

DU PONT'S WILL CONVERT POWDER MILLS INTO DYE PLANTS AFTER THE WAR

The du Pont Powder Company and the Aetna Explosive Company have decided to turn all their auxiliary factories to manufacturing dyestuffs just as soon as the demand for explosives and munitions becomes normal. This will give the American dyestuffs industry a tremendous impetus, according to Department of Commerce officials, and if other plants, enlarged because of the war, demands, follow suit, the United States will be in a position to compete with Germany in this field. The photograph shows millions of dollars' worth of alcohol stored in tanks at the du Pont plant, which will be utilized in the manufacture of dyes.

Prominent Suffragist Working for Wilson

Miss Maud Bassett Gerham, president of the Pennsylvania College Equal Suffrage League, is actively supporting the re-election of President Wilson. Miss Gorham is one of a committee that is endeavoring to win the support of Progressive women who indorsed the Roosevelt candidacy in 1912.

THIS GROUP OF BUILDINGS WILL BE TURNED INTO PEACEFUL WORK

The sorting house at du Pont's, in which the various grades and qualities of powder are sorted, will be included in the reorganization of the plant after the war, when the powder works will undergo a metamorphosis that will make it chiefly a place for the production of dyestuffs rather than explosives. It was near this house that four men were injured recently in a powder flare that destroyed two carloads of powder in a spectacular blaze.

SON OF ONE PRESIDENT MEETS SON OF MAN WHO MAY BE ANOTHER ONE Theodore Roosevelt, Jr., at the right, was very much in the company of Charles Evans Hughes, Jr., at a luncheon given by the Hughes College League at the Lawyers' Club in New York recently.
