Would it not be fitting that your newspaper, as one interested in the welfare of the community, should make known to the public the true state of affairs 'n this city? If the situation was generally known, and the danger appreciated, I feel sure that such a public sentiment would be aroused that some remedy for the evil would quickly

be provided. DR. HORATIO C. WOOD, JR.

TAST Saturday Coroner Knight, following an inquest into the death of a drug addict, addressed one of the proprietors of the notorious "Arsenal" as follows:

I cannot see why you continue to run this infamous place. It is a menace to our city. The influences of your resort are corrupting hundreds of our young are corrupting hundreds of our young men and women. These influences are spreading the drug curse in Philadel-phia. This place should be closed. It should be burned down if no other way can be found to blot out this cankerous spot. No time should be lost in nailing up the doors and win-dows, so that no more young men and women can be ruined there.

Many months ago the attention of the EVENING LEDGER was directed to the

drug evil, and earnest citizens requested this newspaper to undertake a study of friends, who pathetically protested that Noyes wanted "to go for to be a soldier," the situation, with a view to focusing but was rejected because of faulty eye public attention on the necessity for remedial community action and making sight. This can be done and will be done, we trust, by the next Legislature and the next Congress. The second objective, involving the rescue of addicts, is the establishment of a free hospital in which they can be treated by experts. It is the function of a newspaper to afford that publicity which will acquaint citizens generally with conditions that are a menace to society. It is a function which is often distasteful, particularly in cases where the social disorder is pronounced and gangrenous in character; but it is a function, nevertheless, which must be performed courageously. To fight for better transit facilities, to urge the adoption of modern methods in the financial and general conduct of the water works, to advance the cause of good housing and to encourage the beautification of the city and other enter prises which will make this a better as well as a greater city-all these are functions which command the earnest attention of the EVENING LEDGER at all

The stories differed in detail; they agreed in the essential thing. Soldiers, in this modern age, had seen angels perform a miracle.

Alfred Noyes's Attack Resented by Ba lievers in Fair Play

To the Editor of the Evening Ledger: Sir-Mr. Alfred Noyes in the Evening LEDGER, makes quite a desperate attempt to blacken the reputation of the Irish-man who lost their lives in the last LERDER, makes quite a desperate attempt to biacken the reputation of the Irish-men who lost their lives in the late up-rising in Ireland. Pearse, Plunkett, The O'Rahilly, Casement, McDonald, McDon-ough and the other leaders of the Irish-movement, as even the reports from Bin-land admitted, were men of high talent and education, all more or less of publis position. Some of them held chairs in colleges and universities as well as your friend, Mr. Noyes, Living, not a word could be said against their honor; dead, they are the mark for Mr. Noyes, who tries to describe them as "Irishmen of the very lowest and violous personal character." England, having killed their bodies, it seems, would now endeavor to destroy their reputation. It will not, however, change the opinions of those who believe in an independent Ireland and who honor the Irish dead.

UNFAIRNESS OF ALFRED NOYES. To the Editor of the Evening Ledger:

To the Editor of the Evening Ledger: Sir-I am surprised that your paper should print such a libelous statement as regards Ireland or her people as appeared on August 31 without first acquainting yourself of the fact as to its truthfulness. This letter of the person who styles himself Mr. Noyes and holds a responsible position in a school of learning should not be al-lowed to pass unanswered. I have lately arrived from the scenes of which Mr. Noyes speaks and challenge him as to any such occurrence ever having taken place. He first mentions the diary of poor Casement occurrence ever having taken place. He first mentions the diary of poor Casement as filthy. Will he tell us about the filth? No, he can't. He classes the leaders and men of the late rebellion in Ireland as of the lowest and most criminal character, Patrick Fearse was a master of arts and a well-known writer. He was the president of a college. His brother held a like post-tion. Then the learned McDonough, the writer of plays: Skiffington the editor. I suppose he would call Washington, Patrick Henry, Sullivan and the rest of our countrymen who fought for freedom cowards also. He speaks of Castle Bellingham. I happened to come from there a short time ago, and if any-thing like that which our friend speaks about occurred I think I would know about it, as I had more chance than he. There was no such thing as Mr. Noyes speaks of about the carter in Stephen Green. All the to help their poor in arms, the men f Washington and IERICAN GIRL.

n a Fox Chase street car had consulted a physician in advance some other way of moving the child would have been found. It ought not to be necessary to remind other parents of the importance of calling in a doctor as soon as the baby gets ill. The trouble may not be infantile paralysis, but all the efforts of the health authorities to protect the well will be nullified unless they have the co-operation of the people. There is need of an active social conscience just now. It is a better prophylactic than all the quarantine regulations.

While it has been asserted that no young man refrains from entering the Christian ministry because it is not well paid, the impression seems to prevail that when the Episcopal Church succeeds in raising its fund of \$5,000,000 as the basis of a pension system for clergymen the ministry of that church will be strengthened. There can be no two opinions on the duty of every church to take care of its preachers. The man who spends his life in the service of the nation as an officer of the army is cared for in his old age. Certainly those who serve the Prince of Peace should not be compelled to face the infirmities of years with dread of want disturbing that sweet screnity with which they should be enabled to face the end.

-

Mr. Wilson's gifts of expression qualify him admirably for the permance of such functions as that in which he participated at Hodgenville, Ky., yesterday. His tribute to Lincoln was graceful, genuine and satisfying. It is doubtful if any other man in public life could have done it better. And it way especially fitting that the tribute should be paid by a mun belonging to the party which fought Lincoln with bitterness during the years when he was bearing the heavy burdens of his office. We unber Lincoln now, not as a Republican but as an American, and we are all proud that America can produce such a man and then give him the opportunity to serve it. So it was not as a Democvat, but as the official representative of the nation, that Mr. Wilson spoke, doubtless with as much pleasure to himself as gratification to all who heard or read what he cald,

By imperceptible degrees a change has taken place in the attitude of the people of this country toward the outto of the war. About sir months ago there were still many who believed that Germany could get something better than a draw. Now the question of even many codlections is, How badiy will Germany beaten? T IS significant that the Democratic Administration is very much in favor of high wages. It seems to recognize that the American workman, whether in a mill or on a railroad, wants a good wage for his labor. So it proceeds to legislate such a wage into the pocket of one class. Doubtless it would like also to legislate a higher wage into the pocket of every worker. But even Congress knows that cannot be done. It would not be constitutional, and certainly the economics of the situation would not permit. Prosperity cannot be legislated into a country in that fashion.

But contrast with the Democrat method of procedure the method of Republicans. "We shall not try," says the protectionint, "to decree a particular wage to any man. The industrial fabric would soon break down under such a system. But we do propose to enact such tariff laws that American manufacturers can afford to pay maximum wages. We do propose to prevent the competition of American labor with pauper labor. We do propose to assure a domestic market for domestic products at a fair price." And the higher the wages of the mill worker the higher the wages of those about him.

In the one case we have high wages decreed for a special class by special enactment; in the other case we have inwa devised to produce an economic situation which will induce fair wages automatically and naturally, with the benefits well diversified and reaching all

That a miracle had saved the British on that awful retreat can be said without fear. But this story of the angelic host was a little too circumstantial to be taken all at once. It was not until Mr. Machen told the whole truth that the world knew how that story came to be told.

How "The Bowmen" Was Written

An ardent patriot, a Welsh mystic, a medievalist by all his inclinations, Mr. Machen was terribly impressed by the story of the retreat from Mons. "I seemed to see." he writes, "a furnace of torment and death, and in the midst of the burning was the British army-in the midst of the flame, consumed by it and yet aureoled

in it, scattered like ashes and yet triumphant, martyred and forever glorious. So I saw our men with a shining about them, so I took these thoughts with me to church, and, I am sorry to say, was making up a story in my head while the deacon was singing the Gospel." Indirectly out of that story came the tale

he called "The Bowmen." In a letter to the writer Mr. Machen

Mr. Machen is himself a deeply religlous man and believes in miracles. He says that so long as he believes that they happened once in Judea he can believe that they will happen in Flanders or in France. But the Britishers who took up his story and awore that it was true were just the men who scoffed at miracles be fore. The fact is that the story came at a peculiar moment in England's paychology. She not only did not know whether she was going to win the war; she actually was not sure in her soul that she was going to go into it for all she

Belgium's Neutrality T. S. R.—A treaty was concluded on April 19, 1833, between the King of the Belgians and the King of the Netherlands which contained the following sentence: "Belgium forms an independent State of perpetual neutrality." Of this treaty Prussis, France, England, Austria and Russia declared them-selves guarantors. This is the famous "Treaty of 1839." by which the Powers bound themselves to respect the neutrality of Belgium, and Belgium on her part was forbidden in case of war to take the part of any of the bellgerenia. This treaty was not a laying down of general laws, but a specific guarantee of the neutrality. In per-petuity, of one specific country. With this treaty the United States had nothing to do.
