"Electrical Week" Sees New Spirit Pervading Christmas-Time Shopping

Banta Claus may be compélled by the modernising indusace of electricity to make his christmaa five rounds by automobile de service d

trical Week.

One has but to walk along Market or Chestnut streats to find, even at midday, slong either side of the highway, an apalong either side of the highway, an ap-parently unending line of electrical dis-playe appropriate to the approaching Christmas season. Motioes flash down from tops of doorways of buildings, win-dows scintillate from feetboarde builts artis-loally disposed, while, if curjonaity attracts the stroller to the interior of the estab-lishment he finds himself in many cases surrounded by myriad electrical devices utilized in the holiday decoration.

EVEN CHRISTMAS TREES.

TO RAZE SUBWAY GUARD FOR MUMMERS' PARADE

> Construction Company Offers to Remove High Fence on South Penn Square

WILL NOT HALT WORK

Director Twining to Let Contract 102 for Transit Job Under City Hall

The Keystone State Construction Com-nany, through S. M. Swnab, chief engineer, announced today that it would remove the high board fence around the Broad street subway excavation at South Penn Spingre and Broad street on New Year's Day in order that there might be no interference with the big nummers jageant. The offer came voluntarily from Mr. Swash busy as the numers lad by John

The offer came voluntarily from Mr. Swaab just as the nummers, led by John Hainley, chairman of Councils' New Year Committee, had arranged to interest Sen-ator McNichol, head of the Keystone con-cern, in their cause and have him arrange for the temporary removal of the board fence. Mr. Bailey when told that the company had anticipated his request with a voluntary offer, extransed his delight and declared that both mumers and suscitators loclared that both mummers and spectators would appreciate the trouble taken by the construction company. The fence as it now stands is directly.

in front of the point on which the judges and reviewors' stand is always located for the parade. Also, the structure has so sur-tailed the available traffic space at that place that it would be virtually impossible for the large mummers' floats to pass WON'T HINDER WORK

The temperary removal of the fence w

The temporary removal of the fence whi-entail a slight cost upon the company, but it will not interfere with the work on the suftway, according to Mr Swaab, as the greater part of the actual work at that point is being done at night, when the wtreet traffic is lightest and when the sub-way-surface rate can be detoured over the work on these irface lines.

The engineers of the Keystone Company today pierced for the first time the massive cutside foundation wall of City Hall in connection with the work on the table and central station. The first opening was made just west of the southern entrance of City Hall At this point the foundation walls are ten fest thick. Temporary timber supports have been insorted in the hole and these will be replaced by immense steel stir ferm.

The wall will be pierced at points six The wan win the period at points at feet spirit between the point of the first excavation and the southwestern corner of the building. When the steel girders have been placed in each of these holes the entire weight of this section of the buildnog, which is estimated at 1500 tone, will be lifted from the present foundations and shifted to the girders, in order to per-nit the workmen to rebuild the new oil ide foundation walls

a discussing the general project today Swaab characterized it as the most gigantic engineering undertaking of its kind ever attempted in America. TO LET NEW CONTRACT

Tomorrow Director Twining will open hids for contract No. 162 under City Hall. This contract is in reality a subdivision of con-

Glau

# tract No. 101, on which the Experime Com-many is now working. The original con-tract was for 700 linear feet of work, and the price limit was \$2,000,000. Early this summer, when it was found that if would be necessary to rebuild the City Hall foun-dation walls at a cost far in excess of the contract limit. City Solicitor Connelly recommended that Director Twining reduce the contract SANTA FE GIVES MEN **10 PER CENT PAY BONUS**

### Will Distribute \$2,750,000 of War Profits to Meet High Living Cost

recommended that Director Twining reduce the contract. The 760 linear feet of contract 101 was accordingly reduced to 405 feet and contract 162 will be for the remaining 293 feet. There is approximately \$946,000 attailable for this contract in the \$6,000,000 transit loan of last year, under which the work must be done. Of these loans \$2,000,000 was apportioned for the Broad street tube work and a similar amount for the Frank-ford "L." In addition, the overhead tharges of the engineering division of the transit Department must come from this lean money. The \$2,000,000 already under contract for the Broad street subway work would lears about \$1,000,000 for the new contract, but this has been reduced by about \$34,000 on account of the up-keep of the engineering division. SANTA FE. Dec. 6 - Directors of the Atchison. Topeka and Santa Fe Railway Jompany authorized a distribution equal to ten per cent of a year's pay to all its em-ployee in the service of the system for at least two years and whose simual com-poinsation does not exceed \$2500.

President Ripley, of the company, said that the amount to be distributed was esti-mated at shout \$2,750,000. He said that the railroad, "sepecially since the influence
