Fortune Tellers and Psychic Mediums Are a Low Lot, Wielding a Pernicious

to receive a terrible shock some time in August. I paid her a dollar. I think she turers, but they're such devilishly wicked might at least have told me something pleasant for that."

The woman grimaced petulantly and there was a worried look on her brow. It was plain to see that she believed in the truth of her words. Her whole sum-mer was to be spoiled. ignorant, superstitious public. They hide under the protecting cloak of religion or science. They are spiritualists or psychic mediums, and as such drain the pockets of their patrons with an unscrupulousness that is nothing short of amazing.

Suspicions have been planted in the minds of the visitors to these shrines of iniquity which, like bad sores, have festered until an entire household has been infected. I remember on one occasion when I was present at a seance-in the capacity of investigator-the loose-lipped, evil-looking medium pointed a grimy finger at a miserable specimen of humanity and in portentous tones said ominously

'Watch your husband, watch your husband, watch your husband!"

The woman whom she addressed wore a wedding ring, so there was nothing psychic even in the guess that the warned one was married. The poor creature, who was obviously in exceedingly low circumstances, looked piteously at the medium. One more burden had been added to her back. In addition to other trying sorrows, she now had to watch her husband. and the inference was that the result of pleasant.

It would be immoral enough if the fortime tellers confined themselves to op-

"I've been coming here for three years now, off and on," she told me, "and though she ain't never told me anything very particular. I always keep thinking maybe she will tell me something worth while. It costs a sight of money, too, but I can't seem to break away."

Apparently the thought never occurs to the devoters of the psychles that people gifted with the genius to penetrate the vell which hides the future ought to be able to do something for themselves in the way of storing up this world's goods. Why is it that they who are capable of advising you as to which way the stock market is going, or what man you ought to marry in order to reach the seventh heaven of rapture, never seem to have profited by this knowledge themselves? Proverbially, they are a dour, down-atthe-heel looking lot.

And just suppose that they were gifted with the supernatural endowments that they lay claim to, of what would it profit a person to know beforehand the fate in store for him? All the joys of the present would be tainted because of the knowlelge of their impermanence and that most those observations were to be far from healthy of all human emotions, hope, would be destroyed.

But, of course, these practicing me diums know nothing of the future, just timism, like the gipales. If they only as they know nothing of the past or told you about the innumerable dark present. They are too ignorant to know young men and fascinating blondes who much of anything. But their ignorance were eating out their hearts for you. In Need of a Rug

Motherlike, out correspondent asks for the roller skates which may bring joy and health to her girl before mentions modestly her need of a rug. We must gratify both desires if we can. Five children, examty means, and a hard, bare floar for the aching feet of the woman of all work are features of a pitiful story. Would that it were the only one of the kind we are called upon daily to contemplate! We may lighten the shadows in this by looking up rug and coller skates.

I venture to send recipes which have worked admirto send recipes which have worked admir-ably in my household. In canning corn cut just the ends of kernels and scrape down the rest. Pack the corn tightly into jars, using a small packer. Corn should be pressed down until the milk covers the top of the can. It should be cut as soon as it is picked. Put strips of cloth around the cans, lay rubbers and covers on jars. Put jars in a boiler with a false bottom of boards and cleats to prevent breaking. Fill mother's letter, and you will be put into communication with her. You will prob-ably hear soon from somebody who will embrace the offer of your dear girl and hoy to have pictures copied. You are bringing them up in the right way by infusing into their tender minds the desire to make others happy. This is the best method of training true Corner-ltes. Pin Preserver

It often happens that the pin tray on the side of the sewing machine tips over, and the seamstress has the delay and trouble of scampering about for pins, or picking them off the floor every time she wants one. This trial of sewing days is easily done away with. Take a piece of soft woolen material, say about i inches wide and is inches in length, and wrap it around the machine at the wheel side. This brings your material across the end of the wooden part of the machine. When the dreasmaker needs pins, she can take them from the side of the eloth that is filled with them. When she is taking them out of a gown, she can have them slipped back into their place on the woolen goods, thereby keeping the pins where she can find them in any emergency. It often happens that the pin tray on the

RECIPE FOR A SUCCESSFUL LIFE: BE A VEGETARIAN, SAYS DOCTOR

By WILLIAM A. BRADY, M. D.

T stands to reason that the writer of this daily department of disillusionment is not the busiest practitioner in town. It takes some time to run the department. But at that, the worst thing that can happen to a mediocre doctor is to acquire a very large practice, for when he gets to the point where he is "going night and day" the doctor is sure to go mostly backward, so far as his professional equipment and education are concerned. A doctor who has to "see" 30 patients in two hours is not likely to give each patient the same attention he would give 10 patients in the same time, being a human, so to speak, being.

A good many things that are set forth a this department are, say, 10 years shead of the profession as an average. No. Not boasting.
