

WILSON DELAYS ACTION IN ATTACK ON MARINA UNTIL HE GETS FACTS

If He Learns Ship Was Torpedoed Without Warning Then He Will Shape Drastic Course

CASE CONSIDERED GRAVE

NEW YORK, Nov. 2.—President Wilson will take no action on the loss of American lives through the torpedoing of the Maxia until all the facts are before him.

WASHINGTON, Nov. 2.—The State Department today gathered the facts in the Marina case and withholding what it learned from all inquirers save President Wilson.

The President was kept in constant touch with every development, at his own request. He will be the first advised when Berlin's response comes to the Department's request for information.

From the American Embassy at London and the Consulate at Queenstown, the State Department sought data, not only as to the question of whether the Marina received warning before she was torpedoed, but as to the armament she carried and her relation to the British Admiralty.

It is believed the Marina was not in any sense in Admiralty service, as such service has been construed by this Government. She was not manned by a naval crew.

BERLIN, Nov. 2.—There is virtually complete absence of fears in official circles that the sinking of the British freight ship Marina will endanger relations between Germany and the United States.

There has been no report from any commander of a U-boat which may have sunk the Marina and it is regarded here as entirely possible that the vessel may have struck a mine, as was the case of the Atlanta.

It is unlikely that any German submarine operating in the vicinity of the spot where the Marina went down would be heard from before the middle of latter part of next week.

The submarine are in constant touch with their bases, but make no report on ships sunk until they get back to their home base.

The United States Embassy has been assured that it will be supplied with the facts as quickly as they can be obtained.

GENERAL YOUNG CALLS MEETING ON DRAFT BILL

Association for National Service to Discuss Moseley Plan for Naval and Military Training

Lieutenant General Young, president of the Association for National Service, an organization devoted to the principle of military training and equal service, has called a meeting of all members of the association, together with all members of the National Advisory Council residing in this vicinity.

The Moseley draft for a military and naval training bill will be thoroughly examined, and it is likely that the conference will adopt a resolution endorsing the main features of that draft.

It has been the policy of the Association for National Service not to favor any legislation for training of army or for navy, unless such legislation had received the approval of the general staff of the army and the general board of the navy.

The conference in this city will be followed by others in various parts of the country where the association has members.

Discover Vein of Rich Copper Ore

PORT ARTHUR, Nov. 2.—The discovery of a large deposit of rich copper ore at Mine Center Rocky Islet, eighty-four miles from here, on the Canadian Northern, is causing considerable excitement.

Spot Wheat Quiet at Liverpool

LIVERPOOL, Nov. 2.—Spot wheat was quiet today, No. 1 Western winter quoted at 11s 7d, a decline of 1d, and No. 1 Northern Manitoba at 11s 3d, a loss of 1/2d.

FORT VAUX WON BY FRENCH; GERMANS FORCED TO EVACUATE

Centuries from Page One

BERLIN, Nov. 2.—The War Office gave out today the following report on the situation along the Russian front:

In the eastern war theater, Prince Leopold's front in the army group of General von Linington, Westphalia and East Prussian troops under Major General von Dittfurth's command

ITALIANS RESUME BATTLE

FOT TRIESTE; ENEMY CARSO LINES FURIOUSLY SHELLED

ROME, Nov. 2.—The weather having cleared, the Italian offensive has been vigorously resumed from the southern Carso, says a Stefani News Agency dispatch from the front today.

Condemnation of the Democratic handling of the tariff situation is freely expressed in many of the letters. There is a strong demand for a tariff law which will guarantee continued extension of business and the payment of good wages to employees in all branches of industry.

First, is there at present any tariff duty on the product manufactured by you?

Second, if so, does the rate furnish satisfactory conditions for the operation and extension of your business and the payment of good wages to your employees?

Third, if not, do you think any rate is needed for these purposes?

Fourth, do you feel that the present tariff is necessary to insure the operation of your plant with a fair living and so as to pay our employees a satisfactory wage after the war is over?

There is no question about it but that a substantial revision of the present tariff is necessary to insure the operation of our plant with a fair living and so as to pay our employees a satisfactory wage after the war is over.

AMERICAN FIGHTERS IN ENGLAND'S ARMIES LOSE U. S. CITIZENSHIP

State Department, Rules They Expatriate Themselves When They Swear Allegiance to British Crown

DIPLOMAT'S SON AN ALIEN

WASHINGTON, Nov. 2.—Any American who fights for England in the present war expatriates himself. The State Department made this clear today in connection with its action in refusing a passport to Theodore Marburg, Jr., of Baltimore, who is returning to England to rejoin the Royal Aviation Corps.

Expatriation results from the fact that all British soldiers must take the oath of allegiance to the British Crown—which, in the case of Americans so doing, wipes out their allegiance to this country.

As for Americans fighting with the foreign legion of the French army the department made known that the burden will rest upon them to prove the oath they have taken has not expatriated them.

Even after peace is declared, it was said by the department, men who have served in the armies abroad will not be granted passports to travel abroad as American citizens. Those who return to this country in destitute circumstances will be treated as ordinary alien immigrants, subject to deportation if without relatives in this country to support them or without means of livelihood.

It was learned today also that the State Department has suggested to the French Government that it discontinue referring to the American aviators with the French army as members of the American corps, owing to the false light in which such references place the United States as a neutral nation.

In the case of young Marburg, his sister, Madams Starckenborough-Stackover, wife of the secretary of the Dutch legation here, said he would sail for England Saturday, expecting his papers as a British officer to guarantee him entry.

KINCAID, FOR CONGRESS, BREAKS ELECTION RULE

Pennsylvania "Dry" Candidate Fails to File Campaign Account on Time

WASHINGTON, Nov. 2.—The hard fight being conducted by the two great political parties for control of the next Congress has resulted in careful investigation of the qualifications of the various candidates, as well as a checking up of their expense accounts filed with the clerk of the House of Representatives, as required by law.

Examination into accounts filed by Pennsylvania candidates reveals few errors. One, however, was uncovered today in the case of W. W. Kincaid in the Twenty-fifth District, composed of Erie and Crawford Counties. He was a candidate for Congress in the Washington party and had filed his account on time.

By an act of Congress of June 25, 1910, a candidate for the congressional nomination is required to file in not less than ten days before the primary a complete statement of his accounts. This Mr. Kincaid failed to do. The primary election of Pennsylvania was held on May 16.

Accounts were filed in the regular form for Kincaid's expense in seeking both the Republican and Washington party nomination on May 23, thirteen days after the primaries. An affidavit was filed also showing Kincaid's expense as a Republican party candidate.

In his quest for the Prohibition nomination he spent less than \$50. His expense on the Republican side was \$158.15. He spent \$147.70 seeking Washington party honors.

British Ban on Slag Exports

ST. JOHN, N. B., Nov. 2.—Great Britain has prohibited the exportation from the United Kingdom of basic slag, phosphatic copper wire and cables containing copper silk thread, it was announced today by W. E. Anderson, imperial trade correspondent here.
