tunately for the fickle suitor! The point of the matter in that the latter is under 21 years of age, and the Judge hesitated 70007 long in deciding whether or not he was morally responsible for the promises made-and broken.

The plaintiff put in her claim on the grounds of expenses of trousseau and time expended on the same, and furthermore demanded that she must receive compensation for the humiliation she had suffered through loverly defalcation!

Of course we all have beard that old tale before—when the once gallant knight kiness and then rides away, his lady love is naturally humiliated. But why she should add to that unfortunate sensation of shame in airing her grievances pub-licly in the law courts is a mystery! We are all willing to believe that in the first instance she is humiliated. It isn't at all flattering to be calmly told that one's charms are not sufficient for the holding of what once was masculine adulation. But to take the public into one's con-fidence in the matter and to demand financial compensation is simply to drag one's pride deeper through the mire.

It is surprising to note how many girls, who outwardly appear as gentle and as meek as lambs, will suddenly change their gentle little bleat to a much louder and more querulous cry if their lovers show ove-pro tem .- with fluffy-headed little Dolly Brown gets a sad awakening at such period when he tries tactfully to back out of the affair, and finds that Dolly has an overdeveloped sense of the legal in the matter. For such an ap-parently foolish little creature, she shows an extraordinary acquaintance with the law and the turnings and twistings thereof. She shows her quondam lover a disconcerting familiarity with previous "suits," "contracts" and "necessities," a fact that might have filled him with admiration had such genius been applied to any one else save himself.

It is scarcely edifying-this daily re-

One certainly would have thought that these girls would have shunned the publicity of the courts. I am amazed at the calm way in which letters of the most intimate character are boldly produced gloated over and given every variety and species of publicity—and this on the part of the woman.

. . . It is a noteworthy feature that men seldom or never bring sult against a wom-an for breach of promise of marriage. The cynical would offer the solution that the men are only too pleased at getting their "conge" to say one word in dis-pute of the ruling! But this cannot al-

ways be the case. The truth of the matter is that man-ind "en masse" hates to be made to look like a fool. The publishing of love letters, written by him or to him-it matters not-sliky sweetnesses and intimate matters of an amorous nature will fill a man's heart with a rage and a humiliaion which knows no bounds.

Midnight blue velvet is designed for ning gowns are shown in this charming and most be-coming of colors. Ciel and nattier blues are shown for the younger miss. I no-ticed particularly how ficed particularly how much blue velvet was worn. Every Paris model or group of models includ-ed a blue velvet frock for the debutante, simply trim-med, with tulle bodice or draperies of chantilly lace

A recent fashion show in which the New York shops were well represented was famous for its made-in-America styles. A decidedly stunning evening wrap on rather odd lines was seen, and is reproduced in today's fashion cut. The color is a wonderful clear blue, called "waterfall," and the material is a silk corded velvet. The lines of this little

wrap are worth notice. The upper part of the cloak is full, being gathered into full ing gathered into full puffs at the armholes and terminating in a long silk tassel at each side. A nar-row peplum of the velvet is noticeable at the front, giving a delightfully youth-ful look to the creation. The very wide collar and deep cuffs are made of fox

fur, dyed a lovely shade of cream, almost tan. The skirt part of the cloak is full also, although the state of the season at the top. It hangs rather irreg-ularly, with a decided dip at the back, finished off with a narrow hem.

Hints From Paris Children look delightfully id-fashioned in their little old-fashioned in their little fluffy-ruffled skirts and puffed sleeves that are now the fashion. While some the fashion. While some of the skirts in these little fancy frocks—for they are nearly slways cut this way for party and dress-up clothes-are straight gored gathered together, one also sometimes sees the absurd-ly short skirts cut circular and gathered a bit besides at the waist. This gives a ballet dancer - like ruffle standing out stiffly about the little child's figure that

is very fetching.
Short, puffed aleeves go well with this type of dress. Tiny ruffles add dress. Tiny ruffles add daintiness, and these little frills are either picot edged or hemised by hand. As little machine work and as much hand work as possible is the rule for these summer frecks.

Fine French embroidery—and the more it is padded the better—is an additional elegance to these little dancing or afternoon atyles.

Reckless driving of automobiles in the central section of the city, endangering the lives of pedestrians, is to be prevented by a new set of police traffic regulations. This was decided upon today after a Cabinet meeting in the office of Mayor Biankenburg. At the meeting it was shown that an increasing number of accidents indicate necessity for new rules. A conference was held by Director of Public Safety Dripps and Superintendent of Police Robinson after the Cabinet meeting and the new orders were discussed. distributed by Miss Wilson. The fame of her work had spread all over the country. Monufacturers of toys, hearing of it. shipped great cases of playthings to her. She packed them into separate bundles

and sent them off. The flood of requests for presents this year already has started, according to Miss Wilson. Every day her mail is becoming heavier. She is trying to keep pace with the requests every day, but it is a difficult task and unless the public comes to her aid hundreds of children will be disappointed.

Many noted men have voiced their approval of Alias Wilson's work, and have contributed to it. The need is more urtent this year than ever, the Santa Claux pirt says. because the war has belted the importation of the chesper toys and so the funds that will be at her disposal

CHILDREN'S HOSPITAL TO WAGE SUFFRAGISTS PROMISE TO DEFEAT POLITICIANS WHO FIGHT "CAUSE"

Miss Hannah J. Patterson Says Revenge Will Be Visited on All Who Oppose Amendment

CONFIDENT OF SUCCESS

Politicians who are planning to oppose the woman suffrage amendment that comes before the electorate at the November 2 election had better look out, when the second is defeated, reprisals, vember 2 election and better look out.

If the measure is defeated, reprisals, sharp, swift and sure will be inflicted on those responsible for the defeat. The whole army of the women now ensaged in the strungle for political liberation will engage in the business of punishment, and no candidate or organized interest will be permitted to escape.

be permitted to escape.

Miss Hannah J. Patterson, State chairman of the Woman Suffrage party, made this statement at Harrisburg yesterday, Although loath to discuss even the remote possibility of defeat, she considered the question hypothetically and declared emphatically that, though suffragists in Pennsylvania had kept their skirts clear of party politics, a defeat of their amendment in November would mean a complete revolution of tactics. plete revolution of tactics.
"We are not willing to concede defeat."

she said, "because we have too much respect for the intelligence and fair-mindedness of the men of Pennsylvania Moreover, we have good reason to believe that unless crooked methods are used and every bit of machine pressure in the state is brought to bear against us. we shall win by a comfortable majority. It we should be defeated, however, we shall continue our State organization and its various local branches. And then, because it will be the logical thing to do," she added significantly, "we shall start the work of removing the obstacles from

our path. Since our amendment cannot come to a vote again for five years, it would be folly, if we are defeated, to push active suffrage propaganda work immediately We have an organization, however, that is big enough, and strong enough, and responsive enough to eliminate obstacles from our path, whether they are indi-viduals or organized interests.

"Therefore our first task for the next two years would be a semi-propaganda campaign which we would put into operation by entering actively into the defeat of any individual candidate for office or any organized interests that opposed us In that way our situation would be made infinitely better when we start our straight suffrage campaign two years

"Our women are eager for work. They know now how to campaign in the political districts, and they know how to use the power which they have, but, up to date, it has been concentrated solely upon the issue of suffrage. They are in this fight to win and a defeat this year would only serve to weld them closer together and make our organization even more powerful than it is today. We will more powerful than it is today. We will hight any politicians who have been fight-ing us. Our position will be that no man who is unwilling to see all the people directly represented in government is qualified to hold public office."

Miss Patterson also said that if the suffragists win at the polls, which they confidently expect to do, the State suff-

OUT over the rippled surface of the dear:" thought the first gull. "Now there comes that great quarrelsome gull that I sweeping circles. Round and round he just as I have this fine fish for my din-ner too! Maybe if I fly right straight slong, he will not notice that I have just flew as though he wished to spy out what might be under every ripple of the clear blue water. With his broad white caught a fish: maybe he will think I have just been looking for my dinner!" wings outstretched he looked like a bird aeroplane flying over the water.

After he had carefully spied out where had quite reached the lake, he had seen the most fish were swimming he circled round and round that one particular spot: lower and lower he flew; and finally

Then the poor gull had a happy thought. "Even if I cannot eat my fish," he said to himself, "I can keep that thief from eating it—that I can!" And he dropped the fish out of his mout? and into the water. What do you suppose that second sul-did then? Quick as a flash he darted down from the air-ducked into the water and came up with a struggling flash exactly the same size and kind as the one the first gull had dropped! Do you suppose it was the same fish? Copyright-Clara Ingram Judson.
