Dalton VERSATILITY is Unique Its Speed Unequaled THE Dalton is first of all an adding machine. For plain, straight adding and listing it has no equal, and on such work it has set many a sensational record under conditions as divergent as the varying activities of commerce afford. But the Dalton is something more than simply an adding machine. It is a calculating machine as well, capable of doing all that can be done on any other calculating machine, with the added advantage of a printed record of the work performed. Easier, in fact, than any single purpose machine performs its solitary function, the Dalton attends to its numerous duties with increased speed and efficiency. The Dalton adds, subtracts, multiplies, divides, figures fractions as well as whole numbers, cross-factors, computes interest, figures costs, payrolls, cross-accounts, pro-rates, verifies invoices, foots trial balances, checks postings, figures percentages and discounts, makes out monthly statements. In fact, the Dalton takes care of anything that comes under the head of figure work with ease, accuracy and dispatch, rendering a physical audit a part of the work performed.
