feep-mouth'd welcome as near home.

Hughes would have done, but of what he's going to do, and that's a plenty. Pennsylvania manufacturers have to obey a more stringent child labor law

than the one about the meaning of which there is so much dispute. Professor Munsterberg, pro-Ger man, of Harvard, declined to attend the funeral of his colleague, Professor Joyce

pro-Ally, lest he be understood as approv-ing it. The report that Mr. Ford will put a cheap fuel on the market to keep pace with his new machine is encouraging It may be, after a while, that the things

will run on hot air. It will be time enough to believe nearly forty men have been admitted to the bar through fraud in the hat six months when proof is submitted to the Supreme Court.

We have no patience with those who assert that there is no strength in tion which could survive three years of Daniels must have the goods.

The French have shot a German man guilty of espionage, as the Germans shot Edith Cavell in Belgium, but the English papers have not yet begun to sunce the French for their barbarity.

Ambassador von Bernstorff wants It to be understood that Germany will pay no loan that Belgium may contract in the United States. It has not been understood that Belgium expected Germany to pay it unless through the indemnity which she must give up when the Allies win.

The plan of selling twenty-five car tickets for twenty-five cents may seem to the police to be legal and simple, but the most simple thing about it would Didn't they have a shoe-buying scheme of this sort, whereby a man could get a 23 pair of shoes for a few cents? The did, and those who were left holding the bag are still holding it. But there is one rn every minute.

Direct service between Philadel phia and South American ports will be inaugurated with a sailing on October 15. have no doubt that ample freight will be offered for the trips south. The success of the venture will depend largely the ability to secure return cargoes. and the increasing strength of our finan cial representation in South America should make that entirely possible.

A new epoch in German official refrom Berlin, "We were forced back through the villages." Hitherto the motto re seemed to have been, "Never conorder this week, as the Anglo-French drive gains momentum. The British or Friday captured more ground and took oners than on any single day big drive began. As they plow per into their foe's lines the task beeasier, as the Germans have not the time to construct adequate defenses.

Never has there been such a sat nails of tax-levying as in the last ar or two. Until the Wilson Administration came into power there was no such thing as burdensome taxation in the United States, certainly not in time of peace. We are rapidly becoming the most tax-ridden people on earth, in spite of unparalleled industrial prosperity. Mr. Ford alone, we estimate, under the new me tax law will contribute annually sury. Penalizing success may be I politics, but heretofore America has t opportunity, and opportunity has

About ten billion dollars' worth of alth is created every year on the rms. The prosperity of the country is mped up in the prosperity of the mms. Governor Brumbaugh is, there is, headed in the right direction when he ye, as he did at Clearfield, that "We not keep in mind the importance of iding our people close to the soil; we let conserve our rural life." If, as he id, within tan years the State has lost by per cent of those who till the soil, we had country per cent of those who till the soil,

n the west and the greater manufactu ing city of Philadelphia in the east, and there is a large non-agricultural population engaged in mining in both the west and the east. These people must be fed. We have the land which will proluce the needed food. We are building good roads to get the food to market. up to the farmers, instructed and guided in improved methods, to rise to the occasion and show what they can do.

THE GRAND JURY ON "DOPE"

AROUSED by the gravity of the situation, the Federal Grand Jury last Friday took unprecedented action in offering a written presentment to the Court in reference to the illegal traffic in narcotic drugs. It urged, in particular, the two things proposed by investigating committees and this newspaper, namely, the enactment of laws, both Federal and State, which will give the police better instrumentalities for the prevention of the drug traffic; and, secondly, the establishment by the State of an institution for the care of unfortunate addicts. The Legislature in 1913 provided for

a commission to secure a site for such a hospital, although the impulse behind the movement at that time contemplated the care of alcoholic rather than drug victims. This commission was intrusted with the expenditure of \$20,000. It has already secured a site. The location it wisely refuses to divulge, on the principle that not enough ground has yet been It is not a question of what secured and speculators would advance prices for adjacent and necessary plots were they informed in the matter. The last Legislature did nothing to

further the plans, owing, it appears, to a lack of funds. Nor is it apparent that the commission, which is still in existence, is particularly active. Its members seem to be rather surprised to learn that there is a "drug" situation. This is not altogether remarkable, in view of the fact that the spread of the evil has been somewhat stealthy. We suggest to the commission, however, that it would be worth its while to begin a comprehensive study, particularly of what such States as Massachusetts have done in the care of drug victims, with a view to submitting to the next Legislature the kind of report that cannot be ignored.

There are two things in which society is vitally interested; the prevention of waste and the recovery of waste. Efficiency in manufacturing first cuts the United States Navy. Any institu- down waste and then exerts itself in the utilization of remaining waste products. The first object of the State should be an effort to suppress the traffic in narcotics, and the second object should be to cure the victims. The traffic never will be entirely suppressed, and not more than a part of the victims will ever be cured. The most that can be hoped for is progress in each direction

It seems reasonably sure now that legislation of some sort will be enacted next winter. It is important that the statute conform to the recommendations of experts, police and medical, and that it be written in strict accord with the Constitution, so that no further halt in the ones, and presents these four wallpaper fight against the evil may result from designs for your consideration—but let it

THIS IS WHAT YOU VOTED FOR

I WAS inevitable that political macost of living. The price of everything else has gone up, so why should not the price of power follow suit? The demand on the city employes for an increase payment to the Republican City Campaign Committee means that the old standard of expenses has had to be abandoned. Now, why should not the city employes make the payments demanded? Elections are fought for the sake of the spoils. The workers deserve the offices for which they have fought. They are re warded for their services by appointmen

Is it not better that the syndicate the does our governing for us should be self supporting and maintain itself by an asessment upon the sums taken from the public treasury than that it should be deendent on the contributions which it car extort from outsiders who seek favor from it?

We know there are citizens who do no like this system, but they vote into power the men who do like it and when it is too late begin to object.

The Campaign Committee has a deficit and it needs funds for conducting future campaigns. To expect it to abandon its old methods is to doubt the high authority which has assured us that figs do not grow on thistles and that grapes cannot be picked from thorns.

ANY CHANGE IS FOR THE BETTER

THE failure of the combined county and State system to care for the insaue is notorious. There are eleven almshouses in the Commonwealth in which ineane paupers are maintained in disgraceful conditions. According to the men who made a survey for the Public Charlties Association "they are treated more as wild animals than as unfortunate hution and sympathy," and "they constitute a class of individuals for whom no possi ble future misfortune can have any te

"HEY, WHY DON'T YOU CONDUCT A DIGNIFIED CAMPAIGN!"

THE VOICE OF THE PEOPLE

Why the Clearview District Objects to the Way the Car Tracks Are Laid on Island Road-Jamaica Ginger and the Drink Evil-The Single Tax

ISLAND ROAD CAR TRACKS

To the Editor of the Evening Ledger: Sir—So many different accounts of the injunction proceedings taken against the Philadelphia Rapid Transit Company by the taxpayers, citizens and residents of the sixteenth division of the Fortieth Ward, as reported in the daily press, that I take the liberty of requesting you to publish liberty of requesting you to publish

It was incorrect, as stated in the news-It was incorrect, as stated in the newspapers, that the residents of this locality,
the part of the Fortieth Ward known as
Clearview, from Elmwood avenue and
Island road to Lyons avenue, objected to
a second track being placed on Island road,
nor were we concerned because the tracks
were laid twenty feet apart instead of
twenty-one feet six inches.

twenty-one feet six inches. But what was of most interest to us that from Elmwood avenue to Lyons avenue, on Island road, there is no sidewalk for the pedestrian.

or the pedestrian.

For a distance of several squares the tracks are laid on the extreme sides of the street, with a bank four feet high within two feet of the track. The bank is sur-mounted with a fence, and on the other side of the street, within two feet of the side of the street, within two feet of the track, there is a ditch from about two to three feet deep, and with also a fence on the other side of the ditch, and persons traveling the road from Lyons avenue to Elmwood avenue must either walk in the street between the track, or on the car tracks themselves.

tracks themselves.

By actual count taken for twelve hours on Saturday, September 3, there were 700 automobiles and teams, 425 cars and 1191 men, women and children passed through one square on Island road, from Buist avenue to Elimwood avenue, not taking into consideration the persons who must cross the tracks at Buist avenue to board the cars.

The tracks are laid on the road in such

The tracks are laid on the road in such a manner that teams cannot go on them should a congestion occur, for the reason that they are five inches above the street, with nothing between the rails, in the same manner as steam railroads are laid, a high rail instead of a fiat rail being used, or a flat grooved rail as is usual in city streets.

These are the reasons why we have objected to the operating of another track on Island road, and we are informed that the city of Philadelphia has granted a permit to the transit company to create these dangerous conditions, therefore, the traction company can proceed to kill and maim because of the permit granted.

If any of us gets killed or hurt through being on the track, out of the way of teams and automobiles, we have no redress—we have no right there, and if we get hurt or run over in the roadway, there is nothing we can do. Why? Because we should be on the sidewalk, and if there are no sidewalks, where, may I ask, are we to walk?

These are the conditions that have JAMES WARNER. Philadelphia, September 16

INSISTS IT IS A PANACEA To the Editor of the Evening Ledger:

To the Editor of the Evening Ledger:

Sir—Let us hope your designation of the single tax as a "panacea" was not give in an ironical or dispant manner. We claim it is a panacea for the evil of industrial savery, because, as all men must draw all their sustenance from land it naturall follows that if access to land is made easie and cheaper more land will be profitable used and the production of wealth would increase. This the single tax will do. Let us consider the situation of today. In a the large cities hundreds and thousand of vacant lots abound. No labor has even been expended on them, they furnish a shops, factories or homes to the community or customers for the existing capitalist and laborers, but the price asked by the owners may be very high, because these owners know that if the city continues a grow in population some one will pathe price to get the landlords out of the way, and then he can put the vacant lot to works in furnishing employment to be borsers and capitalists in creating shops.

of labor and capital and would levy a tax (to the extent of the full rental value) on the land. Land would then only show a profit to the holder when used. Competition among those who would use land would then be so great to employ laborers that industrial slavery would cease to exist. It would then be the employer, not the employe, who would go around hat in hand asking for consideration.

OLIVER M. KNIGHT.

Philadelphia, September \$.

THE DRINK EVIL

To the Editor of the Evening Ledger:
Sir—No sincerely minded temperance
man, realizing the blighting effect of the
drink habit and the terrible enormity of
the drink traffic, can read without some
degree of resentment Mr. Gilmore's letter
in the Evening Lenders of the 12th test in the EVENING LEDGER of the 12th instin its effort to bring into disrepute the temperance legislation which has been enacted
for the suppression of this monstrous evil.
Ill does it become any man these days
to attempt to defend strong drink. It has
long ago been repudiated by those who are
in a position to speak authoritatively upon
the subject, among Judges, phianthropists,
scientists, physicians, preachers, penal experts and criminologists, and it is a serious
reflection upon a man's intelligence these
days for him to question the evident justices
of the powerful indictment that society has
already placed upon the booze habit and of the powerful indictment that society has already placed upon the booze habit and the booze business. No one can plead ignorance of the formidable array of sins that lies at the door of the open dram shop. Mr. Gilmore's reference to the use of Jamaica ginger in Kannas is only too sad a commentary upon the shameful weakness of those who cannot or will not emancipate themselves from the demon of the still, but in the clutches of that demon are being inevitably dragged down to the death in perdition that knows no resurrection.

The good people of Kannas and other

perdition that knows no resurrection.

The good people of Kansas and other States who uphold and sustain the salutary prohibition laws, and the people who resort to any dangerous expedient to gratify their unnatural passion for the destroying stuff are not one and the same people. The former are the conservators of the best interests of the State, its welfare, its morais, its progress, its heaith, its happiness. The inter are the debauched, mania-potu victims of a victous demoralising system that long before this should have met its doom at the hands of a free, enlightened Christian people. Kansas wants to take no back step on this question. There may be some few alcoholic degenerates in Kansas, as elsewhere, who openly, publicly, as well as surreptitiously, override all the safeguards that society has piaced in their way to prevent their headlong rush to destruction. It is only too sadiy true that after society has done its very best to save men from disaster, there still remains enough of the initiative to the ill-disposed as to It is only too sadiy true that after society has done its very best to save men from disaster, there still remains enough of the initiative to the lil-disposed as to enable the latter to wreak misery, wee and disaster upon themselves and upon others as well. Never will such conditions ever obtain in any state of society that will transfer the character-making factors from the individual himself to the corporate body of the State. But one question I should like to ask our friend Gilmore, and it is this, how can any man professing any regard for the welfare of his brother-man ally himself in an attitude antagonistic toward those forces that are calculated to conserve the highest good of the people, to shield and safeguard the weak from their own self-destructive, suicidal hand, and save the innocent and the helpiess from an endless amount of sorrow and suffering?

WALTER W. HUBBARD.

Philadelphia, September 15.

5. Parthenon; the temple of Athene the neeball has gradually evolved during a cen-tury. What is said by some to have been virtually the same as the modern game was played in 1833, but most authorates give the date for the beginning of the national game as 1852.

Reserve Banks

R. A.—(i) Every national bank is required to become a stockholder in the Federal Reserve bank of the district in which it is situated, and any State bank or trust company which complies with certain specified, requirements is permitted to become a member bank. (2) Each member bank is required to subscribe to the stock of the Federal Reserve bank of its district in the amount equal to six per cent of its paid-up capital stock and surplus. The Federal Reserve bank does not do business with the public in the sense that banks usually do. It is made a depository for a certain proportion of the reserve of all the member banks, and, in addition, may also be a depository for Government funds. An important function is as a bank of issue and redemption of currency, for it may secure from the Treasury Government notes known as Federal Reserve notas, which it is authorized to issue against commercial paper with a minimum gold reserve of forty per cent. Besides this, Federal Reserve banks are granted certain powers in the matter of operations in the open market, such as the purchase of commercial paper, foreign exchange, etc., and in a general way are expected to perform important functions as clearing houses between their member banks.
