THE MRS. PANKHURST OF THE SIOUX

CURIOUS TYPES OF FEMININITY SEEN WHILE TRAVELING ABROAD

One Soon Becomes Accustomed to the Various Species of Woman Voyagers to Be Met With on an Extended Trip, Especially the Fussy Woman

A residence arouse accustomed to the long at once! I think haby must be dying-do stop the train or comething—this must various types of people one invariably meets. They are to be encountered over and over again and in every part of the ta stop the train that he didn't even stop

The Fussy Woman, for instance, is always with us. There simply is no getting away from her. She fusses over anything and everything. Nothing is too trival for her, no incident so immaterial that it is fruitless of creating a fuss. She loves to fuss and fuss she will!

This type of woman is even more irknome on a short journey than on a long one. For on a short journey are gets more in our way. On the way from London to the south of England there was one of this type in the carriage. Her nusband, her bay and the nurse were all there for her assistance and protection there for her assistance and protection— yet she did not stop complaining the whole

"James, have you got all the tickets?"

responded that he had attended to the purchasing of the said tickets before starting and that she need have no

anxiety on that account.

The Fussy Woman subsided for a moment—but only for a moment. "The sun is shining on the baby's face. It will give him a stroke!" she announced, in sepulchral tones to the nurse. In order to avoid this terrible catastrophe she then jerked the bilind down so violently that the noise awoke the baby, who howled at the top of his none-too-feeble voice and, like Rachel of the Scriptures, refused to be comforted.

His fond but fussy mother then used all manner of blandishments upon the child. She hugged him, she kissed him, she jerked him with strange violence into mid-air and she did everything calculated to upset the stomach and temper of a well-behaved child—much more those appendages of a naughty little creature like this particular infant.

"James." she began again in a voice loud enough to be heard above the juvenille lamentations which filled the carriago

reading but continued his peaceful perusal of the pages with every outward appearance of comfort.

The infant finally fell asleep. One expected a lit-tle quiet then. But the Fussy Woman, like the leopard, could not change

her spots.

"Can you tell me what station this is?" she began, "and just how long

it will take to get to Folkes to est to Folkes to get to Folkes to get to Folkes to get to baby's sake, for the sea breezes will do him good. I don't care specially for the place—too many wounded soldiers she would cry, jerking up out of her
seat with alarming
alacrity, "Ja me a"

had attended to the

And so she rattled on for the rest of And so she rattled on for the rest of the journey. Her husband did not utter a single syllable. Doubtless he was accustomed to her foolishness and had grown hardened. But the Fussy Woman never once rested. Nor did she permit any one else to rest. First the window had to be closed, because there was a draft. Then it had to be opened again

because the compart-ment was too hot. Then closed once more because the temperature was lower. Three times that long-suffering husband had to bring husband had to bring forth tickets, money and various docu-ments for her inspec-

Before the journey was finished she had in deed successfully convinced every one in the carriage that a Fusay Woman is the greatest trial on

BIG CROPS STIMULATE PRESERVING ACTIVITY

Bounteous Yields of Fruits and Vegetables Rouse Practical Economy of Wives

With tons of produce rotting on the farms of Pennsylvania and New Jersey and Dock street and other wholesale centres of the city literally under the weight of great heaps of vegetables and fruits, housewives of this city are offered an opportunity to practice practical economy to an extent seldom if ever before realixed in this city.

The opportunity is, in short, to take advantage of the present exceedingly low prices of the market, to prepare against the future, when prices may soar to a point maccessible to the average purse, by preserving the fruits and vegetables now in season. Take corn, for instance. That wholesome food may be dried or canned-and there are three billion bushals of this grain in prospect for this year's

Tomatoes have been so plentiful in this and nearby States that they have already glutted the wholesale market on several occasions. Less than two weeks ago tomatoes were shipped to wholesale mer-chants in such quantities that Dock street

ances for accomplishing this end, there should be few of the fruits and vegetables which the enterprising housewife need discard as preserving possibilities— especially when she thinks of the price at which she may obtain the produce. The following figures cover the general range of quotations on the wholesale market:

HUNTING PARK OUTING

50,000 Children Expected to Attend Affair of Business Men's Association

Fifty thousand children and adults are expected to attend the seventh annual outing of the Central Germantown Avenue Business Men's Association, to be held today at Hunting Park.

An elaborate program of games has An elaborate program of games has been arranged, and enough ice cream will be provided to satisfy the appetite of the most voracious boy or siri. There will be a band concert this afternoon and evening. A 50-yard dash for men weighing 200 pounds or more and a tack-driving contest for married women are typical of the novelties that are planned by a committee, of which Joseph T. Brown is chairman.

Harry Heebner and H. T. Hewens, offi-cials of the North Branch of the Young Men's Christian Association, Germantown

tomatoes were shipped to wholesale merchants in such quantities that Dock street commission merchants were giving them away to those who would take them, rather than have the tremendous shipments rot on their hands. Even now, with the tomato market somewhat relieved, this vegetable is readily obtainable at prices ranging from 35 to 56 cents a basket, or five-eighths of a bushel.

Feaches are perhaps more plentiful this year than at any time in the past decade, and although there has been a fair demand for the fruit, the best Georgia peaches are to be had at prices which range from as low as \$i\$ to \$3\$ a crate. This year's crop is said to be twice as large as that of last year, and the price is correspondingly low.

Another instance of the remarkable conditions extant at the present time is the potato market. In some farming districts of New Jersey farmers are selling this vegetable to commission merchants for 25 cents a bushel or at from \$5\$ to 26 cents a barrel. Last year the barrel price was \$1.50\$ and in previous years as high as \$4.

With the numerous up-to-dats cook books and pamphlets of instruction in the art of preserving fruits and vegetables, together with the modern appli-

Mr. Toad Tells About Bees

THE next morning Tommy and Mr.

Garden Toad sat in front of the old rotten timber. He builds himself a nest made of tiny gray cells which he spins and molds industriously. He "Talking about me?" asked a gay little Tommy. "I liked to talk to the her."

Talking about me?" asked a gay little voice.

Tommy and the toad jumped and then turned to see who was talking. There were many things I wished to sek him."

"He is a restless creature and never stays for long in one place." said Mr. Garden Toad wisely; but I know something about hornests and been. I have lived long in the garden and have observed much. Perhaps I can tell you something."

"Maybe you can," said Tommy. "I want ta know where the hornet lives and sil about him."

Mr. Garden Toad laughed. "That's a such opinions to himself Groat meddling fellow that he is! We work because we love to work! He is lazy and stores up no honey! Do not judge us by him, I pray you, friends."

Tommy and the toad jumped and then turned to see who was talking. There on a tall grass blade close by the log sat a dainty little bee drying his wings in the sunshing.

"No, we were talking of hornets just then," said the toad, "but we'd like to talk of you. Friend Hornet spoke of you only yesterday. He was so sorry you had to work so hard for nothing!"

"For nothing!" exclaimed the bee, so angrily that surely the wet whose must alked close by the log sat a dainty little bee drying his wings in the sunshing.

"No, we were talking of hornets just then," said the toad, "but we'd like to talk of you. Friend Hornet spoke of you only yesterday. He was so sorry you had to work so hard for nothing!"

For nothing! exclaimed the bee, so angrily that surely the wet whose must have dried in the heat. "He should keep such of you. Friend Hornet spoke of you only yesterday. He was so sorry you had to work so hard for nothing!"

For nothing! be drived in the toad jumped and then turned to see who was talking. There on a tall grass blade close by the log on a tall grass blade close by the log on a tall grass blade close by the log on a tall grass blade close of you turned to see who was talking. There on a tall grass blade close of you only yesterday.

Tommy and the toad hastened to assure the bee that they would not, and then Tommy said, "While you are here, would you please tell me where you live and how you work?"

The bee hummed good naturedly. "You ask much, my little triend," he said, "and I cannot stay long snough to answer your questions. I must get to work while the honey is in the flowers. Hees have little time for visiting!" and he flew away.

"Now fan't that too bad!" said Tummy Tittle-mouse disappointedly. "That seemed like such a good chance to talk

"But he is right," said the toad; "bens may no time for talk. But I can fell you where he lives. His bons is in the bee box in the third yard from here. I have, often sum him coming and going." Thus, wild Tommy, "parhaps some day he will stop when he is not so busy, or spilled, "but I is issift you not wishing to disappoint Tommy by the last leaping to place und

"SPIES" NO LONGER THE SYMBOL OF AGE Optical Aids Now Employed by

Young and Old, Rich and

Poor Alike

It goes without saying that this is the ge of spectacies for women. Indelibly a are these rimmed panes associated in one's memory with the extreme end of grandmother's organ of smell, the time has come when without respect to age or comeliness they are to be found riding holdly astride the nosese of the feminine rich and poor alike.

Contrary to the spasm of though that might suggest a solution to the picture, the fact that there are more people to-day rubbing clows in "movie" chairs than church pews which latter has always provided such delightful optic relaxation) comes the edict from well known opthalmologists that moving pictures, as they are depicted on the screen today, cause very little defective vision.

Systematic examination of the eyes of school children by visiting oculists is primarily the reason for the flood of spectacled youngsters encountered daily. If the eyes are "the windows of the soul" as some poet hath sung, verily many poor souls have been getting but sample packages of light. ages of light.

"The eye strain, which at one time was due attentively watching the flickering screen," says Dr. S. Lewis Ziegler, has been practically eliminated, owing to a fore perfect method of manufacturing

This vibration, according to the Lubin This vibration, according to the Lubin Film Manufacturing Company, has been overcome by the installation of a new apparatus known as the perforating machine. This provides perfect perforations on the side of the film, which catch on the approach producing a steady picture. "These perforations are so perfect," says a member of this company, "that a variation of 1-1000 of an inch is detected and remedied before leaving the plant.

"The vibration has come in some in-

"The vibration has come in some instances from the lack of a steady base for the operating machine, for instance a solid cement floor in which the machine has been installed."

"Many of the ills to which flesh is heir, together with the poor vision of the old and young, is due, according to Dr. Ziegler, to a purely mechanical defect in the muscles controlling the eye. "It has been pointed out," said he, "that any theory of the origin of disordered function which loss not embrace a consideration of the scular apparatus is unscientific and open o criticism."

It is unquestionably true in the opinion of men of this profession that 75 per cent. of order disorders depend on anomalies of the refraction, accommodation and motility of the eyes, and a correction by properly fitted glasses is followed by great good to the eye and the general

"The Germans, as a race," concluded Dr. Ziegler, "may be said to have the greatest percentage of defective vision, due to eye strain from intense study.

"There is a National Committee on Con-servation of Eyesight in America which has accomplished much in instituting methods to prevent injury to the eyg. For instance, within the last 10 or 15 years schoolhouses have all been built wheels, have been compelled to supply with the view of proper diffusion of light on blackboards. Corporations using ma-chines from which bits of steel are thrown promiscuously about, such as emery promiscuously about, such as emer-goggles for their employes, or in case o goggies for their employes, in a spectacle. In the second second

ity law."

"Twenty-five per cent of the blindness in children found in our eye hospitals is due to infection at birth, owing to a diseased birth canal," said Dr. Edward Shumway. "There has been a great crusaide against carelessness in treating this affection, as it is curable at the outset, Much has been done to instruct midwives and young mothers of the vital need of prompt treatment in these cases by the city nurses in their work in the districts. Owing to this instruction the percentage of such cases has decreased within the last decade from 31-3 to 25 per cent.

Lack of lustre, according to this ophthalmologist, is due to friction of the eyeball against the eyelid, or in other words, "time will tell" and just so surely as a "time twas one of the most difficult, and as a result she is famous, not only among her own people, but where-ever suffragists exist.

This woman is Mrs. Zippala Nini Allen, an attractive member of the Sioux "tile of Indians called the "Mrs. Pankhurst of the Sioux." It comes easy for her to be a militant. She was picked up by white solders after the battle of Wounded Knee. The solders found her in the screen as a suffragist exist.

This woman is Mrs. Zippala Nini Allen, cult, and as

face and in the course of ner equcation became a suffragist. Although but an infant when she left her tribe, the Sloux blood was strong and when she had grown up she returned to her own every wink.

From that time she devoted herself to the task of raising the status of her sex among the braves of her tribe. Women had had little recognition among the Indians. They did most of the work and had little or nothing to say. But little by little Mrs. Allen changed all this, until today the women are admitted to all the tribal meetings.

PARK BAND CONCERTS R. Schmidt's Organization Outlines

Programs The programs for concerts this afternoon and tonight at Lemon Hill by the
Fairmount Park Band, Richard Schmidt,
conductor, are as follows:
PART I.—AFTERNOON, 4 TO 6 O'CLOCK.
Overture—Poet and Peasant". Suppe
2. "Introduction and Bridal Chorus". Wagner
From "Lohengrin."

(a) 'La Danseuse' ... Von Bi (b) 'La Belia Argentina' ... Rice Melodies from 'Marcelle' ... Lud Reminiscences of the most popular we of Berlies. ... Mon (a) 'Floria,' from the 'Twelfth Mass.''

6. (8) "Floria, from the Tweith Mass."

(b) "The Watermeion Peie" Wilson

7. Waltz—"Artist's Life" Strauss

8. "Poplar Bongs of the Day" Snyder

PART II—EVENING 8 TO 10 O'CLOCK.

1. Overture— "Tannhauser" Wagner

2. "Hungarian Rhapsody No. 1" Lisat

3. Corner Solo—"La Sonnambula Bellini

Soloist: Sanle Martorano.

4. Scenes "Neapolitan"

5. Patriotic Fantasie— The North and the

South"

6. Melodies from "Lucia de Lammermoor,"

Domizetti

Concluding with the Famous Sextette.
7. (a) "Stavonic Dance No. 1" Dvorak
(b) "Trot de Cavalerie" Rubinstein
8. Airs from "The Girl from Utah" Rubens
"Star Spangled Banner."

CONCERT TONIGHT

Elaborate Program Prepared by Philadelphia Band

Lesson in Ethics "Oh, mother," cried Edith, "I found a little flea on kitty, and I caught it!"
"What did You do with it?" asked her mother. "Why, I put it back on kitty again, of course. It was her flea."-Lippin-cott's Magazine.

P. P. Lagomaraino & Co., Inc.

Explains to Perplexed Briton His "Not" Is "Oh" a Phone Lingo and "Five Not Not Six" Is Really "Fife Oh Oh Six"

OVERHEARD in a 'phone booth:
OPercival's Piccadilly contralto speakng: "Operator, please give me South nve, not, not, six." "Number please?"

"I say, operator, get me South five, not, not, six."
"I don't understand you. Do you want information? You asked for South fife and not six: South eix is not a working number." This from the telephone operator.

number." This from the telephonator.

"How stupid of you," Percival rejoined angrily. "I tell you I want South five, not, not six, Not, not, I said. Is that clear? Yes, I said not."

"Oh! I get you," the girl replies laughingly. "You want South, fife, oh, oh, six, Just a minute. I'm ringing South 5006."

Percival's blood is near the boiling point. "Not oh, I say, but not," he yells. "Who said fife. This is not a bally drum corps."

The Englishman finally was convinced that fife meant five; and, on the other hand, the operator realized that "not"good round British "not" meant nought which is pronounced "oh" in Helloland. Conversations such as the above are not infrequent over the telephone, and t would be surprising perhaps to know what 'phone operators have to hear, and besides what they have to "get." They hear all kinds of voices and pronounciations, not to mention dialects. Consid-

ersbly more than 700,000 telephone as are made in Philadelphia dally.

The training of telephone siris, the education, so to speak, would be an it teresting study. In certain Canadas cities each operator must speak two in guages. In Constantinople some operator are required to speak as many eight languages. The Turkish telephone company there is financed by English capital. American instruments are used Hello girls in Philadelphia are counted to speak only English; that is too English. Any mannerisms of speece pronunciation must be dropped before they become full fledged operators.

Those who use the telephone in Page delicities are trained to the page of the state of the page of the state of the page of

Those who use the telephone in Phil delphia have just noticed that the are saying "fife," used instead of The telephone operator's rolling ranging three or th-r-r-r-ree, is an

story.

There's a reason. "Fife" is not use for any purpose of affectation. As may have been wont to believe. The rolm "f" distinguishes three from two wes sound quite similar when given quite over the phone. Five and nine also some alike if said hurriedly, hence the "ffe. Telephone operators have been attructed to roll their r's for more that a year past. Both the rolling r as the "fife" save both time and money at the company and subscriber alike. May be they save tempers at times. Telephopoperators are qualified to answer the question. They know.

RAISES CHICKENS AND VEGETABLES ON ROOF

Harry Konollman Does Not Dame Fashion Scores Palpable Believe in Wasting Valuable Space

To all this "cost of living" lore Konollman only says, "Poof, poof!" To him its terror is no more, Of which he has the final proof In chickens on the second floor And a truck patch on the roof.

The problem of the cost of living and also of utilizing dwelling space that ordinarily goes to waste has been solved by Harry Konollman, garageman, truckman and chicken-farmer. Konollman owns a three-story dwelling at 1631 North

avenue.

The house has enough rooms on the second floor to house Konoliman and his family comfortably. The first floor he uses as an automobile repair shop. That's his trade, but automobile repairing doesn't keep him sufficiently busy.

Accordingly, Konoliman decided to put the third floor to work, and installed in it a model chicken farm. At the present time he has nearly 400 white Leghorn chickens, and he defies any one to show him a heinery that is more sanitary.

Even with this arrangement, however,

Even with this arrangement, however, the roof was going to waste. Konollman abhors waste. He did away with it on the roof by carrying several cartloads of rich earth through the narrow trap door in buckets and starting a truck patch. This season has been especially good

for tomatoes. Some of the vines are so thickly covered with the vegetables that at several points they can be seen hang-ing over the edge of the roof.

The chicken farm is the most interest-ing of Konollman's venture, however, An open-air run for the fowl is proyided by the roof of the second floor that juts out beyond the third floor. This space has been inclosed in a wire netting by Konollman and divided into runs, which he has covered with said he has covered with sod.

A neat and convenient article for the nursery, piculo, or household in general is seen in this little tin pot, stove and fiame, all in one small box. The con-tents are heated by means of solidited alcohol, which comes in square cubes, about three inches wide. Liquid alcohol may also be utilized, but it is not quite so convenient to carry in the picnic hamso convenient to carry in the picnic ham-per. Another invaluable use for this stove is in the sickroom. The invalid's broth may be heated at almost a mo-ment's notice, and for a hasiy snack at night nothing could be more satisfac-tory. The college miss who is counting on forbidden midnight spreads always buys a stove of this sort, for the price is only 11—reasonable enough, considering its many uses.
