a fieshless diet.

Biscuit

Can a laboring man do hard work with eating meat?

The wife of the famous evangelist discusses everyday topics in a helpful and wholesome way.

MANY persons, when they give up the use of meat, complain of acidity of the "He is not home three evenings a week! I am sure that he loves me, and I am positive that no one has come between us, but I don't know what to do! I can't very well meet him at the door with a rolling pin, you know!"

I glanced at her white, dainty hands and her pink and white complexion. "Why don't you use the rolling pin for something else?" I asked. "There isn't anything more effective for holding a husband than a rolling pin-if you know how to use it! Can you cook?"

I detest doing dishes afterward. If we could only afford a servan:"" "You have answered you, own ques-

"Of course, but I don't like to! And

tion!" I told her. I have seen a great many husbands who have been three years without a square meal, and it wasn't because they didn't bring home enough money to run the house on, either.

The eyes of all wait upon the Lord and He gives them their meat in due season. But when a lazy woman spoll the meat that the Lord has given, I do not see how she can expect Him to be pleased with her.

There is as much chance for religion over a cook stove as over a catechism. maybe more. Christ ordered His disciples, after the feast that He gave to the five thousand hungry people, that they should gather up the fragments that remained. The Son of God Himself was willing to attend to the fact that there should be no waste, and He was willing to exercise His divine power to feed the hungry.

How many women there are who are too idle to exercise their human gifts properly to feed a hungry husband or son? And how many more there are who will throw good food into the garbage pail because they are too lazy to pick up the fragments which remain?

It seems to me that it is as important for a woman to cook well for a man as it is to pray well for him.

Satan came to tempt Jesus after He had fasted forty days and forty nights. The Bible says that the devil came to Him when he was anhungered. Hunger is a good prelude to temptation. Many a man has stolen because he was hungry, many a man has committed murder because he was hungry, and every day men are stealing from their souls and murdering their souls because their bodies are hungry.

When the devil wants to make a drunkard out of a man, he starts in by making him eat less. It is when a man has been given a poor dinner that he goes to the saloon. It is when a woman tries to live by eating candy that she finds it handy to have a bottle hidden in the cunboard.

Many women have come to me and told me that their husbands were unreasonable, but I have found the women just as unreasonable. They are quite ready to say they love their husbands, but they want to escape the labor of doing anything to show it. It is all very well to have faith, all very well to tell a husband that he is loved, but he ought to be convinced of that faith by works. The Apostle James says that faith if it hath not works is dead, being alone. Let the faith of a woman's love be shown in the works over her cook stove, and our homes will be happier and God will be better pleased.

WILL ASK HOOVER'S AID IN MILK SITUATION HERE

Congressmen Requested to Discuss Prices in State With Food Expert

Herhert C. Hoover, favored by President Wilson for the post of food dictator, will be asked to interest himself in the milk tuation in this State.

situation in this State.

Congressmen Graham and Moore have been appealed to by C. Henderson Suppler president of the Supplee Alderney Dairy, to discuss the present wholesale and retail prices of milk in Pennsylvania with Mr. Hoover. The Government, it was learned today, will also be asked by local milk concerns to use its efforts to prevent the sale of milch cows.

In a statement issued by Charles E. Patton, Secretary of the State Department of Agriculture, the announcement is made that it is possible to pay the farmer at the present time more for milk and yet not raise the price to the consumer, because "the profits are new going to the distributor."

Mr. Supplee, who a week ago said that

"You people think you know so much about the milk business I'll tell you what I'll do. I'm ready to step down and out right now and let you folks run it. I'll make a standing offer to retire at any time and accept one-fourth of a cent profit on a quart of milk. I'll run the business for the State or for any one on a salary. Let them pay me the one-quarter cent profit per quart as my wage and the public can have what other profit there is.

Starch is the most easily digested of all him to take the cure.

foodstuffs—so easily digested, indeed, that

I offered to pay all expenses if he would foodstuffs-so easily digested, indeed, that go up to that dope-cure joint at White Plains, and sometimes he says he will, then again says he won't. You can't trust a person who takes dope. Sometimes he shows up every night and plays just beautiful. it is impossible to demonstrate that any energy whatever is utilized in its conversion into sugar. The process begins in the mouth, it continues in the stomach and is accelerated in the small intestine, so that at every stage of its journey through then again we don't see him for ten days Fred Kelly is so tickled at this chance to the alimentary tract the starch is brought into contact with juices that have the power work in the good places, that he has braced up and seems a different fellow. He used to drink a lot and one time when he was tanked up, he had to throw me from one arm to the other in the dance, and he let Now with most persons the difficulty is not with the digestion of starch, but with the excessive production of hydrochloric acid in the gastric juice. Hydrochloric acid makes a capital disinfecting solution, and me fall and hurt my back so bad. I could hardly move for a week. It gave me an awful scare and I had a good heart-to-heart makes a capital disinfecting solution, and Dame Nature orders large quantities of it for the disinfection of beefsteak. And it is a big task at that, for nothing needs disinfection so badly as meat, unless it be limburger cheese, oysters and a few other outrageous articles of diet. When a person eats heartily of a meat diet year after year. Nature grows accustomed to producing this disaffaction adults. talk with him. I told him he either had to cut out the booze or cut out working with me, cause you can't do the two things and do both well. Ch. I am glad that I have left the joints and I am proud of myself. I have worked awful hard and something naide of me has always said I would win out, and it is winning out, because there ain't no bigger thing in my line than danc-ing at the Winter Garden. They are going lucing this disinfecting solution in larger and still larger quantities, until the thing becomes habitual. And then when it is discovered that meat is doing harm or must be discarded and the diet is changed to advertise me, Kate, and they call me Nancy Lane. Sounds kinda pretty, doesn't it? I got some of the nicest clothes you the stomach continues to produce enormous quantities of hydrochloric acid for which over saw. My new dancing slippers is made to order, and I got some pretty things for my hair, though I think it looks better the system has no need and which creates the system has no need and which creates the feeling that something is wrong with the starch-digesting apparatus. In these cases one will do well to add to his starchy foods a quantity of fat, butter, cream or olive oil, for fats encourage the stomach to make smaller quantities of the hydrochloric cold.
