industrious sheepcomber, others that this paternal parent was an itinerant peddler, a vagrant, a cheat and a juggler. We were taught in school that Christopher was a genius far ahead of his time, whose superhuman perspicuity penetrated the secrets of physics and geography. But his fellow-Italian, Cesare Lombroso, the now go to both Seville and Santo Domin most famous anthropologist of modern go before being sure that they have vis times, branded him as a lunatic, who suf- ited the hallowed spot where lies buried fered from congenital paranoia, fixed ideas and religious illusions, who showed pronounced stigmata of degeneration; a "liar and boaster," who was "given to cruelty," a "profound ignoramus," whose "overwhelming conceit" caused him "to draw comparisons between himself and the Saviour," to announce himself as the Lord's representative under divine commission to discover David's treasure and Sepulchre, then rebuild the Temple at Jerusalem.

The deepest of the many mysteries that veil this remarkable man relate to the final resting place of his bones. Once when their profanation was threatened, they were hidden away so very carefully that no one has since been able to locate them exactly. It was all on account of that bold rover of the seas, Sir Francis Drake, that they got mislaid. When he came sweeping down upon Santo Domin go, in whose cathedral they lay, the archbishop of that city ordered that all of the tombs be covered with earth. Those were days of ease and indolence and no one troubled himself about uncovering Co lumbus's tomb until after the last one who knew the secret of its location had sought his own final resting place.

So the remains of the discoverer renained forgotten until Spain ceded Santo to the cathedral for his illustrious an cestor's ashes. After considerable search ing about among musty tombs, a small vault was opened and some pieces of bone and dust found inside were placed in a case of gold and lead. A High Mass was said over them and they were trans ferred to the Cathedral of Havana that they might still repose on Spanish soil. No one doubted that these transplanted remains were those of Columbus until 1877, when, in the course of repairs back at their former resting place, the old Santo Domingo Cathedral, a vault was opened in the space adjoining that from which they had been taken by the Spaniards, eighty-one years before.

The new archbishop, poking his arm into the dark, moldy hole and finding there a well-preserved leaden case, sum moned the President and Cabinet of Santo Domingo, as well as all of the other local dignitaries and foreign consuls. In their presence he had the leaden casket removed and inside were discovered dust, human bones and a bullet of lead, while upon the casket were found certain letters, interpreted as abbreviations arranged to denote that Christopher Columbus and no other lay within. So it was immediately announced that the remains taken to Havana in 1785 had not been those of Christopher, but of Diego Columbus, and that the great admiral's hones had, after all, remained in Santo Domingo, in conformity with his deathbed request. Domingo, as well as all of the other local
