CONTRAST IN PRICE OF GAS HERE AND IN BALTIMORE

Consolidated Company in Monumental City Celebrates Centennial by Reducing Minimum Cost to Consumers to 35 Cents Per 1000 Feet.

Price of Gas Here Exceeds Rate in Smaller Cities

The price of gas is a subject of deep interest to the head of every family in this city.

Residents of Philadelphia are paying \$1 per 1000 feet for gas, while consumers in both larger and smaller neighboring cities are paying much

The Evening Ledger sent a special representative to inquire into gas conditions in Baltimore, a city with less than half the population of Philadelphia. His report follows.

"After next year I believe," said Mr. Lillie, "the price which the city will pay us for gas under the lease will be 75 coals per 1000, so that unless the city covernment reduces the price to consumers, which it has the right to do under the lease, the amount to be paid to into the city treasury should be largely in excess of \$2,000,000."

MOTHER OF DROWNED

Gilbert Shisler Died Hero, Trying to Save Harry Story From Ice Thin ice and a double drawning, which

Thin ice and a double drowning, which ended the David-and-Jonathan friendship of 16-year-old J. Gilbert Shisler, of 857 Moro atreet, Holmesburg, a boy hero, and Sygar-old Harry Story, of 8020 Frankford avenue, has caused the serious illness of the latter's mother, Mrs. William R. McCartney, who today is in the care of a physician at her home.

of a physician at her home.

The mother, with her husband, a dry goods merchant, was one of the score of persons who yesterday stood on the Rhawn street bridge watching hurrying men with boats searching the broken ice of Pennypack Creek for two drowned boys. When the limp form of her son was taken from the water she fainted and for a time was in critical condition.

Young Shisler, one of 12 children of Walter Shisler, a City Hall engineer, died a hero in a vain effort to save his friend. He could have saved himself, spectators said, but chose to gamble with death when thin ice cracked and broke under his friend. Desperate efforts to save both the boys were made by Thomas Maguire and William Smith, both of 2818 Jaspen street, who were among the first to ar-

street, who were among the first to arrive on the scene. The former was pulled from the water unconscious, and both were sent to hed. The bodies were recovered about half an hour after the ac-

cident and hurried to the Frankford Hos-pital, where efforts were made in vain to revive the boys.

40-Room Arch St. Apartment Sold

A 40-room apartment at 1933-35 Arch street has been purchased by John F.

erty, which measures 40 by 134 feet, was held for sale at \$32,000.

Young people need clear complexions If you find yourself "left out" because of a poor skin, and want

a clear, fresh complexion, use

at least once a day. Wash thoroughly with a warm, creamy lather of it, then rinse the face with plenty

It does not often take many days of such regular care with Resinol Soap to show an improvement, because the Resinol medication soothes and refreshes the skin, while the perfectly pure soap is cleansing it. In severe or anothern cases, Resincel Saap should be aided by a little Resincel Continent, All druggists sell them. For samples free, write to Dept. 22-P. Resinel, Baltimore, Md.

of cold water.

Lewis from Albert E. Koch

BOY CRITICALLY ILL

One hundred years ago the city of Bal- | from \$500,000 to \$700,000 a year, become the

one hundred years ago the city of Baltimore was the first American city to adopt gas as an illuminant.

The Consolidated Gas Company, which The Consolidated Gas Company, which The Consolidated Gas Company could be sounded to story a year, become une property of the city.

There would be nothing gained. Said Mr. Lillie, "by discussing whether the United Gas Improvement Company could The Consolidated Gas Company, which today supplies Baltimore with gas, is the direct successor of the orisinal parent empany. The Consolidated company has taken a unique and fitting method of celebration this centennial by virtually making the consumers of gas in Baltimore profit sharers in its business.

It began the celebration last year by making a rate of 35 cents per 1600 feet to manufacturing plants, which insturally consume very large quantities of gas.

It continued the celebration this year to that inaugurated by the Consolidated Gas Company in Baltimore, because as I have said, it is a local proposition and would have to be figured out very exhaustively, and because the terms of our present lease preclude even its consideration."

"After next year I believe," said Mr. Lillie, "the price which the city will pay us for gas under the lease will be."

It continued the celebration this year by reducing the price of gas for do-mestic consumption from 80 cents per 1900 feet to 75 cents per 1900.

A few days are it put a climax to the entennial celebration by offering to every demestic consumer whose largest consumption of the for any one mouth in 1915 was 4000 feet or over, a rate of 25 cents per 1009 feet on all gas he may consume in any month during 1916 in excess of his largest mouth in 1915.

excess of his largest month in 1915.

For example, if a householder's largest consumption in any one month in 1915 had been 2009 feet, with this liberal offer he may wish to use gas during 1915 for a great many purposes, which an 50-cent or even a 15-cent rate would make prohibitive. But with only a 25-cent rate to consider for his excess consumption, he may conclude that gas is cheaper and cleaner than coal for the heating of his house, for a constant hot water supply, for all cooking purposes or for one or all of the many modern household uses to which gas can be put.

If by using gas in this manner he should

If by using gas in this manner he should double his former maximum monthly consumption he has the satisfaction of knowsumption he has the satisfaction of knowing that the excess gas used is only cesting his 55 cents per 1990 feet—a rate which is only 5 cents per 1990 more than natural gas costs consumers in such favorable locations in the natural gas belt as Pittsburgh and surrounding cities, where the rate to domestic consumers for natural gas is 50 cents per 1990.

gas is 30 cents per 1600.

55 CENTS PER 1600 FEET.
Or if he wishes to look at the matter from another point of view, he can figure out that, while he has doubled his normal consumption of gas, he has brought down the average cost to 55 cents per 1609, and that a greater consumption will still further reduce his average cost. This is a well-known principle of co-operation where increased consumption reduces the cost to the consumer.

It is also a plain business proposition

It is also a plain business proposition without a thought of philanthropy.

The gas company is in business to manufacture and distribute gas. The more gas it manufactures and sells the more money it will make.

Like all gas companies that supply large cities, its equipment must be equal to the heaviest possible strain which any emergency may impose on it. This maximum strain occurs in midwinter, between the hours of 5 p. m. and midmight, when the company is called upon to supply gas to all the street lamps, to stores and dwelling houses, which are then consuming their maximum for the day. At other times all this machinery for the manufacture and distribution of gas is more than 10 per cent. Idle, but the expenses of running it must go on all the same.

PARALLEL CONDITIONS HERE.

The addition is a smalled to make the consults of the sorrowful story of 14-year-old William Kellner, 54th street and Haverford avenue, who is at the House of Detention today, according to the police, who accuse him of breaking into the store of his streets, and stealing a number of things. Chief among them, though the police point out, are 10 jars of raspberry Jam. This is said to have been the motive for the robbery.

The condition is parallel to our city fire stations, which we must keep up to the point of greatest efficiency to meet the greatest possible emergency, although 50 per cent, of the time they are idle. officers of the Consolidate Gas Com-The officers of the Consolidate Gas Company, in Baltimore, peason that the average householder, if he could obtain gas at the lowest possible rate, would use more of it day and night. Therefore in making this 25-cent rate for excess consumption the company has only taken into consideration the additional cost of manufacture and distribution without re-sard whatever to the capitalization or coat of the present established plant or the present fixed charges of operation.

At the offices of the United Gas Im-provement Company Lewis Lillie, third vice president and treasurer, said he was vice president and treasurer, said he was very much interested in hearing of the Baltimore experiment, but that the matter was a purely local one, and while it may work out satisfactorily in Baltimore, it did not follow that it would do so in other places. He said the Consolidated Gas Company deserves great credit for having worked out the problem as it has done, and he hoped it would find it successful.

CITY FINES PRICE TO CONSUMER
When asked if the United Gas Improvement Company made a special low rate to industrial plants in Pl-lindelphia, Mr. Lillie expisined how the company had nothing whatever to do with the rates charged to Philadelphia consumers under the present sas lease with the city, and said the making of rates for the consumer was up to the city government. "Philadelphia gas consumers are paying a rate of \$1 per 1000 feet," continued Mr. Lillie. The city pays the United Gas Improvement Company \$9\$ cents per 1000 feet, at present under the lease, the difference of 20 cents per 1000 being turned into the city treasury and ostensibly goes oward the reduction of taxes. Last year this payment amounted to about \$2,000,000. In addition to this the United Gas Improvement Company, under the terms of the present lease, furnishes free gas to all the street lamps, and all city departments using sas. It keeps the street lamps in repair, providing them with Welsbach mantles, also free of cost. In addition at the termanent improvements, additions, service place, etc., which the company adds to CITY FIXES PRICE TO CONSUMER manent improvements, additions, service pipes, etc., which the company adds to the present plant, and which amounts to

MRS. MOHR WINS POINT IN TRIAL FOR MURDER

Judge Rules Evidence Against Negroes Must Not Weigh Against Wife of Murdered Doctor

PROVIDENCE, R. L. Jan. 21. The State just before winding up its case today but in its most damaging testimony against the two negroes on trial for the murder of Dr. Charles F.

Mrs. Elizabeth Frances Mohr, charged with being an accounty before the fact, scored an unexpected advantage when

Justice Stearns instructed the jury not to
let the evidence weigh against the woman.

Miss Gertrude Stevenson, of Boston,
gave the damaging evidence. She was on their that Trown left a notorrycle in his

the stand when court adjourned last Fri-

She related statements made to her by She reinted statements made to her by Victor Brown, Henry Speliman and George Hearls in Briatol Jail. She said they asked her about Mrs. Mohr, and Brown asked her to tell Mrs. Mohr to get him a lawyer. The Attorney Concerd rend to the Jury the note identified by Miss Stevenson, which she said Brown asker her in give to his sister. She may it to the police. The note told of Brown plan for an allhi and asked the sister to back him up.

William H. Lewis, the Boston nears

William H. Lewis, the Hoston negro lawyer, made her admit that she had the constraint of the poller when she saw the regroes and that she allowed them to assume that she came from Mrs. Monr., but the negro lawyer niterly failed to shake Miss Servetoon's story.

Miss Stevenson was the sympathy of the women when so the end of her order

SUNDAY SCHOOL BOY HURT

Three-Year-Old Milton Dround Went to Hospital Instead

NOT LIKE THE POLITICIANS

the Harmony These Children Sought Was in Delaware

Annie and Johnny yearned to return to Harmony. They are safe at home, at 3309 Wharton

street, today, but still they long for the scenes of their late home at Harmony. that Delaware villages. The street cars and the noisy people of the city do not appeal to them Annie, who is 7 years old, and Johnnie,

Three-year-old Milton Dround, who lives at 20 De Lancey street, has not yet returned home from his first trip to Sunday school, which took him out of the humas yesterday. He is at the Fennayl-yank Homital, where physicians are treating compound fractures of hoth legs and trying to alleviate the pain that yomes from his interval injuries.

Five numites after the boy left the homes he was run down by a delivery wagen of the Manchester Laundey Company as he was crossing 6th street at the Lancey.

Annie, who is 7 years old, and Johnnie, who is 5 years old, took 75 cents and a box of candy and hegan their ventures some pilgrimage back to Harmony years and then changed to another car, which took them to Chester. Here the awfulness of their bold trip appalled them and they forgot how to go to Harmany and were so frightened they could tell no one. The police took charge of them, and their father, John Stowman, brought them home last night. Perhaps Annie and Johnny will like Philadelphia better as they become accustomed to it.
