

NANCY WYNNE CHATS ABOUT THE ANNUAL SILVER BAY CONFERENCE

Ten-Day Affair Is of Remarkable Interest to Those Who Attend These Meetings—Many Philadelphians Present This Year—Returned Yesterday

THE annual Mission Class Study Conference, which is held at Silver Bay, on Lake George, N. Y., every July, has finished, and its attendants have returned even more enthusiastic than in other years. In the first place, Silver Bay is one of the most ideal spots in upper New York, and the swimming and tennis playing are great attractions. Of course, the mornings were given over to the various classes, and the lectures were so interesting that very many wished there might have been some in the afternoon as well. Among the girls who attended the conference this year were Elise and Eleanor Hopkins, Gertrude Ely, who goes nearly every year, and the two Hensel girls, Edwina and Alberta, whose engagement to Joe Pew, Jr., is announced today. Dr. Wharton Smith, who is Edwina's fiancé, was also up there, as was Marion Toulmin, Winifred Clarke and her cousins, Agnes and Louise Clarke, who instead of returning home here have gone on to Lenox, Mass., to visit the Thomas Shields Clarks, of New York.

The latest excitement at Lenox has been the cause of much conversation over the teneues. Just as the bathers were about to take a swim in Lake Mahkeenac on Wednesday, who should appear in company with his fond owner but Prince Chin Chin—in other words, the pet monkey of Miss Beatrice Bishop, who was desirous of deporting himself in the waves. The beach was crowded with bathers at the time; and, passing strange though it may seem, not one of them was anxious to go into the water at the same time as the Prince. Furthermore, no one was willing to forego his or her bath, so you will grant something had to be done and done quick, for the Prince did not need as much time as the other bathers to divest himself of apparel and don a bathing suit.

Lenox decided it would stand for "no monkeyshines," so to speak, and just at the critical moment the club steward, who always has to do the unpleasant work—doesn't he?—approached Miss Bishop and gently—but firmly, let me tell you—reminded that it could not be done. So a sadder but wiser monkey and owner returned to the house, where Prince Chin Chin took his bath in the solitary grandeur of a tub.

One of the interesting affairs to be held at Newport next month will be the Garden Fete, which is to be given under the auspices of the Newport Art Association, on Thursday afternoon, August 3, at the Griswold Mansion. A platform will be erected on the lawn and a cycle of classic dances will be given by a number of prominent girls. Later in the afternoon there is to be general dancing in the open air and in the salons of the mansion.

At Narragansett tennis is still the rage, and every day sees the lawns of the Point Judith Clubhouse crowded with interested spectators. Mr. and Mrs. John R. Fell, Mrs. Aleck Brown and Phil Randolph, Jr., lunched together at the Casino on Thursday.

Kitty Penn Smith, in her riding togs or sports clothes, is constantly on the ward. I wonder why Kitty has not taken to the racquet as she has to riding. Somehow you cannot think of Kitty save on a horse. I remember the first time I saw her in conventional evening dress I did not recognize her at all. Kitty's a good sport, all right, and mighty popular. NANCY WYNNE.

A 12,000 Horse Power Man

You ask, "What has this to do with me as a buyer of tires?" Just this—by such savings at the Firestone factory we cut down the cost of tire mileage for you. Instead of paying 30 cents or more per ton for feeding coal, we install equipment that feeds for 4 cents a ton. One man feeds hundreds of tons a day that develop 12,000 horsepower.

Firestone

Tires It is equipment and efficiency of this kind throughout the Firestone factory and branches that give you exclusive quality at ordinary price in Firestone Tires. One 12,000 horsepower turbine instead of a battery of small ones; buying from plantation and shipping direct; equipment for calendaring and cutting 84-inch fabric instead of the narrower widths; scientific distribution through branches by car load or trainload. These are some of the ways Firestone takes the cost out of overhead and puts the quality in the Tire. You profit through more quality—more mileage for less money.
