vincing proof that flight is the wisest

There is no cause for alarm in the fact

that Director Krusen and his chief med-

ical inspector, Doctor Cairns, disagree as

to the danger, since virtually nothing is

known about the disease and no two

physicians think alike about it. It is in-

fectious, says Doctor Krusen, and there

is great danger of one child contracting it

from another. It is only mildly conta-

gious, if at all, says Doctor Cairns. But

he is working with his chief and has

studied the methods of dealing with the

epidemic in New York, where there have

been 187 deaths and 797 little sufferers.

But there is certainly no consolation in

the fact that this is a mysterious malady

number of children exposed to the dis-

ease and only one per cent. of those

exposed contracted it. That one per

cent. was, humanly speaking, one child

in a hundred children; that one child was

anybody's child, and anybody's child is

a precious and actual fact to anybody-

that is to say, everybody. The bringing

home to us of a touch of New York's

terrible scourge, which is kindest when

it kills and when it spares leaves insidious

limbs-this is enough to unite in keenly

sympathetic neighborliness all families

who dwell here, erase distinctions of

wealth and station and fill up over night

the gulfs between class and class.

SILENT PARTNER BECOMES VOCAL

After Thirty Years of Study Mrs. Fels Is Taking Her Dead Husband's Place in Propa-

ganda

TO MARY FELS, his silent partner, Joseph Fels bequeathed his interest in single tax, his developing understanding of the value of Zionism to the Jew, and his appreciation of the debt of one's self to humanity.

Probably many would say that Mary Fels, one of the best known women of Philadelphia, both nationally and internationally, has increased her inheritance. Mary Fels, who today stands out as a dominant

figure in the sin-

gle tax, in suffrage and Zion-MRS. MART FELS ist movements in America, became the wife of Joseph Fels in the fall of 1881 at Keokuk, Ia

Her courtship began when she was \$ years old. Joseph Fels was a youth of 19, traveling in the West on business, He was always interested on looking up any family with the same name as his. On hearing that a family named Fels was living in Keokuk, he called on them. A little girl of 9 years welcomed him to the house. He decided that she would be his wife some day. That little girl was Mary Fels.

When she was a student at St. Mary's Academy at South Bend, Ind., the regulations prohibited all visits to the students by young men who were not relatives. But Joseph Fels would not let himself be deterred. When told that he came under the general regulations for visitors he interviewed the Mayor of South Bend to see if his influence could be brought to bear. Eventually the interest of the Father General of the Order was evoked and he secured for Joseph Fels a brief interview with Mary Fels. In the fall of that year they were married and came to Philadelphia.

Combined Travel With Study

The life of Mary Fels for the next 30 years was too closely interwoven with her husband's to be related apart from his. Their only child-a son-died in infancy. Together their interests in humanity developed year by year. Joseph Fels came more and more into public affairs, his wife always the silent partner. During the first years in Philadelphia, Mrs. Fels took a course in biology at the University of Pennsylvania. Her husband became interested in the vacant land movement in other cities and inaugurated the movement here. Business interests took him to Europe and Mrs. Fels always accompanied him. While he attended to the interests of his firm, Mrs. Fels devoted herself to the study, of the history of the country in which

she was temporarily located. Beginning in 1901, they made England their home for six months of every year. The depression following the Boer War had caused an abnormal number of unemployed. A deputation of women, backed by Mrs. Fels, marched from the Mile End to Westminster to present their protest to the House of Commons. The subsequent work done to mitigate

of the new high-speed transit lines, and it lacks only the approval of the Union Traction Company, The administration and the P. R. T. should be able to get together on the basis of this tentative agreement whether the Union Traction Company co-operates or not, and the mooner they do it the better it will be,

It is to be hoped that those who ose, for reasons of their own, to sneer at the special training of colleges will moderate their criticisms when they read of the work of Doctor Rosenau in seek ing for a remedy for infantile paralysis and consider also that many of the doctors engaged in fighting the epidemic are college-trained men. These, too, have their place and their use in our society.

Dr. John Louis Haney, succeeding to the post of Dr. Ernest Lacy as head of the Department of English at the Central High School, brings to that posttion certain qualities which were subordinated in his predecessor. In training and in disposition Doctor Haney approaches more closely to the normal type of teacher of literature, and his great ses at Central must be ascribed to which the lack of change of air and scene the fact that he surpasses others at their own work. Doctor Lacy stood alone, outside the type. Doctor Haney's superfority is all within the usual limitations. Among schoolmen his reputation is great and in the school he is highly popular. He will maintain the dignity of the English department at Central and add much to the solidity of its teaching.

-

The skirmish and impending battle on Villistas and Carranza troops confound utterly the many reports of a rapprochement between the First Chief and the First Mischief of Mexico. More than that, they may serve to bring into closer and more amicable relations the governments on either side of the Rio Grands. The Administration seems pledged to Carranses, and if the latter cannot effectually cos of bandits and rebels, he has at his disposal the willing arms of the United States. Such co-operation would no more violate the integrity of either sountry than door the presence of British roops in France. The Villisias are comaton enemies, and common cause can be unde against them. Meanwhile, in Wishiuston, there is a disposition to conthe the rehabilitation of Mexico entire. It is a nopeful sign that Ambassador fedignate Fielcher has been called into ference, and if this country could send in at once it could afford to withdraw transfa with honor. A hundred milan dollars is moded for the beginning is eministruction period and those an dest the entery furnitation to all prover their families.

ical authority declares his belief that the horse fly carries the germ. A dead horse lay for days near that congested district in Brooklyn where New York's epidemic started. Dead dogs and cats lie in the street this day in Philadelphia where children, who must play, must needs play amid reeking rubbish-if, indeed, that can be called play which is the kicking about of a tin can from gutter to car track, where the motorman's heart is in his mouth as he cleaves swarms of shrieking little citizens who do not know they are sick. Mysterious as infantile paralysis may be, there is one prophecy a layman can safely make: that if there are more cases of it here the great majority of them will be in such dirt-infested neighborhoods as these. For the children there are already sick, in the sense of the word "sick" as it is used by the wellto-do. Paleness, poor appetite, listlessness, "nerves," morbidness of mind and body-any one of these brings the doc

tor to the nursery of the well-to-do. They are the "normal" conditions of the tenement children.

The city cannot stop with the establishment of the new playgrounds; there must be still more. Also, it must begin to think at once of other methods of son and Mutual Life Insurance Jackson. abolishing that menace of semi-sickness keeps hanging over us. Eventually it must on a grand scale co-operate in or take over entirely that work which is done by the Children's Country Week Association. It must plan a wholesale 90s). summer exodus to country and shore to rehabilitate children who suffer not from hunger, but from something worse inability to get hungry. Stand at the schoolhouse gate and see

800 little boys and girls come trooping out into the street. They are Philadel phia-the Philadelphia that young men will see in their middle-age, middle-aged men see in their old age. They are the future citizenry. And the Pied Piper with his terrible music is ever ready to spirit them away as easily as vermin.

A TIME FOR YOUNG MEN

THE decision of the War Departmen I to excuse from service those mem bers of the National Guard who have families dependent on them is made in the interests of humanity and of economy. It is likely that the economical considerations carvied the greater weight. There is a strong sentiment in Congress that the Government should pay to the dependent families of the guardsmen \$50 a month. It would take millions to meet the bills, and the Government has no millions to spare. There are young men in the country, however, who can serve the nation at the front without taking money from the public treasury to support two have been pointing to the incredible | or three people at home while they are of Maxima as a reason for sving away. there is a prevalent belief that swimmers who have disappeared have been killed by them. The theory that they suffered from cramps and were drowned is rejected for the more picturesque theory that they fell

mer off the coast between Hastings and Fair-light on the way to a smack about 400 yards from the shore felt some kind of a Since two bathers have been killed by a shark off the Jersey coast within a week of each other there is likely to be less skepticism about the existence of manbig fish rub against his left leg when about 100 yards from the boat. He yelled and struck out wildly. Immediately his left arm rubed against the same fish. He coa-tinued to shout and swim as fast as he could. He managed to attract the attention of some men in a small boat but before of some men in a small boat, but before they could reach him the fish scraped against him two or three times more. The men in the boat saw it and said it was a

the boys to dive in the shark-infested water about 10 years ago. When his occupa-tion was gone the diver confessid to a traveler that his leg had been cut off by the travoler that his les had been cut off by the revolving propeller of a steamer from which he was not able to get clear. Thus what was long regarded as an authentic case of maining by a shark lost its auand of July and August they have in a sea-son of July and August they have in a sec-into the deep water away from the others. The wisdom of this advice is apparent when it is recalled that both swimmers who were attacked off the Jersey coast were in deep mater alone. There is on record, however, the case of a boy who was badly bitten by a shark in the harbor of Sydney, Australia, in 1895. His cap had been blown into deep water where the swimmers soldom ventured for

water alone.

to the Spanish-American War? D. S. B. The Spanish-American War began with the declaration by the United States April 15, 1535: the Maine had been sunk in Ha-vana harbor February 15. It was largely the popular clamor over that event that brought about the war at that time, but McKinley and Cleveland had both remon-strated, to no avail, with Spain over the situation in Cuba, ever since the outbreak of sorious rebeillon there in 1836. In the congressional resolution of April 19, 1898, preceding the declaration of War, it was stated that "The people of Cuba are, and of right ought to be. free and independent," and the demand was made that Spain with-draw her troops from the island; if not the Finited States would halp the Column. Upon the refused of the Spanish Government to do this war way declared fear of the sharks. He was attacked and died the same night from hemorrhage of the wounds. Sharks appear in English waters, hat there are no authentic records of stiacks upon human beingra, sithough

the troubles of the poor developed into farm colonies, financed by Mr. Fels until the Government took them over. 2. Dominicans are inhabitants of Santo Do-

This was the beginning of the public service rendered by the Felses in England. The Hollesley Bay and Maylands experiments followed, along, the same lines as the original one. 6. Victor Chapman, American aviator, was killed in the service of France,

The Fels home at 10 Cornwall terrace, became the centre of all those who were working for the good of humanity. The spasmodic benefit of any land scheme that held out only temporary relief was not sufficient. The road led them to single tax.

Their interests included more than the problem of the land. The suffrage movement in England in its struggle for democracy appealed to the sense of justice keen in Mary Fels. Both suffrage parties, the Women's Social and Political Union and the nonmilitant organization, knew her as a friend. George Lansbury, the first man to endure a hunger strike as a protest against the brutality of Holloway Jail, went to the home of the Felses to recuperate.

Gives Herself as Well as Her Money Joseph Fels died on the 22d of January, 1914. The first question that came to the minds of the single taxers of the whole world was whether his wife stood ready to keep up hid work. The answer came within a few weeks. Not only did she stand ready to contribute money as freely as her husband to the interest of single tax, but she offered her services as well. Since that February, Mary Fels has toured the United States and gone into Canada, speaking in the interests of single tax. ' This week her book, the biography of her husband, was put on the book stalls. But the struggle for economic justice has not engrossed all her time. When the Ford peace party was enrolled, Mrs. Fels was urged to become a member.

"My motive," Mrs. Fels has often said, "in joining the expedition was a general impulse to take part in a movement to ward internationalism."

In the conference of delegates of neutral nations that followed in Stockholm, Mrs. Fels was made a member for the United States of the Permanent Board of Conciliation. The Zionist movement, its aim to establish a centre of Jewish culture in Palestine; is also able to count

Mrs. Fels as one of its strongest members. At the convention recently held in Phitadelphia Mrs. Fels stated that she was ready to contribute to State or country to introduce single tax principles.

"But," said Mrs. Fels, "I will not back up a single colony in the midst of other colonies. If a Jewish nation is at any time ready to carry out the principles of single tax, I should do everything I could to help." ZR

TRUE TALK

Politics in the army is worse than shrapnel from energy Taileries -- Chicago Tribune

Editor of "What Do You Know"-There is some dispute about who will be the "next President." Some say that he will be either Hugtes or Wilson, but I am told by some that the "next President" will be the Secretary of State, acting for either of them for 3d hours. Can you throw light or them, for 24 hours. Can you throw light on victims to the horrible man eaters. The fact that sharks appear in the waters is undoubted. In the summer of 1876 a swimthis? this? G. D. C. This question arises from the fact that March 4, 1917, falls on Sunday, but accord-ing to a precedent there will be no time be-tween the end of one term and the begin-ning of the other. There is no reason why the oath of office of the President must be taken on March 4. In the previous case, the oath was taken on March 3 and the formal inauguration occurred on March 5, the new President being technically in office over Sunday. Presumably that course will be followed next year, whoever is elected.

eating sharks. Men of science familiar with the habits of this big fish have doubted all reports that they are in the doubted all reports that they are in the habit of attacking swimmers in the sea. There was a diving boy at Aden a few years ago who resped a rich harvest from travelers by the story that a shark bit off one of his legs while he was diving for coin. The travelers would throw more coin in the water and watch with bated breath to see if another shark would atlarge blue shark. It had been pursuing usual course of its kind in swimming ab breath to saw if another shark would at-tack him. The British authorities forbade what it thought might be a meal, nosing

and rubbing against it to discover what was like. The man was doubtless say saved by his shoutings and spinshings. The shark is a timid creature. It soldom gets into shallow water. The advice given to Eng-lish bathers is that during the shark sea-
