PARIS, Oct.

Tremendous losses were sustained by the Germans in efforts to retake from the French the positions captured by them in the Champagne vesterday, ac cording to an official communique issued by the French War Office today.

Furious counter-assaults were launched by the Germans in an effort to drive back the French forces that captured Tshure, northeast of Souain.

All these attacks were repulsed, the Germans leaving many dead and wound-ed upon the field.

The most violent efforts were made by he Germans to dislodge the French from Tahure Hill, from which point the French guins command the Basancourt-Challer-ange Ralway. The text of the communique follows:

"The enemy violently bombarded all our front north of Scarpe during the night. He attempted four counter-attacks in succession against the positions recently taken by us in the wood to the west of the road from Souchez to Angres. He was completely repulsed.

"A violent hombardment was carried on by both sides to the south of the Somme in the sectors of Andrechy, Dancourt and Canny-sur-Matz, as well as to the horth of the Alsne in the region of Tracy le-Val and of the St. Mardwood.

It is over this kne that the German forces in the "Bloody Angle" formed by the Olse and Aisne have re-ceived most of their supplies, and their mailtion there has have nondered overall us by the latest French success.

The French artillery battered the Tahure fort and its neighboring defenses for six days before General Joffre or-dered his infantry to advance. Within an hour the shattered fortifications were in the hands of the foctsoldiers, who dashed through the waters of L'Ormolse rivulet and ended with their bayonets the lives of all the Germans who resisted them.
