Ministry at Loggerheads. A. Bonar Law Reported as Slated for Premier

MILLERAND IN ENGLAND

LONDON, Oct. 20. That Premier Asquith's illness will prove so serious as to compel his resignation, ending a virtual deadlock in the British Cabinet, was the growing be-

lief in some quarters today.

The present Cabinet crisis was caused by sharp differences of opinion over the the Dardanelles campaign and the Government's Balkan policy. This was revenicd today by Sir Edward Carson when he made known his reason for resigning from the Cabinet.

Carson stated his position today in the House of Commons. He made it clear that the cases of his resignation was not the alm of defeating Germany, but the manner in which it should be done most quickly and most successfully.

Following the audience granted by King George Tuesday to A. Bonar Law, Colonial Minister in the present coalition Cab-inet, who, as a Conservative, certainly would become Premier if Asquith, a Lib-eral, should retire, his Majesty today re-ceived Sir Edward Carson, who quit as with the Asquith Ministry's war policy. These conferences were widely inter-preted as indicating that a general Cabnet shakeup is at least under considera-

That Asquith was losing influence was conceded, many even of his friends having openly come over to the view that, though a capable adminis-trator, the Premier is not the man for such an emergency as the present one.

It was learned on reliable authority today that Sir Edward Carson's resignation was his personal protest against

TEUTON ATTACK FAILS

BERLIN, Oct. 20 .- The War Office today reported that German troops in a reconnoitering advance northeast of Prunay captured four officers and 364 French soldiers. They took three machine guns and three mine-throwers. Near Middlekerke an English aeroplane was shot down and its occupants were taken prisoners.

PARIS, Oct. 20. French artillery has slienced the German machine guns and trench engines about Libons, said the official statement issued here today.

The following communique was issued:
"Not a single action of importance was reported during the night. In the sector of Libons our artillery directed an effective fire upon the German trenches, which silenced the rapid-fire guns and the trench machines that were firing upon our lines. "In Champagne, in the direction of the butte of Tahure, and between the Meuse and Moselle, to the north of Flirey, the enemy bombarded our positions at numerous points. Our batteries respond-ed very energetically." Having failed in their attempts to drive

the French out of the newly conquered positions in Champagne, the Germans turned their attention yesterday to a new region just east of Rheims. Here on a front of a little more than six miles—from La Pompelle, one of the eastern forts of Rheims, to Prosnes—the Germans made a severe attack with large forces under cover of clouds of asphyxiating gas and preceded by a heavy artillery

preparation.
The Germans were successful in driving the French from their first line trenches, but later in the day an energetic counterattack recaptured all points which remained in the hands of the Germans. According to the statement of the French War Office last night the German losses to this ineffectual attack were considerated. in this ineffectual attack were consider-
