EVERY ONE FEARS A POISON PEN WRITER, SAYS M'LISS

These Are Cold Days for Penn Freshies, Especially When Marching About in Nature's Garb

The "Poison" Pen and Its Terrors

NOTHING could be more despicable than the action of Miss Theresa Samsorrow and distrust into the homes of young wives in the vicinity. This wasp walst and stouter strange woman would pick the names of her victims out of the society columns and directories, choosing girls of whom she knew nothing, but that they were engaged to be married. A very unfortunate love affair is said to be the cause of the woman's actions. Excuses can never make amends to the women whose gres the letters have ruined. And they are a poor explanation. Striking in the dark is a mean and cowardly act, and the woman who writes scurrilous notes does this and more.

Two Birds With One Stone

THE honor system still has some followers at Pennsylvania, to Judge by the summary actions of the Student Government in punishing the foolish freshies who took it upon themselves to sandy high art through the medium of a hole in the ceiling of the life classroom. Why such clumsy efforts should be made to peep into the room where a nude model was posing I'm sure I den't know. Every one in the architectural school knows that the life class g a commonplace occurrence. No particular originality was shown in the method of spying, and it surely wasn't a side-splitting affair. The epilogue, at which the culprits were gently but firmly immersed in icy blueprint baths after being marched for several blocks au naturel, showed the superior advantages of a little forethought. The ethics of 50 husky seniors were enforced. And five verdant freshies did an amateur Lady Godiya act. Congratulations,

Endangering One's Neighbors

THE brain of the dog who ran loose the other day and bit ten persons has been examined by medical authorities, and proof positive has been given that the unimal was mad. And now there are many anxious mothers and relations who are left to face the possibility of a severe and maybe fatal case of hydrophobia. The Pasteur treatment is effectual, but it must be administered in time to give results. Most of the victims are children, who were sledding around the place where the dog appeared. Why this ferocious animal was allowed to race around for nours after the first attack remains to be explained. There is a "mad dog" scare in Paterson, just now. We don't want one in Philadelphia. Pets which are not on a leash should be muzzled while on the street. A number of like accidents could be avoided by this simple precaution. You may have faith in your pet dog's disposition, but you can't blame

A Holiday Suggestion

NOTHER warning has been issued to careless women in the recent loss A suffered by Mrs. J. M. Gazzam, Mrs. Gazzam was taking some of her old family jewels to have them reset. A clever member of the light-fingered gentry removed them from her bag in the holiday crush at a local department store. I am not accusing this lady of being careless, but only yesterday I saw a weman shopper walking along, swinging an ineffectual and highly attractive silver mesh bag, through which a roll of bills could plainly be seen. Why advertise, ladies? Velvet bags are much more fashionable, and-whisper it-even one's stocking is safer.

Why Not?

THE speech of the Rev. Cyrus Townsend Brady advocating Sunday movies lis one of the most telling arguments in a few words that you could find. "Why shouldn't we have Sunday movies?" he asked; "they are the poor man's automobile, his golf club, his library. If I can take an auto ride for recreation on the Sabbath I don't see why the poor man shouldn't see a

An Overworked Excuse

TWO foolish girls were released yesterday and returned to their home, wiser, grammur and can read a little in that language if the exchange of lessons is they, and, incidentally, \$400 of his money had disappeared on Sunday last. After a search they were found, having enjoyed a sort of glorified pienle for several days. The girls claimed that they only took the money to buy the cothing and finery which they needed. Clothing, yes, but not necessarily fipery. This sentimental plea of the weak-kneed type is old enough to condemn itself. The best way to deal with girls who want "liberty" of this kind is to get them some congenial work and let them buy their own finery.

Letters to the Editor of the Woman's Page

Dear M'liss—Can you tell me who is the author of the remark, "Genius is to our list of proposed exchanges. All patience?" And I would like to know if that remark has been translated into actions bearing upon the subject must be the statement that genius is the capacity for taking infinite pairs. I would be recommanded by stamped and self-adappreciate your opinion on this matter.

appreciate your opinion on this matter.

B. L. N., Tioga.

The very earliest record of this statement is attributed to George Louis Bouffon, the great French scientist. Bouffon, by the way, was a living example of his theory, as he was by no means a precocious child, but was remarkable for the patience and perseverance with which he applied himself to his great work. He directed his efforts in many directions, to mathematics, physics and architecture, writing numerous original pamphlets on these and kindred subsets. His greatest fault was a tendency to generalize without having sufficient data to really warrant the conclusion, so that his writings cannot be relied upon to a great extent. Innumerable versions of the same statement, of course, have been given from time to time, and the one of which you speak is the commonest. I shall be glad to help you at any time if you wish a complete biography of Bouffon.

Dear M'liss-I am a married man, and as such would hesitate to make any remark about the type of woman who makes the best kind of wife. You were a bit hard on the ladies when you said that some of them weren't worth 30 cents, for that kind of girl never succeeds in getting a husband. That is the only place where your reasoning goes wrong. I am as happy as it is possible to Be, and yet I realize that there aren't many women like my wife. She's the old-fashioned kind. But the whole trouble with the fellows today is that they don't want that kind of a girl. They want some one that helps them spend their money, and these are easily found. Don't you think I'm right? Dollar husbands of this sort deserve nothing better than a 30-cent wife.

L. R. ROBINSON.

Dear M'liss-I would like to ask you a question about etiquette. I have been going to see a certain young lady for the last year, and would like to give her a little remembrance for Christmas. I happen to be able to get hold of an electric curling iron. Do you think the lady would be offended if I gave her this? I know her intimately. I should like to hear from you before Christmas, if it is possible. PUZZLED.

I don't see any reason why you shouldn't give the young lady the curling iron; they are very handy things to have. The only trouble is, do you know if the young lady uses one? If her hair has a natural wave, she might not understand your motive; but if you know she uses artificial means to give her hair a touch of curl, the iron will probably please her very much. I might suggest that it all depends upon how well you know the girl. No one can help You on this question but yourself.

Including today, there are only six more shopping days before Christmas.

One thing that should be avoided is this business of getting Christmas con-fused with Good Friday, Easter and other flays. It may seem incredible, but a young woman, graduate of a college was heard remarking something about "sad occasion" hail something about the "sad occasion which was the cause of the first Christmas," and about how this "sad occasion" hail somehow developed into a time of rejoicing, in the course of centuries. The Charms of the Old-Fashioned Christmas Story

In tomorrow's Public Ledger Joseph Jackson has a delightful article on the mystic charms of the oldtime Christmas stories. He shows us how the Yuletide tale originated with Washington Irving, though Dickens became its most popular examplar. Mr. Jackson traces the trend of holiday literature from a recount of ancient customs to tales of philanthropy and good cheer. The article is freely illustrated with reproductions of old cuts, which remind one of the Christmas books our forefathers treasured.
