Is this another blow at Ireland's liberties?

Like all other spirits of distinguished men who have spoken before it, the spirit of Hugo Munsterberg that has conversed with a Boston lady is very commonplace in the matter of conversation. There is no mention of a German accent.

Even though we are rapidly becoming the world's banker, Frank A. Vanderlip, president of the National City Bank of New York, says we're "a nation of economic illiterates." We wonder what he would call some well-known financial committees!

The announcement that Mr. Asquith's daughter was enguged to marry an American was premature, not to say exaggerated and hyperbolic. We may be permitted to believe, however, that the wish of the reputed engagee was father to the report.

* Doctor Leuba has just discovered that learned men, as a rule, do not believe in God. It is still possible, then, to quote heartily from the gospel according to St. Matthew, "I thank Thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes."

They must be having hilarious times at the meetings of the American Association for the Advancement of Sci-

ruled, and there is always the bread truit, and one can alt on the bungalow porch all day and snoore. That is in temperate weather, just as the weather of the Klondike is in its way. One knows just what to expect in the north, oo; nothing can happen of the unexpected. One just keeps cold and thinks of gold in terms of gold, and not in terms of steel or even in terms of wives. Here the weather is like a Damascus blade; to be temperate is to be tempered, is to be able to bend nearly all the way to the right, and then flip over and bend as far to the left. The peoples in this girdle of exciting change are awake to war-but

J. The United States has taken an absolute and irrevocable stand on the submarine warfare question. 2. Germany has broken her pledge,

wittingly or unwittingly, on several occasions.

3. Ambassador Gerard informed the President that Germany is engaged in building a submarine fleet more formidable than any hitherto constructed both in power and in number; and that popular opinion in Germany demands a resumption of submarine warfare in its most ruthless form.

4. The American Government will send no more notes or ultimatuma. A resumption of submarine activity, under conditions banned by the United States, will mean a severance of diplomatic relations with Germany,

What the President has done is to deliver, under a diplomatic mask, a solemn and deliberate warning to the beliigerents, and to Germany in particular, that it is

time to take, an inventory, in which it can be set down as a definite fact that further disregard of American rights will mean certain American action.

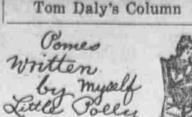

The note is, therefore, a solemn warning also to the American people, a warning that we are on the brink of the volcano, into which we may any day be plunged.

It would be folly not to recognize conditions as they are. It is a critical moment in our history, with great decisions pendant in the balance. We must be prepared, spiritually and otherwise, to meet the issue.

The number of cases of grip and pneumonia is increasing so rapidly that Director Krusen says an epidemic of both diseases is impending. He advises people to avoid crowds, overheated rooms and drafts, and to begin to take care of a cold at the start. The last part of his advice is most important, for the reason half of them moderate drinkers and half that few of us who have to use the street cars to get to business can keep out of crowds or drafts. A neglected cold leads to all sorts of complications. The best way to avoid pneumonia or grip is to call a physician in the beginning and follow his advice. If you give him half a chance he can break up the cold before it is too late.

The steadily increasing number of drug store robberies in all parts of the country has come to a point where there is little room for doubt that many of the druggists who report the theft of hundreds of grains of narcotics allow themselves to be robbed by "dope fiends" who pay them in advance to leave the "goods their counters and the door unlocked. Collusion of this sort is the easiest way conditions. to dodge the law which forbids the sale of the drugs without physicians' pre scriptions. The pressure put upon the druggists by the savage craving of the fiends is a tax upon character in its weakest links-pity and the desire for sasy money. Special Agent Di Giovanni's warning to druggists ought to have results at once. It is simply that they should lock their narcotic drugs in a safe. He does not cast suspicion on any druggists. But those who do not once provide themselves with safes and guarantee the public that their supplies of drugs are nightly secured in them will invite suspicion.

STREET COURTESY To the Editor of the Evening Ledger:

Sir-I always thought the city of Philadelphia was the very heart and center of culture, refinement and civilization, but my personal experience during the last few weeks has received an awful jolt.

Mexicans are ladics and gentlemen cor pared to some of the smart Americans who live in this heautiful city. I cannot walk the streets without being insulted by a mart class of people who call themselve civilized. I never was insulted by a colored man, Chinaman, Japanese or Mexican, and I have lived among Mexicans in Mexico and the colored people of the South, and I find they are a more civilized race than some of the smart dressed people of Philadelphia, for any man or woman who will insult another on the streets or anywhere by call-ing him a mutt without provocation is unworthy the name of man or woman.

Much has been said and written regarding the increase in city land values. It is insignificant when compared with some of the increases in farm land values. Compare, for ex-ample, the increase in the land values of New York city with the increasing land values of the grain States of the West North Central group. The pop-ulation of New York city is just under five million; of Iowa, North Dakota, South Dakota, Nebraska and Kansas the total rural population is Kansas the total rural population is almost exactly the same as the popu-lation of New York city. During the years for which figures are available (1906-1916) the land values of New York' rows from \$3.367,000,000 to \$4.643,000,000—an increase of more than one-third in ten years. The total value of the farm lands in the States named was in 1910 seven and a half billions of dollars. In 1900 this same land had been valued at two and a half billions. In the interval of ten years billions. In the interval of ten years it had increased almost exactly five billions of dollars (about 200 per cent). The total value of farm lands in these five States is now one and one-half times the total value of land in New York city, and the rate of increase in the value of the land is four times the rate of increase in New York city.
