EL PASS, April 29 .- All Indications pointed to a deadlock when the formal inference between General Alvaro Obrem. Moxican Minister of War, and Major General Hugh L. Scott, chief of the United States Army Staff, was opened in fuares today. From the deadlock is expected to develop a compromise, which will be acceptable to the governments of

It is now learned that Lord Wimborne, the Lord Lieutenant of Ireland, had a narrow escape from death during the height of the fighting. It is not known whether an attempt was made to as-sassinate him or whether his adventure hefell him at the time the reheate made ooth Mexico and the United States. Well-informed observers of the situation regard it as virtually assured that situation will not develop into a crisis that will lead to a war between the two countries. The conference is expectad to last for several days.

CONFLICTING DEMANDS.

Today's session was to be given up to sottling of demands of the two countries by their soldier-diplomats. These may be summarized as follows: United States-American troops will not be withdrawn from Mexico until such a time as bandit operations have been terminated and American lives on American solutions from the terminated and the form lives on American soil are safe from

marauding Mexicans. Mexico—The American troops must immediately be withdrawn because their continued presence in Mexico threatens to lead to a popular revolt that will upset all the work of pacifi-cation that the de facto government of Mexico has accomplished.

On the face of these demands the coun tries appear to be as far apart as the two poles but the negotiations are expected to develop this:

Compromise-American troops will advance no farther southward in Mexico, but will remain for a certain time, say thirty or sixty days, while the Mexican authorities continue the hunt for Francisco Villa. The United States troops will co-operate in these towns and in every possible way keep from arousing antagonism among the Mexican natives.

#### OBREGON FRIENDLY.

He ordered like release at Chihuahua City of Ameri-can fodder shipped over the Mexican Cen-tral and, held up by the local Mexican efficials for two weeks. This will be of considerable help to the American cav-alry.

The conference in Juares is, unique in border annals. General Obregon and his staff are making their headquarters on the train in which they traveled from Chihuahua City. General Scott and General Funston remained aboard the conveyed them from San Antonio to the border
