

Evening Ledger PUBLIC LEDGER COMPANY... EDITORIAL BOARD: C. H. WHALEY, Editor... PUBLISHED DAILY AT PUBLIC LEDGER BUILDING, Independence Square, Philadelphia.

THE AVERAGE NET PAV DAILY CIRCULATION OF THE EVENING LEDGER FOR APRIL WAS 118,827

Philadelphia, Thursday, June 7, 1917

The regular army still needs 82,000 men. So there is plenty of chance for those who would be volunteers who were 'discouraged' by conscription.

The rechristening of the German interned merchantman Kiel as the Camden is official evidence of the Government's opinion of the shipbuilding capacities of our busy municipal neighbor.

Little Luxembourg's appeal to President Wilson to save her from a fate similar to that of Belgium displays a lucid comprehension of America's aims.

When we say that Registration Day passed off as quietly as a national election day, we not only praise the patriotism of ten million citizens, but we emphasize the eloquent fact that our great democracy, rightly regards a presidential election as the ideal symbol of law and order.

France's peace terms are what they always were and always will be—return of Alsace-Lorraine and reparations for damage in invaded territory.

Two French soldiers stood in the mud and rain. 'We'll win,' said one, 'provided they stand firm.' 'Who do you mean by they?' asked his comrade.

Germany's description of herself as 'a nation of tango lizards' acquires a certain glimmer of meaning from the actions of the Ute Indians who resisted registration by indulging in a war dance.

I believe some big underlying organization is responsible for the widespread sale of 'dope' in South Philadelphia—Statement by Internal Revenue Official.

A complete account of the workings of this newspaper about a year ago. Incidentally, the remark of a South Philadelphia magistrate yesterday that 93 per cent of the larceny cases that come before him are due to 'dope' is evidence that the exposure was made none too soon.

The slur repeated for two years and a half that many Englishmen in America were hiding behind the Stars and Stripes in order to escape going to war is being gloriously erased by the rush to the first British recruiting station in the United States, opened yesterday.

It is evident now that geographical circumstances and not spiritual defection restrained thousands of our English residents from answering the call of liberty. Within twenty-four hours every United States army and navy recruiting station will be authorized to accept applicants for British service, and the indications now are that the number of recruits will run high into the tens of thousands.

There are no men in middle life today who can say: 'I was a Boy Scout. When I was a boy I took the Scout oath, which was that on my honor I would do my best to do my duty to God and my country, and to obey the Scout Law, to help other people at all times, to keep physically strong, mentally awake and morally straight.'

WAR FORCES USE OF WHITE COAL Alpine Streams in Dauphine Area Producing 800,000 Horsepower for French Factories

By HENRI BAZIN Staff Correspondent of the Evening Ledger in PARIS, May 17. THAT which was ancient Dauphine, annexed to the French crown in 1349 under the ruler of Philip IV, is now and has been for very long the province of Isere, geographically so called, yet nevertheless always referred to by the French people as the land of its ancient name.

Through the economic exigencies of the war, this historic and picturesque section of France bids fair to abandon its archaic sentimental name of Dauphine for that of Isere, through their steaming, cog-wheel, 'La Lande of White Coal.'

For here, through all the centuries, 'white coal' has existed waiting to be utilized industrially that whens might turn and looms spin and cannot be forced through its potency. When I first heard the two words I was puzzled, and until it was explained to me that 'white coal' is but the idealistic term for water power, I could not see the genuineness of the application.

Old-Fashioned Methods It was in and about Grenoble, a city now numbering 237,000 inhabitants and the principal center of Isere, that French industry centuries ago first utilized the early sleepy fashion of days when time was but the passing of hours and counted not in the cost of production.

From 1860 to 1900, Grenoble, and the surrounding district, became renowned for fine glove making, the very foremost position in the world being taken in this industry through an exultation and perfection of workmanship. During the same period workers in many branches of the metal trade, and in particular the manufacture of plain and decorative metal buttons, now used all over the world, added their steady to the industrial importance of Grenoble and Isere.

Water Power Revolutionizing Industry In 1914, at the time of the German invasion, 3985 manufacturing establishments were in the province, of which fewer than 23 per cent were originally founded. This proportion had been established, in the main, close to the fluid energy of mountain streams, there deriving their first motive power from the very water which they fed.

With the war and its drive of necessity toward the manufacture of munitions and supplies new districts of the generating type, together with new mills and factories sprang up with a rapidity never before known in France.

The neighbors are saying: George Williams, the cotton manufacturer, would be painting his barn all the time if he lived in the country; and they do say the only reason he built those new concrete steps in front of his house on Sedgewick street was so he scribble would see them and put this piece in the paper.

The terrible meek I beg to raise my voice in praise Of every dog as well as sheep. For every day the papers say It's only 'strong men weep.'

What Else Could One Expect? It is claimed that the Hessian fly has destroyed approximately one-sixth of the entire Kansas wheat crop this year.—Agricultural Digest.

In the aristocracy of labor that which we were in the habit of calling a bodycarrier is something else again. The Sunbury Daily tells us:

Tom Daly's Column

THE other evening one of the youngsters at the dinner table reported that he had seen a scarlet tanager in the woods, flaunting his gorgeous colors among the green leaves, but that there was another bird always close to him, which was as modest in plumage as the first was gay.

GIRLS WILL CHANGE The sergeant of marines was trim And pleasing to the ladies; Because of two that clung to him, These words of old O'Grady's:

"They say the girls they're raisein' here Has very takin' ways. Mayhap 'tis true, but, dear, oh, dear, 'Tis not their likes I'd praise. There's not a son of all the lot 'I've ever changed to see— Not soon o' them—that ever got A heart-throb out o' me. An', sure, I'm not so hard to please; 'Tis I that used to know A score of maids deservin' praise— But that was long ago."

ON PAPER made in Germantown in 1781, H. B. writes to call our attention to the fact that in the Record of Marriages of Christ Church, Philadelphia, under date of March 5, 1756, will be found that of John Codd and Mary Fish, the ceremony being performed by the Rev. William Sturgeon.

GEORGE JEAN NATHAN has a new book out. It's called "Bottoms Up" it's an application of the elastic to affairs, and here's one of the things that's most in keeping with the title.

Here's the Irish Finisher Sir—Joe Tynan is the one Irishman who can stop the submarine if it can be stopped. Ask 'Cramps' about him, or the Union Iron Works at San Francisco, or the Anken English Government, which gave him the shipyards of Montreal in 1915 to build fifty submarines.

WAR SURGERY The success of Carrel's system, I am told by those who know, is not due to a single element, but to the combined advantages of a highly developed technique.

PEACE "But, to speak plainly, peace is not in itself a human ideal. As long as it leaves uninvolved the problems of justice it is not even a desirable aspiration. It may even be repugnant to the moral sentiments of an enlightened conscience. It is to be desired only when it is the concomitant of realized social good, for it is then not an end in itself. But the word is not to be set aside as representing a mere negation.

WIRELESS Now to those who search the deep, Gleam of Hope and Kindly Light, Ome, before you turn to sleep, Breathe a message through the night. Send it, once, and they'll receive it. Wrecks that burn against the stars, Snare the death among their green, Hear the flickering threads between, Quick, through all the storms that blind, Quick with words that rush to find them.

THE LOST PARADISE I looked into the little room I may not enter more, The room that was a Paradise For us ten years before; With aching heart and praying eyes I lingered at the door.

OUR RUSSIAN MISSION The Russian excavated 25,145,560 cubic yards in their work on the Panama Canal. The excavation of only 25,000,000 was of use to our canal builders.

ANSWERS TO YESTERDAY'S QUIZ 1. Nathan Hale was born June 6, 1755. 2. W. G. Feltwell invented the typewriter in 1838. 3. The French excavated 25,145,560 cubic yards in their work on the Panama Canal.

NOISELESS TRACK CROSSING The problem of suppressing the noise and shock of the street car in passing over an intersection has been attacked in a novel manner by a Philadelphia inventor, Samuel B. Meeker, who accomplishes the object without the use of any of the moving and interlocking parts which characterize most of the inventions for this purpose.

THE OFFICE BOY "How is it that you employ bald-headed, white-whiskered old men for office boys?" inquired a friend who was calling on the head of a large industrial concern in one of the great cities the other day.

THE TERRIBLE MEAK I beg to raise my voice in praise Of every dog as well as sheep. For every day the papers say It's only 'strong men weep.'

What Else Could One Expect? It is claimed that the Hessian fly has destroyed approximately one-sixth of the entire Kansas wheat crop this year.—Agricultural Digest.

OUR RUSSIAN MISSION

What Do You Know? QUIZ

- 1. Who made the first aeroplane? When?
2. How did the Boston Tea Party end?
3. Who is nicknamed "Miss Alice"?
4. What queen was called "Brandy Nose"?
5. What is the name of the inventor of the phonograph?
6. Who discovered the method of separating beet sugar from the plant? When?
7. What are the chief functions of an adjutant general?
8. Who is the "man from nowhere"?
9. Where is Alaska located?
10. What is the height of St. Paul's Cathedral, London?

- Answers to Yesterday's Quiz
1. Nathan Hale was born June 6, 1755.
2. W. G. Feltwell invented the typewriter in 1838.
3. The French excavated 25,145,560 cubic yards in their work on the Panama Canal.
4. The excavation of only 25,000,000 was of use to our canal builders.

NOISELESS TRACK CROSSING

The problem of suppressing the noise and shock of the street car in passing over an intersection has been attacked in a novel manner by a Philadelphia inventor, Samuel B. Meeker, who accomplishes the object without the use of any of the moving and interlocking parts which characterize most of the inventions for this purpose.

THE OFFICE BOY

"How is it that you employ bald-headed, white-whiskered old men for office boys?" inquired a friend who was calling on the head of a large industrial concern in one of the great cities the other day.

THE TERRIBLE MEAK

I beg to raise my voice in praise Of every dog as well as sheep. For every day the papers say It's only 'strong men weep.'

What Else Could One Expect?

It is claimed that the Hessian fly has destroyed approximately one-sixth of the entire Kansas wheat crop this year.—Agricultural Digest.

THE LOST PARADISE

I looked into the little room I may not enter more, The room that was a Paradise For us ten years before; With aching heart and praying eyes I lingered at the door.

Across your bed the gleam and gleam Of sunlit leaves that crowd Your window shadow-music made, One must not play loud, A score of sitting light and shade By spectral figures played.
