

WHEAT IS NERVOUS,
BUT CLOSES HIGHER

Conflicting Cables on Damage to Crop in Argentina Causes Uncertainty

GRAIN BELT WEATHER FORECAST

CHICAGO, Oct. 4.—The weather forecast for Saturday follows:

Fair tonight; slightly warmer than Thursday afternoon or night; probably fair and east northwest tonight; overcast, mostly cloudy, east winds and east winds.

Fair tonight except probably scattered extreme low pressure; probably fair and north central today; probably fair and west.

Minnesota generally fair tonight and tomorrow; lightest extreme east winds.

North Dakota—general fair tonight and tomorrow; lightest extreme west winds.

South Dakota—general fair tonight and tomorrow; lightest extreme west winds.

Wyoming—fair Thursday and north and west.

CHICAGO, Oct. 4.—There was a good market today and price movements regular, but the ton final was firmer, quotations showing above yesterday's close. Business was quite active. Much uncertainty was caused by conflicting cables regarding the weather in Argentina.

Some advice said that rain had fallen in that country, while other messages stated that no rain remained unbroken; that rains were injuring the crop also and that situation was becoming increasingly uncertain. Some authorities asserted that probable damage had been done.

The market at Liverpool was stronger and it is believed that prices in the United Kingdom must be very sensitive to the news from the southern hemisphere, owing to the fact that contributions had been looked toward to that territory.

Reports of peace overtures in Europe were circulated from the seaboard.

Following some irregularity at the outset the market weakened on claims that the war in Argentina had been discounted.

At the same time, however, there was considerable buying by eastern interests and some western speculators purchased on break and sold freely on bulges. Declines in prices, however, were all regained on a covering movement, due to evidence of a demand for exports.

The market firm on reports of a better demand for the cash arrivals at points in the interior. There was excellent buying on local account, largely elevator concerns, and there was a further call for export. Dealings in oats were fair but scattered.

The market higher. After the close it was estimated that the sales for export exceeded \$60,000 bushels.

Market future ranged as follows:
