## THE MOTHER WHO SPANKS HER CHILD IN THE HEAT OF ANGER

Too Few Parents When Inflicting Corporal Punishment Do So Collectedly-The Child Should Not Be Cowed

TOME time ago in an article dealing with the training of children I spoke f proper disciplining. The mother of ral obstreperous boys takes issue with me, quoting at me that to spare the rod will spoil the child. No one can pretend to pass judgment on all types of children; I do not doubt there are boys who cannot be reached in any other way than by corporal punishment. But the error so many parents make is that punishing the child while in the at of anger themselves, venting their wrath, no matter how justified, on their alpless offspring.

We have all seen the nervous, harried nother who boxes her child's cars, slaps his face or turns him over her knee and spanks him, more to relieve her own feelings than to correct any fault of his.

THEN, too, a child should not be cowed. The punishment should be given with view of making him see the error of his ways and correcting it himself.

Herbert Spencer in the middle of the Just century said on this subject: "Bear constantly in mind the truth that the aim of your discipline should be to pro duce a self-governing being; not to pro fuce a being to be governed by others. Were your children fated to pass their lives as alaves you could not too much coustom them to slavery during their childhood, but as they are to be free men with no one to control their daily conduct, you cannot too much accustom them to self-control while they are under your eyes.

"Do not regret the exhibition of conadderable self-will on the part of your sharp words are penalties that suggest children. It is the correlative of that themselves alike to the least reclaimed diminished coerciveness so conspicuous barbarian and the most stolld peasant. in modern education. The greater tend- . . They able mental exertion-for some study both indicate an approach to the system some ingenuity, some patience, some selfof discipline we contend for, under which control." Curiously enough Sir Herbert children will be more and more led to has made use of what to us has become rule themselves by the experience of a colloquialism when he tells us this natural consequences; and they are both is some task, which it undoubtedly is!

Dear Madam-Please print a recipe for rhubarb wine. Cut the fruit up into pieces two inches in

length and to one gallon of the fruit add one gallon of water and three and a half pounds loaf sugar. Fermentation will soon begin. Stir up twice daily and when the pulp ceases to rise wring out one quart at a time in a piece of thin canvas. Cork the liquid down in a stone bottle or cask. Ease the cork twice daily the first week to allow for any after-fermentation. The wine will be well seasoned in about six months.

Most people are suffering from the ef-fects of constipation, many being unaware of the fact. The fact that the bowels move every day is no evidence that one is not constipated. Normally the bowels should move at least three times a day or after each meal. Although the bowel may move daily, or even several times a day, the colon may be full all the time

The bowel movements in such a case are belated. The movements which occur each day should have occurred the day before or the day before that. Not only is it necessary that the bowels should move req-ularly, but that the colon should be com-pletely emptide daily and kept as nearly empty as possible. Normally the food spends four hours in the stomach, four hours more in the small intestine and reaches the colon at the end of eight hours. Certainly not more than four hours more should be required for the dismissal of the indigestible and unusable residue which The bowel movements in such a case ar
