he became member of President Wilson's official family, Postmaster General Bureial family, Postmaster General Bur-leson, who is called the politician of the Cabinet, has consented to be in-terviewed at length by a member of the newspaper fraternity. Although regarded as an actute politician, there was one thing the Postmaster General would not discuss, and that was polities. In the appended article, which will be found of especial in-terent, he discusses rural free deliwory, the parcel post and its effect upon the express companies, and reiterates his express companies, and reiterates his belief that all vehicles for the trans-mission of intelligence should be in the hands of the Government.

"Politics." "Nothing doing," said the Postmaster General, cordially.

"Why not?"

"I absolutely can't and won't talk polltles," said Mr. Burleson. "Try something also.'

"All right; but why do they call you the politician of the Cabinet?"

"I suppose that is because you writing propis have to coin catch phrases to de-scribo, catalogue, classify and in some degree dramatize public men in the public eye. That's only my opinion. You folks did it and ought to know why."

"Speaking of politics." "We aren't speaking of politics," said the Postmaster General. "-What means this holler in the rural districts about restrictions of the rural free delucers?"
